District of New York.

HISTORY
OF
LAKE CHAMPLAIN.

INTRODUCTORY.

General description of the Lake and of the most important points along its borders—Ancient and Modern names of places—Distances—Old Forts—Scenery—Original Indian name.

LAKE CHAMPLAIN extends from the $44^{\circ}30$ min. to the 45° north latitude, and lies between Vermont and New York—the boundary line of those States running through its centre. The lake is about ninety miles in length, in a right line from North to South, with a length of coast, on each side, of about one hundred and twenty-five miles : its southern extremity, or head, being at Whitehall, and its northern near the boundary line between the United States and Canada. The lake varies in width from one-fourth of a mile to thirteen miles, and its waters cover an area of about five hundred square miles. It receives the waters of Lake George, at Ticonderoga, and discharges itself into the St. Lawrence, through the river Richelieu. There is no perceivable current in the body of the lake, and its waters, at ordinary stages, pass into the Richelieu with a velocity of only one-third of a mile per hour.

The Lake has two arms; one on the west side, near its southern extremity, called South Bay, the other, on the east side, near its northern extremity, called Missisco Bay. This last mentioned bay stretches into Canada and covers about thirty-five square miles. The area of country, drained into the lake, is variously estimated from seven thousand to nine

thousand square miles. It probably approaches nearest to the larger estimate. Numerous rivers and creeks discharge themselves into the lake, among the principal of which are, on the New York side, Wood Creek, the outlet of Lake George, the Bouquet, Great and Little Ausable, the Salmon, the Saranac, and the Big and Little Chazy rivers. On the Vermont side are the Poultney river, Otter Creek, and the Winooski, Lamoille and Missisco rivers. The lake is subject to a rise and fall of from six to eight feet during the year ; the waters attaining their greatest height about the twentieth of May, after which they fall, gradually, until about the twentieth of September, when they usually reach the lower level of the remainder of the season.

Lake Champlain commences at the junction of Wood Creek with East Bay, in the town of Whitehall. The Indian name of this place was kah-cho-quah-na, "*the place where dip fish.*" Philip K. Skeene, an English Major under half pay, located here in 1763, and established a settlement at the mouth of Wood Creek, which was called Skeenesborough. This, for many years, was the most important settlement upon Lake Champlain. In 1773 it numbered seventy three families, all of whom, with but two exceptions, were Skeene's tenants. The name of the town was changed to Whitehall in 1788.

About two miles north of the village of Whitehall is South Bay, an arm of the lake seven miles long and one mile wide, extending to the south-west and separating the town of Whitehall from the town of Dresden. It was on the shores of this bay that the Baron de Dieskau landed, in 1755, with an army of fifteen hundred French and Indians, when marching against the English encampment at the head of Lake George.

Twenty-four miles below Whitehall is old fort Ticonderoga on the west, and Mount Independence on the east side of the lake. The waters of Lake George here discharge themselves into Lake Champlain through an outlet called, by the Indians, Cheonderoga : a word signifying "Noisy," and which

was applied in allusion to the falls on the outlet near its mouth. The French erected a fortress here in 1756, which they called Fort Carillon, and which was a place of great strength. Mount Defiance lies on the south side of the mouth of the outlet of Lake George, opposite Ticonderoga. The summit of this mountain is seven hundred and fifty feet above the lake, and within cannon shot of the old fortress.

Twelve miles north of Ticonderoga is Crown Point, called by the French *Point à la Chevalier*. Here the French built a fort in 1731, which they called Fort St. Frederic. This fort was destroyed by them on their retreat to Canada in 1759, and the same year General Amherst commenced a much larger work, the ruins of which are still to be seen.

Opposite Crown Point is a landing called Chinney Point, which was settled by the French, about the time they commenced building Fort St. Frederic, and was destroyed by them in 1759. So complete was the destruction of the settlement that when the English arrived, a few days after the retreat of the French, they saw nothing but the blackened chimneys of the consumed houses, standing as grim sentinels amid the surrounding ruin. These chimneys were permitted to stand for years, and gave the name of Chimney Point to that locality ; a name it yet retains.

At the present day Lake Champlain is regarded as extending as far up as Whitehall, but among the early writers its head was knocked about in a manner most perplexing to modern readers. Kalm, who visited the lake in 1749, fixes upon Crown Point as the head, and speaks of that portion south of Crown Point, as "the river which comes out of the lake St. Sacrement to Lake Champlain." Doctor Thatcher, who was with St. Clair's army in 1777, considers the lake to reach no further south than Ticonderoga, and refers to South Bay as extending from that place to Skeenesborough "a distance of about thirty miles." By several the passage between Ticonderoga and Skeenesborough was called South River. Some writers have run the head of the lake as far

up as the falls of Wood Creek, in the present village of Whitehall, while others describe Wood Creek as running as far north as the outlet of Lake George. I refer, at this time, to this difference of opinion among the early writers to guard the reader against the confusion which it has frequently produced, and to explain an occasional discrepancy, apparently, between this work and the narratives of the events here collected.

Two miles north of Crown Point, and on the same side of the lake is Port Henry, and about eleven miles further north is North-west Bay, called Bay *des Rocher Fendus*, in Sauthier's map of 1779. The village of Westport stands at the foot of this bay. On the opposite side of the lake, about ten miles north of Crown Point, is a small bay in which Arnold grounded and burned his galley and five gondolas after the engagement with the English, of the 13th October, 1776. Otter Creek, called by the French *la riviere aux Loutres*, empties into the lake about seven miles north of this spot. The Creek is navigable for lake vessels as far up as the falls at Vergennes, a distance of eight miles. In this Creek McDonough fitted out the fleet with which he gained the victory of the 11th of September, 1814. During the last war a small breast-work was thrown up on the north side of the Creek at its mouth, where Lieutenant Cassin of the Navy, and Captain Thornton of the Artillery, with two hundred men, repulsed a large British force, sent out from Canada to destroy the American fleet fitting out at Vergennes. A few miles north, and on the opposite side of the lake, is Split Rock, called by the French *rocher fendue*. This rock has always been considered a great natural curiosity. It projects one hundred and fifty feet into the lake, and is elevated about thirty feet above the level of the water. The part detached contains half an acre, and is separated from the main rock by a channel about fifteen feet wide. The opposing sides are, by some writers, said to fit, the prominences of the one corresponding with the cavities of the other. The popular opinion is, that this rock was

separated from the main land by an earthquake,* but Professor Emmons, who examined it particularly, supposes the separation to have been occasioned by the wearing away or decomposition of a mass of rock containing a large amount of pyritous iron.

The lake between Split Rock and Thompson's Point, formerly called Point *Reglochne*, is not quite one mile wide. A Light-house has been erected by the general government, upon the main land, a few rods south of the rock. From this point the lake increases in width as it extends towards the north. Between Essex and Charlotte, four miles north, it is three miles wide. Opposite Burlington it is nine and three-quarters miles, and from shore to shore, opposite Plattsburgh, about thirteen miles wide.

Between Essex and Charlotte is Sloop Island, so called because an English vessel of war, during the revolution, fired upon it, mistaking, in a fog, the stump of a pine tree standing near its centre for the mast of a sloop. A short distance below Essex, on the New York side, is the mouth of the Bouquet river. At the falls, two miles up this river, Burgoyne encamped and gave a war feast to a party of about four hundred Indians, previous to his attack on Ticonderoga in 1777. Fourteen miles north-east from Essex and on the opposite side of the lake, is the village of Burlington. About midway between these two places are four small islands called the Four Brothers. They are called *Isle de quatre vents* on Charlevoix's map of 1744 and the Four Winds Islands on Sauthier's map. Two and one-half miles south of Burlington is Pottier's Point, called *Erkly's* by Sauthier. It forms the west side of the mouth of Shelburne bay. Three miles south-west of Burlington is Juniper Island, on which stands a Light-house erected in 1826.

*In the winter of 1663 there was a severe earthquake in Canada. "Lakes appeared where none ever existed before; mountains were overthrown; rivers sought other beds or totally disappeared. The earth and the mountains entirely split and rent in innumerable places, creating chasms and precipices, whose depths have never been ascertained."—*Jesuit's Journal, Quebec, 1663.*

North-west from Juniper Island and near the west shore of the lake is Schuyler's Island, called by the French, *Isle Au Chapon*. Under this island Arnold collected his fleet on the morning of the 12th of October after his retreat from Valcour Island. A little to the south of this island is Douglass' Bay, called *Corlear* by the French and Indians. It is supposed by some that the humane and noble Corlear was drowned in this bay in 1666.

A mile to the north of Schuyler's Island is a bold promontory called Point Trembleau. At the foot of a small bay, formed by this point, stands the village of Port Kent, and about two miles to the north are the mouths of the Great and Little Ausable rivers, which empty into the lake near a sandy point, called point *Au Sable*. Six miles further north and half a mile from the main shore lies the island of Valcour, or Valeur, as it is sometimes called. This island is celebrated on account of a severe naval engagement fought near it between the Americans and English on the 11th day of October, 1776. One mile north of Valcour is St. Mitchell's, or Crab Island, and about three miles further north is the mouth of the Saranac river, called *Salasanac* on Sauthier's map. The village of Plattsburgh lies on both sides of this river at its mouth. Three miles east from Plattsburgh is Cumberland Head, on which a Light-house has been erected. Cumberland Head was called by the French Cape *Scoumon-ton* or *Scononton*. It extends about three miles into the lake in a southerly direction, and forms Cumberland Bay. This bay was the scene of McDonough's naval victory of the 11th of September, 1814. To the east of Cumberland Head is a large island called Grand Isle. The Lamoille river empties into the lake on the Vermont side near the south end of this island. Eight miles south of the Lamoille is the mouth of the Winooski. North of Grand Isle, and separated from it by a narrow channel, is another large island called North Hero. This is the *Isle Longue* of the French.

Twelve miles north of Cumberland Head, and lying be-

tween North Hero and the western side of the lake is the Isle La Motte. This island was named after Sieur la Mothe, a French officer who built a fort on the north end of the island in 1665, which he called Fort St. Anne. It was afterwards called Fort la Mothe. Kalm says this was a wooden fort or redoubt, standing on the west side of the island near the water's edge. It had disappeared when he passed thro' the lake in 1749, but he was shown the spot where it stood, which he describes as then "quite overgrown with trees." Opposite the north end of this island, and on the New York side, is the mouth of the Little Chazy river, and a short distance further north is the mouth of the Big Chazy. These rivers are called *Chasy* on a map of a survey of the lake made in 1732, and were originally named after Lieut. de Chasy, a French officer of distinction who, in 1665, was killed by a party of Mohawk Indians, while hunting in their vicinity. King's Bay lies north of the mouth of the Big Chazy. The north side of this bay is formed by Point Au Fer, which separates it from Rouse's Point Bay.

Point Au Fer was formerly separated from the main shore by a channel or deep morass connecting Rouse's Point Bay with King's Bay. Kalm says that the first houses he saw, after leaving Fort St. Frederic, were on the western side of the lake about ten French miles above St. Johns, in which the French had lived before the last war, but which were then (1749) abandoned. These houses probably stood either on Point Au Fer or near the mouth of the Big Chazy river. Prior to the revolution a brick house was built on this point, which was known as the "*White House*." It was fortified with an intrenchment and cannon by General Sullivan, at the time of the invasion of Canada in 1775, and was then considered as a very advantageous situation to command the navigation of the north end of the lake. Burgoyne, when he entered the United States, threw a body of troops into this place and it was retained by the British as a military post until after the Peace.

Opposite the northern part of Isle La Motte, on the Vermont side of the lake, is Alburgh Tongue, called by the French, *Point Algonguin*. The entrance to Missisco Bay is on the east side of this point. About eight miles north of Isle La Motte, also on the Vermont side, is Windmill Point. The French built a windmill here about the time of the erection of Fort St. Frederic at Crown Point, and had collected a small settlement near the mill; but the English having burnt the houses several times during their incursions into Canada, the settlement was at length abandoned. In 1749 nothing but the mill, which was built of stone, remained.

Opposite Windmill Point is the village of Rouse's Point, and one mile north is the terminus of the Ogdensburg (Northern) Railroad. A connection is here formed between the Ogdensburg and the Vermont & Canada Railroads by a bridge and floating draw. The boundary line between the United States and Canada, as fixed by the Ashburton Treaty of 1842, is about one mile below this bridge. This line is located 4,200 feet north of the true parallel of the 45° of latitude, and was so established in order to secure to the United States the site of an old fort commenced by that government soon after the close of the war of 1812.

The parallel of 45° was originally correctly located by the French, but, in 1766, Governor Moore and Brigadier General Carleton visited Lake Champlain and fixed the boundary between Canada and the Province of New York about two and a half miles below Windmill Point, which Governor Moore says was further to the northward than they expected to find it from the observations said to have been made by the French some years before. Moore's line was recognized as the true one until about the year 1818 when, on taking new observations, it was found to be too far to the north. As soon as the error was discovered the United States suspended work on the fort, and the unfinished walls were long known as "Fort Blunder." Since the treaty of 1842 a new and larger fort has been commenced on the site of the old

one, called Fort Montgomery. It is not yet completed.

Fort Montgomery stands at the foot of the lake. Here the river Richelieu commences and conveys the waters of the lake to the St. Lawrence. This river, for several years after the first settlement of Canada, was called the river of the Iroquois. Charlevoix says it was afterwards called the Richelieu on account of a fort of that name which had been built at its mouth, in 1641. This outlet of Lake Champlain is also called the Sorel or Chambly River.

Three and a half miles below the boundary line is Bloody Island, said to be so called on account of the murder of two lumbermen who were killed there by a party of soldiers sent out from Montreal to protect them from the Indians, on their return to the lake after having sold a raft of timber. Three-fourths of a mile below is Ash Island or *Isle aux Têtes*. One mile below Ash Island is Hospital Island and six miles lower down the river is Isle Aux-noix, where the French established a military post on their retreat from Crown Point in 1659. Thirteen miles below Isle Aux-noix is the village of St. Johns. This place was selected for a military post by Montcalm in 1758. It was occupied by the French prior to 1749.

About thirteen miles below St. Johns is the village and fort of Chambly. A fort was built here by the French in 1664, which was called Fort St. Louis. It was at first built of wood, but had prior to 1721 been replaced by a strong work of stone, flanked with four bastions, and capable of containing a large garrison. Fort Richelieu, which we have already stated to have stood at the mouth of the river, was afterwards demolished and a new fort built there by Mons. de Sorel, to which his name was given.

Lake Champlain is situate on the western side of a valley lying between the CLINTON Mountains in New York and the Green Mountains of Vermont. This valley is from one to thirty miles in width and about one hundred and eighty miles in length, north and south. Its greatest depression has been found to be between Westport, Burlington and

Port Kent. Between Burlington and Port Kent the water of the lake is two hundred and eighty-two feet in depth. Professor Emmons found the depth, four miles north of Westport, to be three hundred feet, and he was told that soundings of six hundred feet had been made in other places in that part of the lake. The surface of the lake is ninety-three feet above tide, and, if Professor Emmons was not misinformed, its bottom at this last point is at least five hundred feet below the level of the ocean. It is the popular opinion that the waters of the lake are gradually subsiding, but I judge this to be a mistake for the reason that the soundings made seventy-five years ago do not differ materially from those of the present day. The water in the bays and along the shores is not as deep as it was formerly, from the washing of the banks and the deposit of earth, saw-dust and rubbish brought down by the creeks and rivers, but the surface is probably as high above tide as it was when the lake was first visited by Champlain in 1609. It is evident, however, from an examination of the adjacent shores and rocks, that the lake at one time filled a much larger portion of the valley than it does at present. Geologists suppose this entire valley to have been twice occupied by the ocean—but these speculations are of but little interest to the general reader, who, usually, is satisfied to take things as they have existed for the last five thousand years.

This lake has ever been celebrated for the beauty of its scenery and the bold and imposing configuration of the surrounding country. Upon the eastern side, the valley is wide and fertile, until we pass Mount Independence, going south, when the hills approach the lake, and, in some places, rise abrupt from its shores. On the New York side, the mountains in many places extend to the water's edge, as in the case of the Black Mountains south of Ticonderoga ; the Kayadarosseras range which terminates with Bulwagga Mountain near Crown Point ; the northern end of the West Moriah range at Split Rock, and of the Adirondac Mountains

CHAPTER I.

Progress of discoveries by the French in Canada—Character of the Indian tribes—Champlain's visit to Lake Champlain in 1609—Battle between the Canada Indians and the Iroquois—Fort erected on Isle La Motte—De Courcelles' Expedition to the Mohawk River.

But little progress was made by the French in their American discoveries until the spring of 1534, when Jacques Cartier sailed from France with two small vessels and, in the month of May, reached Bonavista in Newfoundland. Cartier coasted around the north shore of the island and along the gulf of the St. Lawrence and, in September, returned to France. The following year he left France with three ships and, entering the mouth of the St. Lawrence, ascended that river as far as the St. Croix (St. Charles) near the Indian village Stadacona, (Quebec,) where he passed the winter. While his party were preparing their winter quarters, Cartier, with thirty-five armed men, proceeded up the river as far as Hochelaga, (Montreal,) near which he arrived on the second day of October.

"Hochelaga," says Warburton,* "stood in the midst of great fields of Indian corn ; it was of a circular form, containing about fifty large huts, each fifty paces long and from fourteen to fifteen wide, all built in the shape of tunnels, formed of wood, and covered with birch bark ; the dwellings were divided into several rooms, surrounding an open court in the centre, where the fires burned. Three rows of palisades encircled the town, with only one entrance ; above the gate, and over the whole length of the outer ring of defence, there was a gallery, approached by flights of steps, and plentifully provided with stones and other missiles to re-

*Conquest of Canada, Volume 1.

sist attack. This was a place of considerable importance, even in those remote days, as the capital of a great extent of country, and as having eight or ten villages subject to its sway. The inhabitants spoke the language of the Great Huron nation and were more advanced in civilization than any of their neighbors; unlike other tribes, they cultivated the ground and remained stationary." This was Hochelaga in 1534. Seventy years later it had sunk into a decayed and unimportant place.

On the 11th of October Cartier rejoined his party at St. Croix and, the following spring, returned to France. Early in the spring of 1541 he again left France and, entering the St. Lawrence, sailed up that stream as high as the rapids of Lachine. The next spring he returned to Europe and soon afterwards died. No effort was made by the French to colonize Canada, after the return of Cartier and his associates, until the year 1603, when an armament was fitted out, under the command of Pontgrave, to make further discoveries in the St. Lawrence. Among the officers who accompanied this expedition was SAMUEL DE CHAMPLAIN, a captain in the French Navy and a native of Sancetoge. Pontgrave and Champlain explored the St. Lawrence as far as the Lachine Rapids, which was the highest point reached by Cartier sixty-eight years before. In 1604 Champlain accompanied de Monts to Canada and again returned to France in the fall of that year.

In 1608, de Monts, who was at the head of a trading company, equipped two ships at Honfleur, and sent them out under the command of Champlain and Pontgrave, for the purpose of establishing the fur trade at Tadouassac. Champlain reached Tadouassac on the 3d day of June, and, after a brief stay, ascended the St. Lawrence, and on the 3d of July arrived at the ancient village Stadacona, which he selected as the site of the future capitol of Canada.

When the French first visited Canada the Indians residing north of the river St. Lawrence were engaged in war with

the Five Nations of Indians who occupied the territory south of the St. Lawrence. The Five Nations were a powerful confederacy, consisting of the Mohawks, the Oneidas, the Cayugas, the Onondagas and the Senecas. They called themselves the Mingoes, and sometimes the Aganuschions, or United People.* The French called them the Iroquois; the Dutch the Maquas. Lafitau gives them the name of the Agounousionni, as does Charlevoix, who says, "Leur nom propre est Agounousionni, qui veut dire, Faiseurs de Cabannes; parcequ'ils les batissent beaucoup plus solides, que la plupart des autres sauvages."† In 1712 the Tuscaroras, a tribe who had been driven from the south by the English, was admitted into the confederacy, which was afterwards known as the "Six Nations." L

Prior to the settlement of Canada by the French the Iroquois occupied all the country south of the river St. Lawrence and resided in numbers around Montreal and in the valley of Lake Champlain, but they had been driven off towards Lake Ontario by the Adirondacks, who lived near the Three Rivers. The success of the Adirondacks was of short duration, for soon afterwards they, in their turn, were driven from their ancient seats to a safer position below Quebec.‡ In 1608 the Iroquois resided upon the banks of the Mohawk and in several villages to the west of that river. They claimed the whole country lying on both sides of Lake Champlain, as far north as the St. Lawrence. The northern bank of the St. Lawrence was held by the Algonquins, the ancient and inveterate enemies of the Iroquois. The Hurons, a numerous nation residing west of Lake Ontario, were in alliance with the Algonquins and joined them in their wars against the Iroquois.

The Iroquois were powerful, politic, warlike and courageous. They have been termed among Europeans the Romans of the West.|| Charlevoix says the name of Iro-

quois was formed from the Indian *Hiro*, which means, *I have said*, “*Jai dit*,” with which they always finished their speeches, and *de kone*, a word often used by them and which, when pronounced with a drawl was a cry of grief, and, when spoken short and quick, one of exultation.* They lived in villages, around which they had extensive cultivated fields. These villages were enclosed with strong quadruple palisades of large timber, about thirty feet high, interlocked with each other, with an interval of not more than half a foot between them. On the inner side of the palisades were galleries in the form of parapets defended with double pieces of timber.† The Algonquins were a warlike nation and the most polished of the northern tribes. They were a migratory people, disdaining the cultivation of the soil and depending altogether on the produce of the chase. The Hurons had some slight knowledge of husbandry, but were more effeminate and luxurious than the other tribes, and inferior in savage virtue and independence.‡ They lived in villages, of which the nation possessed twenty, but which were inferior in construction and strength to those of the Iroquois.

When Champlain landed at Quebec he found the Algonquins and Hurons engaged in active war with the Mohawks, one of the oldest and most powerful branches of the Five Nations. Learning, from some Indians who visited his encampment in the winter, that they intended an inroad into the country of their enemy in the course of the approaching summer, he determined to accompany them, and, by that means, not only explore a river and large lake through which the war party would pass, but by his powerful assistance strengthen the friendship which then existed between the French and the surrounding Indians. For this purpose, on the 18th of April 1609, he left Quebec on board a pinnace accompanied by a small party of followers, and as-

‡Warburton, Vol. 1.

cending the St. Lawrence as far as the mouth of the Richelieu, passed up that stream to the foot of the rapids near Chambly. Here a war party of sixty Algonquins and Hurons soon after joined him, and commenced preparations for the incursion.

It would seem that it was Champlain's intention to have taken his whole party with him, but the men, intimidated by the small number of the Indians or from some other cause, refused to proceed any further, and, after the strongest appeals on the part of Champlain, but two would accompany him. With these alone he determined to join the Indians on their long and perilous expedition. All their arrangements being completed, Champlain and his two companions, on the 2d of July, embarked with the Indians in twenty-four canoes and that day proceeded up the river to a point about nine miles above the island of St. Theresa, where they encamped for the night. The next day they continued on as far as the lake, which they entered on the following morning, and coasted along its west shore until they came within two or three days journey of the place where they expected to meet the enemy. After this they traveled only by night, each morning retiring into a barricaded camp to pass the day. The party advanced with the utmost caution, keeping their canoes close together, and making no noise which might be heard by the enemy should they happen to be near. During the whole journey they used no fire but lived upon dried Indian meal soaked in water.

Champlain, in his account of this expedition, particularly refers to the superstition of the Indians and the importance they attach to dreams.* Whenever he awoke they would eagerly inquire whether he had dreamed of or seen their

*The Indian trusts to his dreams and invariably holds them sacred. Before he engages in any important undertaking, particularly in war, diplomacy, or the chase, the dreams of the principal chiefs are carefully watched and examined; by their interpretation his conduct is guided. In this manner the fate of a whole nation has often been decided by the chance vision of a single man.—*Conquest of Canada, Volume 1, page 192.*

enemies. One day, while the party lay concealed near Crown Point, Champlain fell asleep and thought he saw the Iroquois drowning in the lake within sight of the encampment. On awaking he related the dream to the Indians, which, he says, "gained such credit among them that they no longer doubted but they should meet with success." That same night about ten o'clock, while proceeding cautiously along, they met a war party of the Iroquois, who were passing down the lake in canoes.

As soon as the two parties discovered each other the Iroquois hastened to the shore and, having first secured their canoes, began to cut down trees and form a barricade. The others put out towards the centre of the lake and proceeded to fasten their canoes together, and then secured them, with poles, in a position within arrow-shot of the barricade. Two canoes were then sent towards the shore to inquire whether the Iroquois wished to fight, who answered they did but proposed, as it was then dark, that the battle be deferred until morning. To this the Algonquins and Hurons agreed and both parties passed the night in singing and taunting their rivals of cowardice and imbecility. Champlain and his two companions were equipped in light armor, and each carried an arquebus. They were placed in different canoes and kept themselves concealed from sight, lest the Iroquois might be alarmed at their appearance and decline the combat.

On the following morning an engagement took place which is thus recorded by Champlain.* "The moment we landed they (the Algonquins and Hurons) began to run about two hundred paces towards their enemies who stood firm, and had not yet perceived my companions, who went into the bush with some savages. Our's commenced calling me in a loud voice, and making way for me, opened in two, and placed me at their head marching about twenty paces in advance, until I was within thirty paces of the enemy. The moment they saw me they halted, gazing at me and I at them. When

*Voyages de la Nouv. France.

I saw them preparing to shoot at us, I raised my arquebus, and aiming directly at one of the three chiefs, two of them fell to the ground by this shot, and one of their companions received a wound of which he died afterwards. I had put four balls in my arquebus. Our's on witnessing a shot so favorable for them, set up such tremendous shouts that thunder could not have been heard ; and yet, there was no lack of arrows on one side and the other. The Iroquois^{were} greatly astonished seeing two men killed so instantaneously, notwithstanding they were provided with arrow-proof armor woven of cotton thread and wood ; this frightened them very much. Whilst I was re-loading, one of my companions in the bush fired a shot, which so astonished them anew, seeing their chiefs slain, that they lost courage, took to flight and abandoned the field and their fort, hiding themselves in the depth of the forests, whither pursuing them I killed some others. Our savages also killed several of them and took ten or twelve prisoners. The rest carried off the wounded. Fifteen or sixteen of ours were wounded by arrows ; they were promptly cured."

This battle was fought on the 30th of July, near what Champlain describes as "the point of a Cape which juts into the lake on the west side." Some writers have located the battle-ground on Lake George. Doctor Fitch* thinks it took place upon one of the points of land in the town of Duesden or Putnam, south of Ticonderoga ; but, from an examination of Champlain's map of New France,† it is evident that the engagement took place somewhere between Crown Point and Lake George, probably in the town of Ticonderoga.

As soon as the victorious party had gathered the weapons and other spoils left behind by the Iroquois, they embarked on their return for Canada. After proceeding about eight leagues down the lake they landed, after night fall, when the

*Historical Survey of Washington County.

†A copy of this map will be found in Vol. 3 of O'Callaghan's Documentary History of New York,

Indians put one of their prisoners to death with the most horrible and protracted tortures. The rest of their prisoners were taken to Canada. At the rapids of the Richelieu the party separated and the Indians returned to their homes, well satisfied, says Champlain, with the result of the expedition and uttering strong professions of gratitude and friendship for the French.*

The above is, in substance, Champlain's own narrative of the first visit of civilized man within the limits of the state of New York. Two months later Henry Hudson entered New York Bay and ascended the North River as far as the present village of Waterford.† Thus were the northern and southern sections of the state almost simultaneously explored by the European. When these two celebrated men first looked upon the clear pure waters of New York and wondered at the grandeur of its mountains and the beauty of its gigantic forests, little did they think that, for nearly two centuries, those scenes would be rendered horrible by the bloody contest of ambitious colonists, or the midnight foray of the ruthless savage. As little could they have foreseen that, within less than half a century longer, those valleys would be filled with rich and populous cities, thriving villages and fertile fields or that that lake and river would bear upon their waters a commerce equal to that then belonging to the nations they so proudly represented.

After the departure of the Indians Champlain returned to Quebec. He continued as Governor of Canada until 1629, when he surrendered the government to the English and returned home. In 1632 Canada was restored to France, and,

*Charlevoix and most English writers say that Champlain, on this expedition, ascended a rapid and passed into another lake afterwards called Lake St. Sacrement. Champlain, in his account, says the Indians told him of a waterfall and of a lake beyond, *three or four leagues long*, and adds that he saw the waterfall, but says nothing of the lake. Had he explored the lake he would not have represented it as only three or four leagues long.

†Hudson first entered New York Bay in September 1609. He sailed up the river as far as Albany and embarking in small boats continued on to Waterford, where he arrived on the 22d of that month.

the next year, Champlain was re-appointed Governor of the colony ; which situation he continued to hold until his death, at Quebec, in 1635.

Champlain was brave, high-minded, active and generous, and eminent for his christian zeal and purity. "The salvation of one soul," he often said, "is of more value than the conquest of an enemy." During his life he fostered christianity and civilization and succeeded in planting them among the savages of Canada. The only great mistake of his administration was an injudicious interference in the quarrels between the Indians. By this means he directed the hostility of the warlike Iroquois against the French, and created an implacable hatred on the part of that powerful nation, which time could not heal, nor the blood of a thousand victims soften.

Mons. de Montmagny succeeded Champlain as Governor of New France. In 1641, he erected a fort at the mouth of the Richelieu, as a protection against the repeated inroads of the Indians by the way of Lake Champlain. M. de Montmagny was succeeded by M. D' Ailleboust, in the course of whose administration, of three years,* the Iroquois made several inroads into the territory of the Hurons and drove them from the fertile banks of the Ottawa. These victories of the Iroquois rendered them more audacious than ever. Breaking a solemn treaty of peace made with M. de Montmagny several years before, they again appeared among the French settlements, despising forts and barricades and insulting the humble husbandman with impunity. In their attacks no force was too strong for them to overcome ; no hiding place too secret for them to discover. So great, at length, became the audacity of these savages that they suddenly fell upon a body of Algonquins, under the very guns of the fortress of Quebec, and massacred them without mercy.

*The Governors of New France held office for three years only; in consequence of a decree that no one man should hold the government of a colony for more than that length of time.—Warburton.

A dark and unpropitious gloom hung over the affairs of the colony until the arrival of the Marquis de Tracy, as viceroy, in 1664. M. de Tracy brought with him the Carignan-Salieres, a veteran regiment which had greatly distinguished itself in the wars against the Turks. Immediately on the arrival of these troops they were sent, accompanied by the allied Indians, against the Iroquois and soon cleared the country of those troublesome enemies. Having established peace throughout the colony, M. de Tracy prepared to adopt measures to make that security permanent. The hostile Indians had been accustomed to approach the French settlements by the way of Lake Champlain and the Richelieu River, and to effectually block up this avenue three Captains of the Carignan regiment, M. de Sorel, de Chambly, and de Salieres, were ordered to erect forts on that river.

M. de Sorel built a fort at the mouth of the river, on the site of old fort Richelieu erected by de Montmagny in 1641. M. de Chambly built a fort at the foot of the rapids, in the present village of Chambly, which he called fort St. Louis, and M. de Salieres built one nine miles above, which he named St. Theresa, because it was finished on that Saint's day. The next year M. de La Mothe, another Captain in the Carignan regiment, was sent to Lake Champlain to build a fort on an island near the lower end of the lake, which was intended to serve as a place of rendezvous, "from which continual attacks could be made on the enemy." This fort was called St. Anne.

As soon as tidings of the erection of these forts reached the Iroquois, three of those tribes sent deputies to Quebec with proposals of peace. M. de Tracy gave them a friendly audience and sent them back with valuable presents.

About the same time he determined to invade the country of the Mohawks, who with the Oneidas, remained stubborn and inflexible, and inflict summary punishment upon them for their former insolence and treachery. With this view M. de Courcelles was ordered to fit out a military expedition,

with the utmost dispatch. On the 9th of Jan., 1666, he started with three hundred men of the regiment of Carignan-Salieres, and two hundred volunteers, *habitans*, for Fort St. Theresa, which had been designated as the place of rendezvous. The weather was so severe that before they had advanced three days journey many of the men would have perished, had they not been carried along by their companions. On the 24th Sieurs de la Fouille, Maximin and Lobiac, Captains of the Carignan regiment, joined the army with sixty men and some *habitans*, but before they reached St. Theresa so many men had become disabled that it was necessary to withdraw four companies from the forts on the Richelieu to supply the vacancies in the ranks.

On the 30th of January de Courceles marched out of Fort St. Theresa at the head of five hundred men, and passing the lake on the ice, crossed the country towards the Mohawk villages. The snow was nearly four feet deep, and the men were obliged to use snow-shoes to pass over it. As horses could make no progress through the deep snow, a large number of slight sledges were prepared which were loaded with provisions and dragged along by the men, or by large dogs brought on for that purpose. Each man, including all the officers, carried upon his back from twenty-five to thirty pounds of biscuit or other supplies.* The intention of the French had been to march direct against the Mohawk villages, but having lost their way, through the ignorance of their guides, they turned too far to the south, and on the 9th of February arrived within two miles of Schenectady, where they encamped. Here they were met by a small party of Mohawks, who, pretending to retreat, were carelessly pursued by sixty of the French Fusileers, who were thus drawn into an ambuscade of about two hundred Indian warriors securely posted behind the trees of the forest. At the first volley of the Indians eleven of the French, including a Lieutenant, were killed and several wounded. The fusileers discharged

*Relations de ce qui s'est passe en la Nouv : France en années 1665—6.

their pieces and immediately fell back upon the main body of the army, while the Indians retired with a loss of three killed and six wounded, taking with them the scalps of four Frenchmen, which they exhibited in the streets of Schenectady. It is said the whole company of fusileers would have been massacred, but for the intercession of Corlear, a Dutchman greatly beloved by the Mohawks, who humanely interceded in their behalf.*

Information of the approach of the French having been sent to Fort Albany by the authorities of Schenectady, three of the principal citizens were sent to M. de Courcelles to inquire what were his intentions in invading the country belonging to the English. De Courcelles replied that he had no desire to molest the English in their possessions, but came solely to seek out and punish the Mohawks, who were the unrelenting enemies of the French. He also represented to them the state of his army, worn out with fatigue and hunger, and requested that they would sell him provisions and consent that he might send his wounded to Albany. The English readily agreed to do as he desired, and the next day seven wounded Frenchmen were sent to Albany. The inhabitants also carried large quantities of beans, bread and other provisions to the French camp, for which they were liberally paid.

De Courcelles, having rested his men until the 12th, suddenly broke up his camp and hastily retraced his steps to Lake Champlain and from thence to Canada. The Mohawks, who were at their first village, learning the retreat of the French, immediately started in pursuit and followed them as far as the lake, where they took three prisoners and found the bodies of five men who had perished of cold and hunger.†

The expedition of M. de Courcelles, although it had failed

*Gordon says the whole of de Courcelles party would have been destroyed but for the intercession of Corlear.

†London Document II. In 1st Volume Documentary History of New York.

to reach the Mohawk villages, through the mistake of the guides, caused much anxiety to the Indians ; nor were their fears diminished by the information communicated by the prisoners that M. de Tracy intended to send a much larger force into their country the next summer. To avert the threatening storm, they determined to make immediate overtures for peace. Accordingly, in June, 1666, ten Ambassadors from the Mohawks, accompanied by a delegation of Oneidas, repaired to Quebec, asking protection for their people and a renewal of the old treaties of peace. M. de Tracy at first refused to receive their wampum belts, but perceiving that this caused them great anxiety, he finally accepted their proposals. But while the negotiations were in progress at Quebec, and just as the French viceroy began to congratulate himself upon the future security of his colony, a tragedy took place on Lake Champlain, which for the time defeated his plans and destroyed all his confidence in the professions of the Indian deputies.

Fort St. Anne was at this time garrisoned by several companies of the Carignan regiment, one of which was commanded by Sieur de Chasy, a nephew of the viceroy. Apprised of the friendly professions of the Mohawks and their desire for peace, the ambassadors of that nation having passed the fort on their way to Quebec, the officers relaxed their usual vigilance and amused themselves by fishing and hunting in the neighborhood. While a small party of French officers and soldiers were thus engaged, they were suddenly attacked by a band of Mohawk Indians, who killed two Carignan Captains, de Travesy and de Chasy, and took several volunteers prisoners. Information of this treacherous act was immediately sent to Quebec, and one of the Indian deputies had the vain audacity to boast, at M. de Tracy's table, that he had slain the officers with his own hand. The Indian was seized and strangled on the spot ; and M. de Tracy, breaking off all negotiations, sent M. de Sorel, at the head of three hundred men, against the Mohawk villages,

with orders to overrun the whole country and to put every inhabitant to the sword. M. de Sorel had by forced marches crossed Lake Champlain, and was pushing rapidly towards the Indian villages, when he was met by a new deputation from the Mohawks, bringing back the Frenchmen taken prisoners near Fort St. Anne and offering every satisfaction for the murders committed there.

Still desirous to secure peace, and in the belief that the demonstration already made had over-awed the Indians, M. de Sorel retraced his steps to Quebec, where negotiations were again resumed with such success that, on the 12th of July, a treaty was signed by which the Indians agreed to restore the Canadian, Algonquin and Huron prisoners in their hands, and to become the fast friends and allies of the French. On the other part, the viceroy promised to extend his protection over their nation, "to send some black gowns (Jesuit missionaries) among them" and "to open a trade and commerce by the lake du Saint Sacrement."*

CHAPTER II.

M. de Tracy collects a large army at Isle La Motte—He marches against and destroys the Mohawk village—Condition of Canada—De Callières' project for the invasion of New York—Burning of Schenectady—Captain John Schuyler's attack on Fort Laprairie—Major Philip Schuyler's expedition to Canada—de Frontenac marches against the Mohawks.

War is the delight of the savage. It furnishes an excitement necessary to his happiness. Without it he pines and wastes in insufferable quiet; a restless, miserable being. To obtain relief he hesitates not to violate the most sacred treaties or break the ties of long continued friendship. "We must either," says Sir William Johnson,* "permit these people to cut each other's throats, or risk their discharging their fury on our traders and defenceless frontiers."

M. de Tracy soon found that he could only secure permanent peace and quiet to the colony, by an expedition into the Mohawk country, of such force as to make that implacable nation feel the destructive power of the French Arms. With such an army he now prepared to march against the Indian villages on the Mohawk River. Never had Fort St. Anne presented so lively a scene as was beheld there in September, 1666. Within the fort and close under its defences were collected six hundred veterans of the Carignan-Salières, while on the main shore opposite lay encamped an equal number of volunteers, *habitans* of the colony. One hundred Huron and Algonquin warriors, bedaubed with paint and bedecked with feathers, stalked majestically among the crowd, and rendered the night boisterous with their war songs and dances. The labor of preparing this expedition, the largest which had yet been collected on Lake Champlain, was confided to M. Talon, Intendant of New France.

*Letter to Earl of Hillsborough.

On the 1st of October M. de Courcelles started from the fort at the head of four hundred men. On the 3d the main body of the army moved off under the immediate command of M. de Tracy, who despite his advanced years, was determined to lead the expedition in person. Four days after Sieurs de Chamblay and Berthier followed with the rear guard. The progress of the army, after it reached the upper end of the lake, was slow and laborious, as the men dragged with them two small pieces of cannon and three hundred bateau or bark canoes, which had been provided for crossing the lakes and rivers on the route. It was de Tracy's intention to surprise the Indians before they should learn of his advance ; but, notwithstanding the great caution of the troops, the Mohawks received timely information of their approach, and, abandoning the villages, secreted themselves in the surrounding forests, or ascended the mountains, and from a distance fired random shots at the soldiers. The French found the cabins of this nation larger and better built than any they had seen elsewhere. The villages were surrounded by a triple palisade twenty feet in height, newly repaired and strengthened and flanked by four bastions. Large quantities of Indian corn, beans and other provisions were stored away in magazines sunk in the ground, and numerous tanks, made of bark and filled, stood about the enclosure to supply the inhabitants with water, and to extinguish fires when necessary. Everything indicated that the Indians intended to make a strong defence, had they not been intimidated by the strength and numbers of the invaders. But as it was, not a warrior or able-bodied man was to be seen ; they had fled, leaving behind only the women and a few old and decrepit persons, too feeble to escape. These M. de Tracy retained as prisoners. In this manner he passed through the whole country until he reached the most remote Mohawk village, which he burned. After celebrating Mass and returning thanks to God for the success of the enterprise, the French retraced their steps towards Canada, on their

way burning the other villages and destroying all the provisions they could not carry off.*

While the army was passing near Schenectady on its return, M. de Courcelles called upon Corlear, who it will be remembered had rendered the French such signal service the preceding winter, and invited him to visit Canada. On Lake Champlain the fleet of boats encountered a heavy storm, which capsized two canoes with eight persons on board, all of whom were unfortunately drowned. Among the persons thus lost were Corlear and Lieut. Sieur de Luges, an officer of great merit and distinction.†

The expedition of M. de Tracy effectually subdued the Mohawks, and, for the next twenty years, secured the settlements on the St. Lawrence from the inroads of that nation. But Canada was not destined long to enjoy the blessings of profound peace. Ten years had scarce elapsed before she found herself again engaged in a destructive war with the Western Iroquois, which continued, with short intervals of truce and with varied success, until the treaty of Utrecht in 1713. For several years after the commencement of this war the English colonists were on friendly terms with those of Canada, and repeatedly refused to aid the Western Iroquois in their controversy with the French. They were equally careful to do nothing to prevent it. "The Five Nations are a bulwark between us and the French," said Governor Dongan.‡ That bulwark was strongest in war. In times of peace it might crumble into atoms.

The accession of William and Mary to the throne of England, in 1689, was followed by a war between the English

*Relation, &c., en la Nouv: France, en années 1665—6.

†The accounts of these expeditions through Lake Champlain do not clearly indicate the route followed by the French, but it was probably along the western border of the lake as far south as the outlet of Lake George, then up the outlet and through that lake to its head, from whence it crossed the country to the waters of the Hudson River. In the treaty between the French and Iroquois, referred to at the close of the preceding chapter, it was expressly provided that trade and commerce be opened to the Iroquois, with New France, "by the lake du saint Sacrement."

‡Dongan's Report to the Committee of Trade : 1687.

and French, which continued until the peace of Ryswick in 1697. The news of the quarrel between the mother countries soon reached America, and found the Colonists of both nations, not only willing, but anxious to participate in the struggle. The Chevalier de Callieres, who was Governor of Montreal and Commander-in-Chief of the troops and Militia in Canada, visited France in the year 1689, and submitted to the King a project for the reduction of the Province of New York, the re-establishment of French ascendancy over the Five Nations, and the consequent control of the lucrative fur trade of America.

De Callieres' plan was to lead an army of two thousand men up the Richelieu River and Lake Champlain as far as the carrying place between Wood Creek and the Hudson River, where he would build a small log fort, and garrison it with two hundred men to guard the bateau during his absence. With the rest of his army he would march direct against Fort Orange (Albany) which he would seize, and then, embarking in the boats and canoes found there, would push on for New York. This town he represented as containing two hundred houses, and as protected by a small fort which could offer but a slight resistance to his attack. To prevent succor reaching the town from Boston or England, he required that two ships of war should be sent to cruise in the mouth of the river until his arrival. De Callieres predicted the highest benefits to France from the success of his project. "It will," he declared, "firmly establish the Christian religion as well among the Iroquois as among the other savages to whom we shall be able to speak as masters, when they are encircled on the side of Canada as well as of New York. It will secure and facilitate the cod-fishery, which is carried on along our coasts of Acadie and on the Great Bank. It will give His Majesty one of the finest harbors in America which can be entered during almost all seasons of the year, in less than one month of very easy navigation." Accept the favorable opportunity which presents itself of becoming

masters of New York, adds de Callieres in conclusion, and the trade of our Colony will flourish; reject it and English intrigues with the Iroquois and other savages will destroy Canada in a little while.*

The French King received de Callieres with favor and in June of the same year sent instructions to Count de Frontenac, then viceroy of Canada, to organize an expedition to carry out the proposed plan, and directed that de Callieres should be appointed Governor of the conquered Province.—The King also ordered Sieur Begon to send out two ships of war under command of Sieur de la Caffiniere, who was instructed to place himself under the direction of de Frontenac. Should the proposed expedition fail, de Caffiniere was ordered “to make war against the English, and to range along the coasts of New England and New York, to capture as many prizes as possible, and to remain there until he have no more provisions than are necessary for his return to France.”†

While the French were engaged in prosecuting the war with the Indians at the west they seem to have been regardless of the exposed state of the frontier towards Lake Champlain. The old forts of St. Anne and St. Theresa, which had proved so great a protection twenty years before, were suffered to decay. Montreal was not fortified; a triple palisade, in poor repair, being its main defence. Indeed the only work in that quarter of any strength was the fort at Chambly, which had been rebuilt of stone and was surrounded by a small but flourishing settlement. On the 12th of November 1687 a formidable party of the Iroquois suddenly attacked this fort. The garrison made a successful resistance, but the settlement around it was ravaged and several of the inhabitants taken prisoners. A few days later the whole country between the St. Lawrence and the Richelieu swarmed with a savage host, who demanded immediate audience with the Governor,

*De Callieres to the Marquis of Seignelay. January, 1689.

†Instructions to Count de Frontenac, June 7th, 1689

M. de Denonville, and haughtily dictated peace to the weak and terrified inhabitants. "Look," cried the proud Chief, pointing towards a band of twelve hundred warriors at his back, "we are like the leaves of the forest in number and stronger than the mighty oak. Your people are few and weak. We have no occasion to lift our whole hand, for our little finger is sufficient to destroy you." Denonville bowed before a storm he could not resist, and concluded a treaty of peace upon the terms proposed by the savages.

Of short duration was this boon of peace to the French, the acceptance of which alike proclaimed their own humiliation and the power of their savage foe. On the 26th of July, 1688, twelve hundred Indian warriors landed on the island of Montreal, and having overpowered a force of one hundred and fifty Canadians and fifty Indians imprudently sent against them, devastated the whole settlement, killing nearly a thousand of the inhabitants and bearing two hundred of them into captivity.* The St. Lawrence frontier was now at the mercy of the fierce and relentless Iroquois. The power of the French was paralyzed ; trade languished, agriculture was interrupted and the very existence of the colony threatened.

Such was the gloomy condition of affairs when the instructions of the King, for an invasion of New York, reached the Count de Frontenac. The troops in Canada consisted of thirty-five companies of regulars, each of which, when full numbered fifty men. But at least four hundred and fifty were required to fill the ranks, so that the actual number did not exceed thirteen hundred.† Of the *habitans*, about three thousand were able to bear arms.‡ Although de Frontenac could not send out an expedition of the magnitude and strength proposed in his instructions, he nevertheless deter-

*Gordon—Warburton, Vol. 1.

† De Callieres to the Marquis of Seignelay.

‡This was the estimated number in 1687. It had probably decreased during the two succeeding years—See Gov. Dongan's Report to Board of Trade.

mined to organize three small detachments to march against the English. One was to rendezvous at Montreal and was to proceed against Albany, another was to assemble at Three Rivers, from whence a descent was to be made upon the settlements near the Connecticut, and the third was to start from Quebec to attack the settlements, on the seaboard, east of Boston.

The party which left Three Rivers surprised and destroyed the English settlement of Salmon Falls and on their retreat, falling in with M. de Mamerval, who had marched from Quebec, joined him in an attack on the fortified village of Kaskebe upon the sea coast, which they captured after a severe struggle.*

The third and most important detachment numbered two hundred and ten men, including ninety six Huron and Algonquin Indians. This detachment was placed under the command of two Canadian officers, Sieur la Moyne de St. Helene and Lieutenant Daillebout de Mantet, having under them d' Iberville and de Montesson. Attached to the expedition as volunteers were Sieurs de Bonrepos and de la Brosse, two Calvinist officers, and Sieurs de Blainville and de Montigny. The party left Montreal about the middle of the month of January 1690, crossing to the Richelieu and ascending that river and Lake Champlain on the ice. At the close of the sixth day's march a consultation was held to determine the route to be taken and to regulate the plan of attack. The Indians asked where the officers proposed to lead them. To this de St Helene replied that he had received no orders to march against any particular place, but generally to act as he should think best, and that he wished to attack and surprise Fort Orange, which he represented as the Capitol of New York and a place of considerable importance. The Indians, remembering the defeats of the French during the preceding year, and holding their prowess in slight esteem, opposed this plan as rash and impractica-

*Warburton, Vol. 1.

ble. "Attack an armed fort indeed," cried a swarthy warrior ironically, "Since when have the French become so desperate!" "We wish to regain our honor," replied de Mantet, "or perish in so glorious an enterprise." The Indians, however, remained unconvinced and the party moved on without coming to a decision.

Eight days after this the party reached the point where the two routes to Albany and Schenectady diverged. The Indians took the road leading towards Schenectady, and the French followed without objection. Nine days after they arrived, about four in the evening, within two miles of that place. Here the savages were addressed by one of their Chiefs, who urged them to lose all recollection of their fatigue and to prepare to take ample revenge for the injuries they had received from the Iroquois at the solicitation of the English. Having remained here to refresh themselves and prepare their arms, the party moved on, and about 11 o'clock came within sight of the village. The night was intensely cold and the citizens had retired early to bed—even those who usually guarded the gates of the palisade had withdrawn, leaving those avenues open and undefended. In profound silence the Canadian officers marched into the village and distributed their forces among the scattered houses. As soon as each man was properly posted, the savages raised the war cry and the whole force rushed upon the unconscious inhabitants. De Mantet, at the head of one party, assaulted a small fort which he captured and burned; putting to death all who defended it. De St. Helene rushed against the barricaded doors of the private houses, beating them down with muskets and slaughtering every one who opposed his progress. In the confusion, M. de Montigny was wounded by the thrust of a spear. The massacre lasted for two hours, and during that time sixty of the inhabitants, including women and children, were butchered in cold blood. Having pillaged and burned every house in the village but two, the French and Indians, early the next morning, started on their return

to Canada taking with them twenty-seven prisoners and carrying off fifty horses, besides a quantity of other property.*

The news of this murderous assault reached Albany about five o'clock the next morning, and created the greatest consternation among its inhabitants. Alarm guns were fired from the fort, messages were sent to Esopus for assistance, and Laurence, a Mohawk Chief then in Albany, hurried to the Mohawk Castles to bring down the warriors of that nation. In three days a party of fifty young men from Albany and one hundred and fifty Indians were collected at Schenectady, and started in pursuit of the retreating marauders. At Crown Point the young men gave out, but Laurence and his Indians continued on as far as Canada and succeeded in overtaking a party of Canadians, who had dropped to the rear of the main body, of whom they killed six and took twelve prisoners.

The accounts given by these prisoners were of the most startling nature. Count de Frontenac, they said, was busily engaged preparing for an invasion of New York. He had already built one hundred and twenty bateau and one hundred birch canoes and intended, in the spring, to pass up Lake Champlain at the head of fifteen hundred regular troops and one thousand allied Indians. Letters were now addressed, by Lieutenant Governor Liesler, to the Governors of the different Provinces, calling earnestly for aid to protect the exposed frontier beyond Albany. The Five Nations were also assembled in council and agreed to furnish eighteen hundred warriors to fight the French.

Nor were the authorities of Albany idle. On the 26th of March they ordered Captain Jacob d' Warm to proceed to Crown Point with seventeen English and twenty Indians, and there watch the movements of the enemy. Four days later Captain Abram Schuyler was sent, with nine men and

*M. de Monseignat's account. In this account it is stated that "some twenty Mohawks were spared, in order to show them that it was the English and not they against whom the grudge was entertained."

a party of Mohawks under Laurence, to take post at Otter Creek, for a similar purpose. Captain Schuyler, while posted at Otter Creek, led a scout of eight Indians as far as Chambly, where he encountered a small party of the French, of whom he killed two and took one prisoner.*

About the 10th of April, one of the parties on Lake Champlain sent in word that they had discovered the track of twelve French and Indians, proceeding in the direction of Albany. Warning of danger was immediately sent throughout the country and the inhabitants were advised to retreat into the neighboring towns for safety. Two families, residing near Schenectady, neglected the advice and were attacked during the night and eleven of their number killed or captured.†

The fear that this success might excite the French to further outrage hastened the preparations of the New York Colonists for the invasion of Canada. On the 1st of May an agreement was concluded between the provinces of Massachusetts, Connecticut and New York by which each was to furnish its quota of troops for the expedition.‡ At the urgent request of New England the command of the expedition was conferred upon John Winthrop.

A naval expedition was also fitted out by the Colonists and sent against Quebec, under command of Sir William Phipps.

The army under Major General Winthrop, numbering eight hundred men, left Albany about the 1st of August and proceeded on its march as far as Wood Creek. There Winthrop waited a few days for the promised reinforcement of Indians, but these not arriving, nor furnishing a supply of canoes to cross the lake, as they had promised to do, he called a council of war, who decided it inexpedient to proceed further. The expedition was therefore abandoned and

**Documentary History of New York.*

†*Id.*

‡New York was to furnish four hundred men; Massachusetts, one hundred and sixty; Connecticut, one hundred and thirty-five, and Plymouth, sixty. Maryland promised one hundred men.

the troops returned to Albany, where they were disbanded.

Attached to Winthrop's army was Captain John Schuyler of Albany; a man of great bravery and energy of character and of considerable experience in border warfare. Schuyler was dissatisfied with the decision of the council of war, which he considered weak and cowardly, and declared the campaign should not be abandoned so easily. Beating up for volunteers he soon gathered around him a little band of twenty nine followers, each as bold and daring as himself. To these he added one hundred and twenty Indians who had arrived at the camp under command of Juriaen, called the ferocious, and having loaded a number of canoes with provisions, proceeded, on the 13th of August, as far as Canaghsonie (probably Whitehall) where he encamped for the night. The next day he again embarked with his party and on the 21st of the month reached a point "one mile below the sand bank of Chamibly."* In the course of the journey one of the Indians died. "He died of sickness," adds the brave Captain, evidently surprised that so quiet a death should be reserved for a Mohawk.

On the 22d the little party, having first secreted their canoes and provisions, started by land for Laprairie, which lay on the south shore of the St. Lawrence River about fifteen miles distant. While Schuyler was slowly approaching Laprairie, the inhabitants of that place were having a gala day in honor of their Governor, the brave old Frontenac, who having learned from his scouts that Winthrop's army had retired, was marching with eight hundred men to Quebec, to repel the threatened attack of Sir William Phipps in that quarter. Little did the quiet husbandmen imagine, as they sat near their doors at evening, chatting over the stirring incidents of the day, repeating to listening ears the

*Schuyler in his journal of this expedition gives the Indian names of several localities on Lake Champlain. On the 16th the party, he tells us, reached *Kanon-don*, and, travelling all night, arrived the next morning at *Ogharo*. The next night they travelled as far as *Ogharonde*, where "they determined, by the majorities, to fall upon Fort Laprairie."

wonders each had seen, and, perhaps, rejoicing at a security which the departure of the troops seemed to confirm, that a band of fierce and determined warriors lay secreted under the very trees which bordered the little settlement, ready with the morrow's sun to bring destruction and death about those rude but happy homes.

Early on the morning of the 23d Schuyler sent forward his spies, who soon returned with information that the inhabitants were leaving the fort to go into the fields to cut corn. It was Schuyler's intention to wait quietly until they reached the fields and then place his party between them and the fort, so as to intercept their retreat, but, through the eagerness of some young savages, the war cry was prematurely raised and both the English and Indians rushed to the attack without waiting for orders. The French, taking alarm, hastily retired to the fort, but not until six of their number were killed and nineteen taken prisoners. As soon as the prisoners were secured the assailants fell upon the cattle feeding around the fort and killed one hundred and fifty head of oxen and cows. They also set fire to all the houses and barns outside the fort, which were speedily consumed. The English wished to attack the fort itself, but did not do so, as the Indians refused to aid them. The forts at Montreal and Chambly now answering the alarm guns fired at Laprairie, Schuyler hastened his departure, lest his retreat might be cut off; but, before leaving, his Indians burned the body of one of their number, who had been killed during the affray.

The party retreated about seven miles, when they halted for dinner. The same evening they reached the river and embarked in their canoes. The next day they went as far as the ruins of old Fort St. Anne and, on the 15th, stopped on the long sand point near Port Kent, where they killed two Elk. The next day's journey took them to a place which Schuyler calls "The Little Stone Fort,"* from which a canoe

*This was probably a slight work thrown up by Capt. d' Warm at Crown Point the March previous, or one erected at Ticonderoga by Capt. Sanders Glen while he was waiting there for the advance of Winthrop's army.

was sent forward with the news. On the 27th the party reached the mouth of Wood Creek, and on the 31st arrived with their prisoners in safety at Albany.*

During the winter of 1690-91 the New York Colonists were too much occupied with their internal disputes to give much attention to military affairs. In the spring however their difficulties ceased, and active measures were at once adopted to carry on the war with Canada. The frontier posts of Albany, Schenectady and Half-Moon were repaired, the Militia reorganized and a conference held with the Five Nations, with whom the French emissaries had begun to tamper. The Indians not only promised to abandon all negotiations with the French, but pledged themselves to make war upon that people so long as they should live. An expedition was now planned against Canada; the Colonists wisely concluding that the only way to secure the co-operation of the savages was to give them active employment.

On the 22d day of June, 1691, Major Philip Schuyler left Albany at the head of one hundred and fifty English and three hundred Indians, and crossing Lake Champlain by the route taken by his brother Capt. John Schuyler, appeared, unexpectedly, before Fort Laprairie, which he carried by surprise, killing several of its defenders. De Callieres, then Governor of Montreal, hastily collected eight hundred troops and crossed the river, when the English retreated to the woods, where they met and destroyed a small detachment sent forward to cut off their retreat. A short time afterwards M. de Valrenes coming up with a large force, a severe and desperate battle was fought between the two parties. Schuyler posted his men behind trees, and, for an hour and a half, withstood the fire and repelled the charges of the Canadian troops. In this engagement the loss of the English was trifling, while not less than two hundred of the French were killed or wounded. Schuyler, fearing to be overpow-

*Journal of Capt. John Schuyler.

ered by superior numbers, now hastily withdrew and returned to Albany.

The favorable result of this expedition gave a new impetus to the warlike temper of the Iroquois and strengthened their friendship for the English. These Indians, for the next two years, so harassed the French that de Frontenac determined again to invade their territory. For this purpose he collected a force of six or seven hundred French and Indians and, about the middle of January, 1693, set out from Montreal, for the Mohawk valley. The march, upon the frozen surface of the lake and through the deep snows of the forest, was attended with great hardships, yet such was the energy of the invaders that early in February they passed Schenectady unobserved, and falling suddenly upon the first Mohawk village, killed many of the inhabitants and took over three hundred prisoners. As soon as the intelligence of this incursion reached Albany, Major Schuyler collected a party of about three hundred men, principally Indians, and started in pursuit of the assailants, who, according to their custom, had retreated immediately after the attack. Schuyler continued the pursuit as far as the Hudson, and would have overtaken the enemy had not a severe storm of snow and wind prevented his crossing the river. As it was he succeeded in recapturing about fifty of the prisoners, with whom he returned to Albany. The sufferings of those engaged in this expedition were so great that the Indians fed upon the dead bodies of the enemy, and the French were compelled to eat their own shoes.*

Although the contest between the French and English continued several years longer, this was the last expedition of any importance which entered the valley of Lake Champlain during this war. The peace of Ryswick, in 1697, was soon followed by a formal treaty between the French and the Five Nations.

CHAPTER III.

Indian Depredations on the Frontier—Forts built by the New York Colonists on Wood Creek—Two Expeditions organized against Canada—Condition of the Country about Lake Champlain—The French build a Fort at Crown Point—French Grants on the Lake—Troubles among the New York Colonists—Attempt to settle the Lands lying between the Hudson River and Lake Champlain.

The history of events connected with Lake Champlain brings us down to the year 1709. During “Queen Anne’s War,” which commenced in 1702, the frontier towns of New England were severely scourged by marauding parties from Canada. Deerfield was destroyed in 1704 by a party of three hundred French and Indians under command of the inhuman de Rouville.* In 1708, a party of four hundred men, including savages, crossed the almost impracticable mountains of Vermont and New Hampshire, and attacked the little fort and village of Haverhill which, after a sharp defence, they carried and reduced to ashes.

These and other repeated and unprovoked aggressions at length aroused the British Ministry who, in 1709, at the earnest solicitation of the Colonists, adopted a plan for the conquest of the French possessions in America. This plan contemplated an attack by water upon Quebec, whilst fifteen hundred men, from New York and the New England Provinces, were to attempt Montreal by the way of Lake Champlain. The inhabitants of New York entered warmly into the scheme. They not only furnished their quota of troops, but several volunteer companies were organized to join the expedition. The Five Nations, through the exertions of Col. Peter Schuyler, were induced to take up the hatchet and to

*This expedition followed the route up Lake Champlain to the Winooski and then ascended that river and crossed the mountains to the Connecticut. On their return they secreted the “bell of St. Regis” in the sands of Burlington, where it remained until the following spring, when it was taken to Canada.

send five hundred warriors into the field. New York also, at her own expense, opened a road from Albany to Lake Champlain, which greatly facilitated the movements of the troops and the transportation of supplies.

This road commenced near the present village of Schuylerville and ran up the east side of the river to Fort Edward, and thence by the way of Wood Creek to the head of Lake Champlain. It ran the whole way through a dense forest. Along the route three forts were erected ; one on Wood Creek near the present village of Fort Ann ; another at the commencement of the carrying place between the Hudson River and the head of Wood Creek, which was at first called Fort Nicholson ; and a third on the summit of one of the hills opposite Schuylerville. These forts were built of timber and were surrounded by palisades so constructed as to protect the garrisons from the fire of musketry. One hundred bateau and a large number of canoes were built at the mouth of Wood Creek for the transportation of the troops across Lake Champlain. All the arrangements for the campaign being complete, the army left Albany under the command of Col. Nicholson and encamped at Fort Ann, where they awaited intelligence of the arrival of the expedition destined for the attack of Quebec.

These demonstrations on the part of the English Colonists created great alarm among the inhabitants of Canada, who were but ill prepared to resist the large force which threatened both extremes of the Colony. A council of war was called by M. de Vaudreuil, under whose advice a force of fifteen hundred men was sent to Lake Champlain to oppose the advance of Nicholson's army ; but a misunderstanding between the Governor General and some of his principal officers embarrassed the enterprise and ultimately caused the army to return.

The two expeditions against Canada proved equally abortive. The fleet destined for the attack of Quebec was sent to Lisbon instead, to support the Portuguese against

the power of Castile, while Nicholson's army, disengaged by delays and almost decimated by a malignant and fatal malady which broke out in the camp,* returned to Albany, where they were soon afterwards disbanded.

In 1711 preparations were again made by the Colonists for the invasion of Canada. Colonel Nicholson, under whom served Colonels Schuyler, Whitney and Ingoldsby, mustered at Albany a strong force comprising two thousand English, one thousand Germans and one thousand Indians, who, on the 28th of August, commenced their march towards Lake Champlain, taking the Lake George route, instead of the unhealthy one by the way of Wood Creek, which had proved so fatal to the troops on the former expedition. At the same time an army of six thousand four hundred men, under Brigadier General Hill, sailed from Boston on board of sixty-eight transports, under convoy of Sir Hovedon Walker, for a simultaneous attack on Quebec.[†]

As soon as M. de Vaudreuil received intelligence of these movements he hastened to Quebec, and, having strengthened its defences, confided to M. de Boucourt the responsible duty of resisting the debarkation of the English troops, while he returned to the rescue of Montreal. But the plans of the invading army were destined to be again defeated. The British Admiral had neglected the warnings of an experienced French navigator, named Paradis, who accompanied him, and approached too near a small island in the narrow and dangerous channel of the Traverse. While embarrassed amid its rocks, a sudden squall scattered the fleet, driving eight of the vessels on the shore, where they were wrecked.[‡] Charlevoix says nearly three thousand men were drowned, whose bodies were afterwards found scattered along the

*This sickness is said to have been caused by the Indians who poisoned the waters of the Creek. But Doctor Fitch in his "Survey of Washington County" questions the truth of this accusation, and presumes the malady to have been a malignant dysentery, brought on by the troops drinking the stagnant water which flowed into the creek from the surrounding marshes.

[†]Gordon. [‡]Warburton, Vol. 1.

banks of the river. After this severe disaster the Admiral bore away for Cape Breton, and the expedition was abandoned. The advance corps of Nicholson's army had scarcely reached the head of Lake George, when intelligence arrived of the failure of the northern expedition. Orders were at once given for their return to Albany.

These two abortive attempts upon Canada cost the Province of New York, alone, over thirty thousand pounds sterling. Their failure disheartened the Colonists and chilled for a time the affections of the Five Nations, who began to look upon the English as a weak and cowardly people. The situation of the New York Colonists was now most critical. Clouds of adversity lowered darkly over the Province. The river Indians became restless and evinced a strong and growing disposition to break their allegiance ; the Five Nations listened favorably to the renewed propositions of peace from the French, who threatened an invasion of the Province by sea and land. Happily these impending evils were averted by the treaty of Utrecht, which was concluded in the spring of 1713. By this treaty the French King released his nominal sovereignty over the Iroquois and recognized their country as subject to the dominion of Great Britain.

As yet no settlements had been permanently established in the valley of Lake Champlain. Fort St. Anne, built in 1665, had been occupied for a few years and then abandoned. The "little Stone Fort" mentioned by Schuyler in 1690, was a structure of no importance except as it served for the immediate protection of those by whom it was erected. Fort Ann, erected by Colonel Nicholson on Wood Creek in 1709, was burned by him on the return of his army to Albany in 1711. Kalm saw the remains of the burnt palisades, when he passed there thirty-eight years afterwards. In 1713 Fort Saratoga was the nearest post to the lake on the south, and Forts Laprairie and Chambly on the north. No settlements were commenced within the present limits of

Vermont until after the erection of Fort Dummer, on the Connecticut river, in 1724.

We have already seen that, from the first settlement of the country, Lake Champlain had been used as a thoroughfare through which predatory excursions were directed against both the French and English frontiers. Its control was therefore a matter of great importance. No movement was however made to obtain the command of this important avenue until the year 1731, when the Marquis de Beauharnois, then Governor General of Canada, erected a fort at Crown Point, which he called St. Frederic, in honor of Frederic Maurepas the, then, French Secretary of State. The English claimed the title to the territory on both sides of the lake, by virtue of their treaties with the Five Nations, and strongly remonstrated against, but took no steps to prevent its unauthorized occupation by the French.

"Fort St. Frederic," says a celebrated traveler, "is built on a rock consisting of black lime slates* and is nearly quadrangular, has high and thick walls, made of the same limestone, of which there is a quarry about half a mile from the fort. On the eastern part of the fort is a high tower, which is proof against bomb shells, provided with very thick and substantial walls, and well stored with cannon from the bottom almost to the very top, and the Governor lives in the Tower. In the terre plaine of the fort is a well built little church and houses of stone for the officers and soldiers. There are sharp rocks on all sides towards the land beyond cannon shot from the fort, but among them are some which are as high as the walls of the fort and very near them. Within one or two musket shots to the east of the fort is a windmill, built of stone, with very thick walls and most of the flour, which is wanted to supply the fort, is ground here. This windmill is so constructed as to serve the purpose of a redoubt and at the top of it are five or six small pieces of

*Chazy Limestone—Emmons.

cannon."* Subsequently a trench or wide ditch was dug around the fort, on the land side, enclosing the hill referred to, above, by Kalm. This trench commenced at the water's edge about two rods north and terminated about fifteen rods south of the fort. Its greatest distance from the fort, in the rear, was thirty rods. An enclosure was also erected about twenty-five rods north-west of the fort which reached the water's edge and surrounded several buildings used for soldier's quarters.†

Soon after the erection of the fort a settlement of considerable size was formed about it, on both sides of the lake, composed, principally, of the families of old soldiers who had been paid off and discharged from service. The houses of some of the settlers were convenient and comfortable, but the majority lived in mere cabins built of boards. To each soldier in service was allotted a small piece of ground near the walls of the fort, which was cultivated as a garden, and occasionally occupied as a summer residence.*

A small village stood about half a mile south-west of the fort, and one half mile further south was a hamlet, containing four houses, surrounded by wheat fields.†

The boats used by the inhabitants were of three kinds ; bark canoes, dugouts or canoes made of a log of wood hollowed out, and bateau. The last mentioned were constructed with flat bottoms of oak and sides of pine, and were used for the transportation of troops or supplies upon the lake. When Kalm visited the fort, in 1749, a yacht or large sail vessel made regular trips between that place and St. Johns in Canada.‡

Until 1759 St. Frederic was the seat of French power on the Lake. Here was a rallying point for the fierce Abenakis from the St. Francis, the Arundacks of the fertile Ottawa and the warlike Wyandots of the west—drawn together by a common love of revenge or the hope of plunder. Here

*Kalm's Travels in 1749. †Journal of the New Hampshire Scout.

‡Kalm says this was the first sail vessel built on the lake.

of lands "two leagues in front and three in depth on Lake Champlain together with the peninsula which is found to be in front of said land."* In the same month another was issued to Sieur de la Periere, "beginning at the mouth of the river Ouynouski (Winooski) one league above and one league below, making two leagues front by three leagues in depth, with the extent of said river which will be found comprehended therein, together with the islands and *battures adjacent.*" Also one, to Sieur Douville, on the 8th of October, 1736, for lands on the east side of the lake, "two leagues front by three leagues deep;"† and another on the 13th of June, 1737, to Sieur Robart, King's Store-keeper at Montreal, "three leagues front by two leagues in depth on the west side of Lake Champlain, taking in going down one league below the river Bouquet and, in going up, two and a half above said river." The island of North Hero or *Isle Longue* was granted to Contrecour, Captain of Infantry, and M. Raimbault received a large concession north and adjoining the lands granted to M. de la Periere.

These grants were issued subject to forfeiture in case the lands were not settled and improved within a certain time. This condition not having been fulfilled, all but the two last mentioned were re-united to the King's domains by an ordinance of the Governor and Intendant of Canada of the 10th of May, 1741. The grantees gave various reasons why their lands had not been settled within the time. Pean could find no farmers to place upon his seigniory, St. Vincent had been absent on the King's service and Contrecour had offered very advantageous inducements to settlers, including a bonus of three hundred livres, but without success. La Fontaine promised to go on to his grant immediately with three men, to build there, and was willing to furnish grain and money to any who should commence a settlement. Sieur Robart had surveyed his lands and had neglected no

*Now parts of Swanton and Highgate, Vt.

†In town of Georgia, Vt.

inducements for young men to settle upon them. These excuses were not satisfactory to the Government Officers. They, however, declared that patents would be re-issued to any who should place settlers on the land within one year from that time. This was not done ; but soon after settlements were formed near the mouth of the Big Chazy river and at Windmill Point,* which were occupied for a short time and then abandoned.

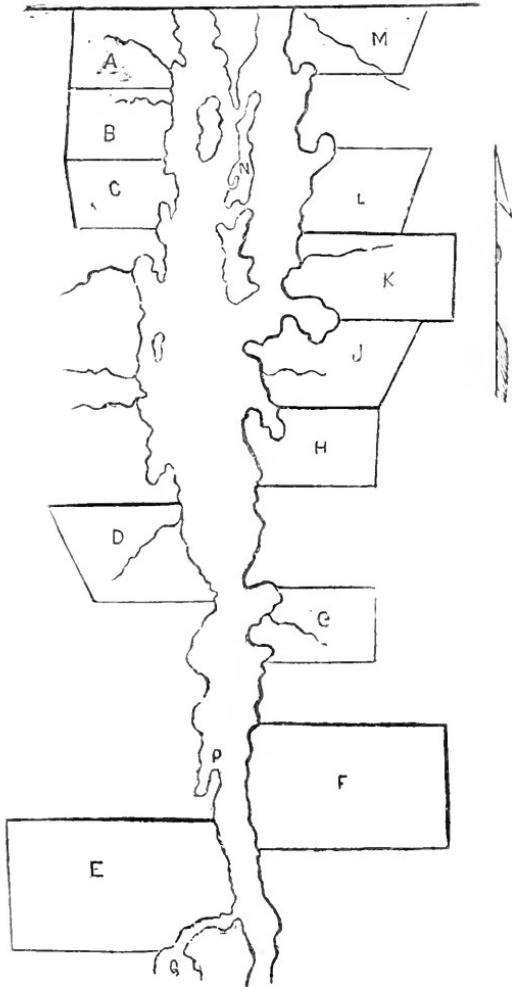

The lands originally granted to Pean were, in 1752, conceded to Sieur Bedon, Councilor in the Superior Council of Quebec, and by him afterwards transferred to M. de Beaujeu, who owned a seigniory adjoining on the north. In April, 1743 and 1745, two patents of concession were issued to Sieur Hocquart, Councilor of State and Intendant of the naval forces at Brest, for a large tract embraced in the present towns of Panton, Addison and Bridport, Vt., which Hocquart conveyed to Michael Chartier de Lotbiniere in 1764, and in November 1758, the Marquis de Vaudreuil, Governor General of Canada, granted to the same de Lotbiniere the seigniory of Alainville embracing over four leagues front by five leagues depth and lying partly on Lake George and partly on Lake Champlain.

The aggregate of these concessions embraced over eight hundred square miles of territory. No permanent settlements were however made under any of the grants, except on parts of the seigniories of Hocquart and Alainville, in the immediate vicinity of Crown Point and Ticonderoga. After the conquest of Canada the grantees petitioned for a confirmation of their titles, but this the British Government refused, at the same time, however, declaring that the claim-

*The first houses I saw after leaving Fort St. Frederic were some on the western side of the lake, about ten French miles from St. Johns, in which the French lived before the last war and which they then abandoned. * * * A Windmill, built of stone, stands on the east side of the lake, on a projecting piece of ground. Some Frenchmen lived near to it. From this mill to Fort St. Johns they reckon eight French miles. at the rate of fifty acres for every three acres improved, provided they took out new grants for the same under the seal of the Province of New York, subject to the usual quit-rents. No new grant to one person was to exceed twenty thousand acres, nor did this privilege extend to the grants of la Ganchetiere and others annulled by the ordinance of the 10th of May, 1741.

The claimants refused the smaller grants from the Province of New York, and declined to pay the required quit-rents. They fell back upon the original title of the French King who, they contended, first discovered the country and had held undisturbed possession of it to the year 1758. To this the authorities of New York replied, that the country south of the St. Lawrence River belonged originally to the Five Nations, from whom it passed to the English by virtue of a treaty made as early as 1683. That the treaty of Utrecht recognized the sovereignty of Great Britain over these nations, and that the possession of the French at Crown Point was an encroachment on British soil, which could confer no title to the French King. They also referred to an ancient grant (1696) to Godfrey Dellius of a large tract along the head of the lake, extending upwards of twenty miles to the north of Crown Point, as proof that the English had claimed the lake to be within their jurisdiction. But the strongest position taken against these claims and which, considering the weakness of the French title, induced the British Government to disaffirm them, was the fact that a large portion of the lands covered by the French grants were then held by old officers and soldiers of the provincial army, under patents issued under the seal of the Province of New York.*

New York was the central point of English influence in America. It held the keys of Canada and of the great western lakes. Within its limits burned the Council Fire of the Six Nations,† the most powerful confederacy ever

*For interesting documents relating to the French Grants on Lake Champlain see Documentary History of New York, Vol. I.

†The Tuscaroras joined the Confederacy in 1712.

formed among the Indians ; whose sway extended west to the Mississippi, and beyond the Ohio on the south. But though strong in position, New York was weak in power. Its history, from the death of Governor Montgomery in 1731, to the close of Mr. Clinton's administration in 1753, is one of almost continued distrust and contention between the Executive and the Assembly. In this war of party the public business of the Province was neglected and the security of the inhabitants disregarded. Occasionally, however, the Government would awake from its lethargy and, for a moment, return to the performance of its legitimate duties. During one of these periods of quiet, a plan was projected for the settlement of the wilderness between Lake Champlain and the Hudson River, to serve as a check upon the French positions on Lake Champlain. The Governor issued a proclamation, describing in glowing language, the beauty and fertility of the country, and offering the most liberal terms to those who might settle there.

Seduced by this proclamation, Captain Laughlin Campbell came from Scotland, in 1737, to examine the land, and was so well satisfied with its appearance that he returned to Isla, sold his estate and brought over, at his own expense, eighty-three protestant families, consisting of four hundred and twenty-three adults and many children. The Governor of New York had promised Campbell a grant of 30,000 acres, free of all charge, except those of survey and the usual quit-rents. But, on his arrival, the mercenary officers of Government refused to fulfill this engagement, unless they were allowed a share in the grant. This Campbell refused to give them. A dispute arising between him and the Government on this account, in which the Assembly joined with the emigrants, the negotiations were broken off. The emigrants were saved from starvation by enlisting in an expedition to Carthagena, while Campbell, broken down in spirits and fortune, sought a home elsewhere.

The Colonists long had cause to regret the folly of

the Government in not securing, at this time, the settlement of their northern frontier. The protestant Highlanders, brought over by Campbell, were a race of hardy and industrious people, induced by nature and habit with great power of endurance. They would have formed a bulwark against the French, who, for twenty years afterwards, retained absolute control of the lake and sent out, from their stronghold at Crown Point, bands of marauders to plunder and devast the frontier settlements.

CHAPTER IV.

Sir William Johnson's Expedition against Crown Point—Battle of Lake George—The French fortify Ticonderoga—Montealm attacks the English at Lake George—Massacre at Fort William Henry—Defeat of Abercrombie at Ticonderoga—English Scouting Parties—Putnam in trouble.

Notwithstanding the repeated depredations of the French upon the northern and western frontier, no attempt was made to weaken their power until 1755. On the 14th of April of that year, the Governors of the different Provinces met in conference in Virginia, and determined upon the plan of a campaign, by which to repel the encroachments of the French from the Ohio to the Gulf of the St. Lawrence. This campaign contemplated three separate expeditions; one under Sir William Johnson against Crown Point,* another under Governor Shirley, of Massachusetts, against Niagara, while Major General Braddock, the Commander-in-Chief, with a third, was to move upon the French Fort on the Ohio.

The expedition against Crown Point was to be composed of provincial troops and Indians. But the six Nations did not enter into the scheme with their usual spirit and alacrity. They were dissatisfied at the long continued inaction of the English, which contrasted unfavorably with the activity and vigilance of the French. Nor had the Indians been backward to express their disapprobation. "You are desirous that we should open our minds and our hearts to you," said the celebrated Mohawk Sachem Hendrick, at one of their

*Sir William Johnson's Commission bears date the 16th of April, 1755, and recites that the troops are placed under his command "to be employed in an attempt to erect a strong Fortress upon an eminence near the French Fort at Crown Point, and for removing the encroachments of the French on His Majesty's land there."

Councils. "Look at the French: they are men, they are fortifying everywhere; but we are ashamed to say it, you are like women. You are bare and open without fortifications."†

This difference in the two countries was caused by the heterogeneal character and genius of the inhabitants. The English Colonists were bold, intelligent and self-dependent. They understood and cherished the principles of self-government. Jealous of freedom, they watched their rulers with eagle eyes, refused to vote supplies unless they knew the money would be appropriated for the public good, and opposed the erection of forts on the frontier, lest their guns might be used to overawe the people. On the other hand, France kept her Colonies in a state of dependence upon the Mother Country. The Canadians were allowed neither freedom of thought nor action. By this means the latter became, as subjects, more faithful but less independent than their neighbors. France directed forts to be built in the wilderness, and her orders were obeyed. England also required forts, but, instead of building them, the Colonists questioned their necessity, objected to the expense and neglected to provide means for their erection.

The words of the Mohawk Sachem were true. When the Governors met at Alexandria, England had no works of defense upon her frontier, while the French were fortified at du Quesne, Niagara, Crown Point and Beau-Sejour. But notwithstanding their avowed reluctance, the Six Nations at length renewed their covenant of friendship, and promised to support the Colonies in the approaching struggle.

A considerable amount of land carriage had, in former times, to be encountered in passing from the Hudson River to Lake Champlain. The portage commenced at the Hudson, near the present village of Fort Edward, from whence two routes diverged; one leading by the way of Fort Ann to the mouth of Wood Creek, a distance of twenty-four miles; the other passing by the way of Glen's Falls to the head of

**Documentary History of New York, Vol. 2.*

Lake George, a distance of fourteen miles. From the first route a third diverged near Fort Ann, which led to the waters of Lake Champlain at the head of South Bay. By the aid of boats on Wood Creek the portage on the first route was usually reduced to from six to ten miles. This portage was called "The Great Carrying Place," and was selected as the point of rendezvous for General Johnson's Army, from whence it was to move to Lake Champlain.

Early in July Major General Phinehas Lyman arrived at the portage with about six hundred New England troops and commenced the erection of a fort, which was afterwards called Fort Edward, in honor of Edward, Duke of York, the grand-son of the English Sovereign. Johnson reached the Camp on the 14th day of August, and found the army increased to two thousand eight hundred and fifty men, fit for duty. New recruits continued to arrive so that the General found himself, by the end of August, at the head of thirty-one hundred provincials and two hundred and fifty Indians.* By the 3d of September the main army had reached the head of Lake George, while a great number of teamsters were engaged in dragging six hundred boats over the portage, to be used for the transportation of troops across that lake. Here Johnson halted for the boats to come up, and to announce the plan of his future operations. "I propose," said he, "to go down this lake with a part of the army, and take post at the end of it, at a pass called Tionderogue, there wait the coming up of the rest of the army and then attack Crown Point."† While the English commander was thus planning his advance upon Fort St. Frederic, the French General had left that post and was hastening towards South Bay.

When General Lyman stopped on the banks of the Hudson to await the arrival of the main army, the whole available French force on Lake Champlain did not exceed

*Johnson to Lt. Gov. De Lancey.

†Johnson to the Board of Trade.

eight hundred men, exclusive of Indians. Early in the summer, however, the Baron Dieskau, a brave old officer, who had distinguished himself under the celebrated Marshal Saxe, arrived at Quebec, accompanied by several veteran regiments from France. These troops were immediately ordered to lake Ontario, but Dieskau, hearing that the English were in motion towards Lake George, changed his route and passed rapidly forward towards Crown Point, where he arrived about the 1st of August. For the defence of this fortress seven hundred regulars, sixteen hundred Canadians and seven hundred Savages were now assembled.*

Dieskau left a strong garrison at Fort St. Frederic, encamped a portion of his army at Ticonderoga, and with six hundred savages, as many Canadians and two hundred regular troops, ascended the lake to the head of South Bay, and after four days march, arrived within four miles of Fort Edward, on the Lake George road. The Indians now refused to proceed further in the direction of the fort, but were willing to go against the open camp of the English at Lake George. The head of the column was therefore turned towards the lake.

As soon as the English Commander learned that the French had left South Bay, he determined, with the advice of a Council of War, to send a strong party to reinforce Fort Edward, then guarded by two hundred and fifty New Hampshire troops and five companies of the New York regiment.† This reinforcement consisted of one thousand Provincial troops, under command of Colonel Ephraim Williams of Massachusetts, the founder of Williams' College, and two hundred Indian warriors led by Hendrick, the Mohawk Sachem. They started from the camp about nine o'clock on the morning of the 8th of September, expecting to find the French at or near Fort Edward. When Dieskau learned, from his scouts, the approach of Williams'

*Bancroft's History of U. S. Vol. 4.

†Johnson to the Governors of the several Colonies.

party, he extended his line on both sides of the road in the form of a half moon, and in this order continued slowly and cautiously to advance. Colonel Williams, in the mean time, pushed forward with rash confidence, and had proceeded about four miles from the lake, when he suddenly found himself in the very centre of the half circle. At that moment the French opened a fire of musketry in front and on both flanks. Thus attacked on all sides by an unseen enemy the provincials offered but a slight resistance. For a short time the slaughter of the English was dreadful. Williams fell dead at the head of his regiment, and the brave and faithful Hendrick was mortally wounded; but the troops were withdrawn with great skill and coolness by Lieutenant Col. Whitney, who succeeded to the command on the death of Williams.

Johnson lay at Lake George without intrenchment or defense of any kind. Aroused by the noise of the firing, he sent Lieutenant Colonel Cole with a reinforcement of two hundred men to the aid of Williams, and hastened to form a sort of breastwork with fallen trees, drawing up a few pieces of cannon which had been left five hundred yards distant from the front.* At ten o'clock the defeated troops began to arrive at the camp in large bodies, and, at half-past eleven, the French appeared in sight, marching in regular order against the centre of the breastwork.

It had been Dieskau's purpose to rush forward and to enter the camp with the fugitives; but the Iroquois (Caughnawagas) took possession of a rising ground and stood inactive. At this the Abenakis halted also; and the Canadians became intimidated.† A few shots from the artillery drove them all to the shelter of the neighboring swamps, and left the French Commander and his handful of veteran troops unsupported. As the regulars advanced against the centre they suddenly halted about one hundred and fifty yards from the breastwork, and then again advanced, firing by

*Review of Military operations in North America.

†Bancroft's History of the U. S., Vol. 4.

platoons. Finding it impossible to break the centre, Dieskau moved to the right and attacked Williams, Ruggles and Titcomb's regiments, where a warm fire was kept up for nearly an hour.

About four o'clock in the afternoon the English suddenly leaped over the slight breastwork and charged upon the assailants, who precipitately retreated, leaving almost all the regular troops dead on the field. The Canadians and Indians retired, in small parties, to the scene of Williams' defeat in the morning, where they were surprised and defeated by a party of one hundred and twenty New Hampshire and ninety New York troops, who, under command of Captain McGinnes, had been sent from Fort Edward to reinforce the army at Lake George. The loss of the English this day was about two hundred and sixteen killed and ninety-six wounded; of the French the loss was much greater.* Dieskau was found, after the retreat, leaning against the stump of a tree, thrice wounded and helpless. Early in the action General Johnson received a painful wound in the thigh and retired to his tent; the command then devolved on General Lyman, who actually fought the battle and was entitled to all the glory of the day. Yet Johnson, by this victory, became a Baronet, and received a gratuity of five thousand pounds, while Lyman is not mentioned in the Official Bulletin.

A rapid movement upon Crown Point would have forced the French to evacuate that post; but Johnson knew not how to profit by success. Instead of following up his victory by a quick and well directed blow, he wasted the rest of the season in building Fort William Henry; a useless pile of wooden barracks, surrounded by an embankment and ditch, which stood on an elevated spot about three hundred yards from the temporary breastwork attacked by Dieskau.

While the army remained at the head of Lake George, in

*Johnson in his official report of this battle estimates the loss of the French at from five to six hundred. Warburton states it as a "little short of eight hundred."

timid inaction, Captain Robert Rodgers and Captain Israel Putnam, two daring and active officers belonging to the New England troops, made repeated demonstrations against the French, cut off many of their working parties and obtained correct information of all their proceedings. Upon one of these occasions Rodgers and his men spent the night in the trench under Fort St Frederic, and at another time, surprised a Frenchman within gun-shot of its walls.*

The season of 1756 passed without any military movement of importance being made, by either party, in the vicinity of Lake Champlain. The English completed the defences of Fort William Henry, and, at one time, contemplated building a fort at the head of South Bay; but this last work was at first delayed and ultimately abandoned. On the other side the French were busily engaged in fortifying the peninsula of Ticonderoga. After the defeat of Dieskau the remnant of his army sought shelter there, where they established a camp and commenced building a fort, afterwards called Fort Carillon. During the season of 1756 over two thousand French were constantly engaged upon the work. The lake now presented a most lively appearance. Canoes, bateau, and schooners were constantly passing and repassing between Canada, Crown Point and Ticonderoga, transporting troops from point to point, or loaded with supplies and ammunition.

Small scouting parties would occasionally leave Fort William Henry and penetrate as far as the French works, to gather information and beat up the outposts. Upon one occasion Capt. Robert Rodgers was sent on a scout with a party of fifty men and five whale boats. Rodgers drew his boats over the mountain into Lake Champlain and, passing Ticonderoga in the night, on the morning of the 7th of July, secreted his party on the east side the lake, about twenty-five miles north of Crown Point. While lying here, Rodgers counted thirty boats passing towards Canada, and, about

*Journal of the New Hampshire Scouts.

three o'clock in the morning, discovered a schooner of thirty-five or forty tons at anchor a short distance below. As he was preparing to attack this vessel, two lighters with twelve men on board approached the shore, into which his party fired, killing three of the Frenchmen and wounding two others. The lighters were taken and found loaded with wheat, flour, rice, brandy and wine. Destroying all but the two last, Rodgers hastened back, his men rowing none the less stoutly, when the prisoners informed them that a party of five hundred men were only two leagues below, on their way to Crown Point.*

The campaign of 1757 opened early and briskly on the northern frontier. While the strong ice yet covered the surface of the lake and the snow lay in heavy drifts along its shores, eleven hundred French and four hundred Canada Indians, under Vaudreuil and the Chevalier Longueuil, marched from Ticonderoga to surprise the garrison of Fort William Henry. During the night of the 16th of March the party lay upon the snow behind Long Point, and, early the next morning, appeared suddenly before the fort, expecting to carry it by surprise ; but Stark—the same who, twenty years later, was ready to make his Molly a widow for the cause of liberty—was there with his rangers, and the assailants were forced back, not however until they had burned several sloops, a large number of bateau, and some store houses which stood beyond reach of the guns of the fort.

Soon after the return of the French, Colonel Parker was sent from Fort William Henry, with a command of four hundred men, to attempt the works at Ticonderoga. The detachment crossed the lake in whale boats and bateau, but, before reaching Ticonderoga, were decoyed in an ambuscade, and the whole party, with the exception of two officers and seventy men, either killed or taken prisoners.

The French still urged forward the defences of Fort Car-

*Rodgers' Journal in 4th Vol. Documentary History of N. Y.

illon. Montcalm, brave, sagacious and active, was at Montreal preparing to carry out his favorite project of reducing Fort William Henry. Everything favored the enterprise. The Indians, including many stern warriors of the Six Nations, gathered in clouds around the little fort of St. Johns on the Richelieu, and there danced their war dances beneath the white banner of France. Six days afterwards they landed, from two hundred canoes, upon the rock-bound shores of Ticonderoga, where they were met by Marin, returning from a foray near Fort Edward; his canoes decorated with the bleeding scalps of forty-two Englishmen. Six thousand French and Canadians, and seventeen hundred Indians were now collected at Ticonderoga, armed to the teeth, and anxious to be led against the enemy. Montcalm needed no persuasion. On the last day of July M. de Levy was sent forward by land, under guidance of the Indians, with twenty-five hundred men, and Montcalm followed the next day, with the main body of the army, in two hundred and fifty boats.

Gen. Webb, a man of weak, irresolute and timid character, was in command of the Provincial troops, and had five thousand men with him at Fort Edward, while a body of one thousand men garrisoned Fort William Henry. It so happened that Webb started for Lake George, with an escort of two hundred men, under command of Major Putnam, at the very time Montcalm was embarking his army at the lower end of the lake. On his arrival at the fort, Putnam was sent to reconnoitre as far as Ticonderoga, and had proceeded part of the way, when he discovered the boats of the French moving slowly up the lake. Returning to the fort, Putnam informed Webb of the approach and strength of the enemy, and urged that the whole army should be brought forward immediately to repel their attack; but to this Webb would not consent. Enjoining secrecy upon Putnam he returned, with dastard haste, to Fort Edward, from whence he sent Colonel Monro, with one thousand men.

to reinforce and take command of the garrison at the lake.

Montealm landed about the time of Colonel Monro's arrival, and immediately laid seige to the fort, at the same time sending proposals for its surrender. "I will defend my trust to the last," was the spirited reply of the brave Monro. The seige lasted six days, in the course of which the French General pushed his advances within musket shot of the fort, while a body of over five thousand Regulars, Canadians and Indians, under de Levy and de la Corne held the road leading to Fort Edward in rear of the English works. Then it was that Monro, finding his provisions and ammunition nearly exhausted, and having received a letter from his pusillanimous Chief declining to send him further assistance, consented to surrender. By the terms of capitulation the English were to march out with their arms and baggage, and were to be escorted by a detachment of French troops as far as Fort Edward; the sick and wounded remaining under Montealm's protection until their recovery, when they were to be allowed to return to their homes.

At the time of the capitulation four hundred and fifty-nine English occupied the fort, while seventeen hundred and fifty were posted in a fortified camp standing on an eminence to the east, now marked by the ruins of Fort George. The troops marched out of the works on the morning of the 10th of August, and had scarcely passed the gates, when they were attacked by a large party of Indians attached to the French army. These savages rushed on with the fury of demons. Men, women and children were murdered in cold blood, and in the most barbarous manner. The massacre continued until the English had proceeded half way to Fort Edward, when the scattered and terrified troops were met by an escort of five hundred men, sent out for their protection. The French officers endeavored in vain to arrest the terrible onslaught. "Kill me," cried Montealm, baring his breast, "but spare the English who are under my protection." The appeal was in vain. The vindictive savages had tasted

blood, and neither prayers, nor menaces nor promises availed while a victim was to be found.*

Immediately after the victory the fort was levelled to the ground ; the cannon and stores were removed to Ticonderoga and the boats and vessels taken to the lower end of the lake. Thus closed the military operations of the year. The French returned to resume their labor upon the walls of Carillon, Webb shrunk back to Albany and the timid deer again drank, undisturbed, of the cool waters of the silver Horicon.

The British Government decided to press the campaign of the succeeding year (1758) with uncommon vigor. Twelve thousand troops were to attempt the reduction of Louisburg on the island of Cape Breton, sixteen thousand were to march against Ticonderoga and Crown Point, and eight thousand were to attack Fort du Quesne. The command of the troops destined for Lake Champlain was entrusted to Major General Abercrombie, who had succeeded the imbecile Loudon to the chief command in America.

On the first of July, six thousand three hundred and sixty-seven Regulars and nine thousand and twenty-four Provincials were collected around the decaying ruins of Fort William Henry. Four days later the whole armament struck their tents, and in nine hundred bateau and one hundred and thirty-five whale boats embarked on the waters of Lake George ; a large number of rafts, armed with artillery and loaded with provisions, accompanied the expedition. That night the proud host rested for five hours on Sabbath Day Point, and, early on the morning of the 6th, reached the landing at the lower end of the lake.

Fort Carillon, against which the English were now advancing, stood near the point of the peninsula formed by the junction of the outlet of Lake George with Lake Champlain. This peninsula contains about five hundred acres,

*Bancroft's History of U. S. Vol. 4. Conquest of Canada, Vol. 2. Williams' Vermont, Vol. 2.

and is surrounded on three sides by water. One half of the western or land side was then covered by a swamp. The fort was nearly one hundred feet above the water, and stood on the south side of the peninsula adjoining the outlet, which here expands into a bay of some size. On the extreme easternmost point of the peninsula, at a short distance from the main work, was a strong redoubt of earth and stones, which commanded the narrow part of the lake. A battery also stood on the bank of the bay, a short distance west of the fort, while the low land to the north was covered by two batteries, standing behind its walls. The road from Lake George to Ticonderoga crossed the river or outlet, twice, by bridges. Near the lower bridge, and less than two miles from the fort, the French had built saw-mills, which were defended by a slight military work. They had also built a log camp near the landing at the foot of Lake George.

To oppose the powerful army now advancing against them, the French had only twenty-eight hundred Regulars and four hundred and fifty Canadians. But Montcalm was not the man to hesitate. The apparent hopelessness of resistance excited him to action. With consummate judgment he marked out his lines, half a mile west of the fort, and pushed the work with such ardor that, in ten hours, a wall as many feet high had been thrown up across the high ground which lay between the swamp and the bank of the outlet. On the 1st of July three regiments, under M. de Bourlémont, occupied the log camp at the foot of the lake, while the battalion of la Barre was posted near the mills. When the English first appeared in sight, Bourlémont fell back upon the mills, leaving Captain de Trepeze, with three hundred men, to watch the approaching column.

Immediately on landing, Abercrombie, leaving his baggage, provisions and artillery in the boats, formed his men into three columns and advanced towards Ticonderoga. The route lay through a thick and tangled wood which prevented any regular progress, and the troops, misled by the bewildered

guides, were soon thrown into confusion. While thus pressing forward in disorder, the head of the advance column, under Lord Howe, fell in with a party of the French troops, who had lost their way likewise, and a warm skirmish ensued. At the first fire the gallant Howe fell and instantly expired. He was the idol of the army and had endeared himself to the men by his affability and virtues. Infuriated by the loss of their beloved leader, his men rushed forward and swept the French from the field. Abercrombie's bugles now sounded the retreat, and the fatigued soldiers returned to the landing place, where they encamped for the night.

Early on the morning of the 7th, Lieutenant Colonel Bradstreet moved forward with a strong party and took possession of the saw-mills, while Abercrombie again formed his men in order of battle, and prepared to advance against the French works. But the attack was not made until the morning of the 8th, when the whole army was brought up, except a small detachment left to guard the boats, and a Provincial regiment stationed at the saw-mills. Montcalm had that morning received a reinforcement of four hundred men, under M. de Levy, which increased his force to about thirty-six hundred. Behind the newly erected lines, which were now strengthened by a wide and difficult abattis, he posted the tried battalions of la Reine, la Sarre, Bearn, Guiene, Berry, Languedoc and Roussillon, and calmly awaited the onset.

As the English approached, the rangers, light Infantry, bateau men and Ruggles', Doley's, Partridge's, Williams' and Bagley's regiments of Provincials, with a battalion of the New York regiment, took post in front, out of cannon-shot of the French works. Next came the Regulars destined for the attack, while the Connecticut and New Jersey troops were drawn up in the rear. At one o'clock the English bugles sounded to attack, when the regular battalions moved forward with quick and steady step—the veteran fifty-fifth leading, closely followed by the gallant Colonel Graham, at

the head of Murray's Highlanders. As the columns approached, and when the ranks became entangled among the logs and fallen trees which protected the breastwork, Montcalm opened a galling fire of artillery and musketry, which mowed down the brave officers and men by hundreds. For four hours the English vainly strove to cut their way through the impenetrable abatis, until Abercrombie, despairing of success, and having already lost nineteen hundred and forty-four men in killed and wounded, ordered a retreat. Montcalm did not pursue, for the English still outnumbered him four fold. Having refreshed his exhausted soldiers, he employed the night in strengthening his lines—a useless labor, for the frightened Abercrombie did not stop until he reached the head of Lake George, and, even then, he sent his artillery and ammunition to Albany for safety.*

Soon after the retreat of the English, Majors Putnam and Rodgers were sent, with their rangers, towards the head of Lake Champlain, to watch the movements of a party of five hundred Canadians and Indians, who, it was understood, intended to pass up the lake from Ticonderoga, under command of the famous Marin. Rodgers, with the main body, took a position near Wood Creek, about twelve miles from its mouth, while Putnam, with thirty-five men, took post on the bold rocky shore of the lake about half a mile north of the Creek. Near the edge of these rocks he constructed a wall of stones, and placed young trees before it in such a manner as completely to hide the defense from the water below. Learning, four days afterwards, that the enemy were approaching, under cover of the night, Putnam called in his sentinels and stationed his men where their fire would prove most effective ; ordering them to remain perfectly quiet until they received his orders. The canoes advanced in solemn silence, and had passed the wall of stone, when they became alarmed by a slight noise, caused by one of

*Abercrombie's Dispatch—Conquest of Canada. Bancroft's History of the United States. Williams' Vermont, &c.

Putnam's men carelessly striking his gun against a stone. Crowding together beneath the rocks, a brief consultation was held by the party, when the canoes were turned back towards Ticonderoga. As they turned, Putnam gave the order to fire. This fire was returned from the lake, and for a short time the contest was warmly kept up on both sides. Great was the carnage among the canoes, which lay exposed upon the smooth surface of the water. Marin at length withdrew and landed his men a short distance below, intending to surround the rangers; but Putnam was upon the alert and immediately withdrew towards Fort Edward. While retreating through the thick forest an unexpected enemy fired upon the party, and wounded one man. Putnam instantly ordered his men to charge, when his voice was recognized by the leader of the other party, who cried out, "Hold, we are friends." "Friends or foes," answered Putnam, "you deserve to perish for doing so little execution with so fair a shot." The party proved to be a detachment sent to cover his retreat.

A few days afterwards, Putnam was taken prisoner by some of the Indians attached to Marin's command. The Indians bound Putnam to a tree. A young savage then amused himself by seeing how near he could throw a tomahawk to his prisoner's head, without touching it—the weapon struck in the tree a number of times, at a hair's breadth from the mark. When the Indian had finished this novel, but, to one of the parties, not very agreeable sport, a Canadian came up, snapped his fusee at Putnam's breast, then violently and repeatedly pushed the muzzle against his ribs, and finally gave him a severe blow on the jaw with the but-end of the gun. Putnam was then stripped of his clothes and taken to the place selected for their night encampment, where the Indians determined to roast him alive. For this purpose they bound him to a tree, piled dried bushes in a circle around him, and then set fire to the pile. At the moment when Putnam began to feel the scorching heat, and

had resigned himself to the keen agonies of certain death, Marin rushed through the crowd, opened a way, by scattering the burning brands, and unbound the victim.*

This humane officer, having reprimanded the savages in severe terms, took Putnam under his own protection and delivered him to Montcalm, by whom he was sent to Montreal. —Thus, through hardships, privations and blood, were the sturdy Provincials schooled for the great and heroic deeds of the American Revolution.

*Thacher's Military Journal.

CHAPTER V.

General Amherst marches against Ticonderoga and Crown Point—Retreat of the French to Canada—Naval operations on Lake Champlain—Progress of the settlement of the country bordering on Lake Champlain, prior to the revolution—New Hampshire Grants—Dispute with tenants of Colonel Reed—A new Province projected by Colonel Skene and others.

Notwithstanding the great importance attached by the Provincial and Home Governments to the control of Lake Champlain—the key of Canada—three campaigns, under three different Generals, had been undertaken without any progress towards the attainment of that object. Johnson was inefficient, Webb pusillanimous and Abercrombie wanting in military skill and firmness. The first halted his army to build a fort when he should have captured one; the second, with four thousand men under his immediate command, abandoned the brave Monro to the tomahawk of the merciless savage; while Abercrombie, though far superior to both, by a false move and “the extremest fright and consternation,” allowed less than four thousand men to repel the advance of fifteen thousand troops, truly said to have been “the largest and best apportioned army in America.” Success, however, had attended the British arms in other quarters. Louisburg capitulated to General Amherst in July, and in November General Forbes was in possession of Fort du Quesne.

Pitt, the then English Secretary of State, had long desired the conquest of Canada, and was determined to leave no efforts untried to accomplish that object. Fully appreciating the skill, bravery and activity of Amherst, he appointed him to the chief command in America. Amherst entered upon his work with zeal. Wolfe was placed in command

of one expedition destined to the attack of Quebec; Pri-deaux was sent with another against Niagara, while the Commander-in-Chief led a third in person, against the French posts on Lake Champlain.

Montcalm was indefatigable in his preparations for the approaching struggle. Three armed vessels were built to command the navigation of Lake Champlain, and the strong walls of Carillon again echoed with the noise of workmen. Still the French General, sorely pressed on every side, feared for the safety of that post. He could spare but few troops for its defence, and besides he well knew that its batteries were commanded by the controlling summit of Mount Defiance. "Had I to besiege Fort Carillon," said he the year before, while wondering at the retreat of Abercrombie, "I would ask but six mortars and two pieces of artillery."* Bourlemaque was sent forward to protect the fort with three battalions of Regulars and a body of Canadians and Indians, but he received instructions, at the same time, if necessary to blow up the works on the approach of the English, to retire to Isle Aux Noix and there make a strong resistance.

On the 21st of June, Amherst reached the head of Lake George with an army of six thousand men, where he remained for a month, waiting for the remainder of the troops to come up. On the 21st he embarked with fifty-seven hundred and forty-three Regulars and five thousand two hundred and seventy-nine Provincials, and crossing the lake in four columns landed, the next day, near the spot where Abercrombie had disembarked the year before. That night his army lay under arms at the saw-mills, while the French held their old lines in force. On the night of the 23d, de Bourlemaque withdrew his men and leaving a party of four hundred in Fort Carillon, to mask his retreat, embarked with the main body for Crown Point. The English Grenadiers immediately occupied the deserted intrenchments.

*Bancroft's History of U. S.

During the 24th and 25th, the French kept up a continuous fire upon the English camp, which was warmly returned. In the mean time, Amherst advanced his approaches within six hundred yards of the fort, and was prepared to assault the works, but the French, having now held their opponents at bay long enough to secure the retreat of de Bourlemaque, prepared to blow up and abandon them. Several mines were constructed under the walls and a fuse connected with the powder magazine. At ten o'clock, on the night of the 26th, they sprung the mine and hastily retreated to their boats.* The explosion scattered the flames in every direction—breastworks, barracks and store-houses were consumed, while the report of the bursting guns, following each other in quick succession, announced to the retreating French the progress of the work of destruction.

Amherst immediately commenced repairing the fort, the stone work of which remained mostly uninjured. He also sent forward Major Rodgers, with two hundred rangers, to examine the position of the French at Crown Point, and to seize, and, at all hazards, hold some strong post near the fort. But this haste was useless, for before the Rangers could reach their post, the French had destroyed the fort, burned the surrounding settlements and retreated to Isle Aux Noix. The glory of St. Frederic was gone :

“Observe it sinks, nor shall it more impart
An hour’s importance to the poor man’s heart.”

On the 4th of August, Amherst reached Crown Point with the main army and immediately traced out the lines of a new fort, about two hundred yards west of the old French works. This fort, although never completed, is said to have cost the English Government over two millions of pounds sterling. The ramparts were about twenty-five feet thick and nearly the same in height and were built of solid masonry. The curtains varied in length, from fifty-two to one

hundred yards, and the whole circuit, measuring around the ramparts and including the bastions, was eight hundred and fifty-three yards. A broad ditch surrounded the work. On the north was a gate, and from the north-east bastion a covered way leading to the water.

While engaged upon this work, Amherst directed Captain Loring, who superintended the naval operations on the lake, to build with the greatest dispatch a sloop of sixteen guns, a radeau or raft eighty-four feet long, capable of carrying six large cannon, and a brigantine. These were completed by the 11th of October, when the English Commander embarked his whole army in bateau and started for Canada. Towards the evening of the next day the wind commenced blowing a gale, and the general was obliged to anchor his bateau under the west shore of the lake. Captain Loring, however, kept at sea with his armed vessels, and at daylight in the morning, discovered the French about forty-five miles down the lake. He immediately gave chase and drove a schooner and three sloops under shelter of Valcour Island. Two of the vessels were here sunk, while the other was run aground by her crew, who escaped into the woods.* The schooner escaped during the night.

Amherst, after remaining wind-bound for several days, again started for Canada, but he had scarcely reached Valcour Island, when the autumn winds threatened to swamp his vessels. Satisfied that he could accomplish nothing at that late and inclement season of the year, he now abandoned the enterprise and returned to winter quarters at Crown Point, where he arrived on the 21st of October.

While Amherst was at Crown Point he opened a road from that place to "No 4" on the Connecticut river, and also planned an expedition against the St. Francis Indians, who lived on the east side of the St. Lawrence, near Three Rivers. The command of this expedition was entrusted to Major

*See Brasier's Map of Lake Champlain, where the north end of Valcour Island is designated as the place where "the French sunk their vessel in 1759."

Rodgers of the New Hampshire troops, who, in October, left Crown Point in bateau, with two hundred men. This number was afterwards, by an accident, reduced to one hundred and forty-two, with whom Rodgers proceeded to Missisco Bay, where he concealed his boats and a portion of his provisions and started by land for the Indian village. The expedition was successful. After reducing the village to ashes, Rodgers and his men returned to Crown Point by the way of the Connecticut River.

In August 1760, Colonel Haviland left Crown Point at the head of fifteen hundred regular troops, eighteen hundred Provincials and some Indians, and on the 16th of that month, encamped opposite the French post at Isle Aux Noix, and by the 24th, opened a fire of mortars upon it. Three days after, M. de Bougainville, the Commandant, withdrew from the Island leaving a garrison of only thirty men, who immediately surrendered.* On the 8th of September, Cononel Haviland joined Amherst and Murray, under the walls of Montreal. That same day the city was surrendered by Vaudreuil. By this act the French dominion in Canada ceased, and by the treaty of peace signed in Paris on the 10th day of February, 1763, that Province was formally ceded to Great Britain. This, says Mr. Smollet,† "was a conquest the most important of any that ever the British army achieved, whether we consider the safety of the British Colonies in America, now secured from invasion and encroachment ; the extent and fertility of the country subdued ; or the whole Indian commerce thus transferred to Great Britain."

When the French army retreated to Canada, it was accompanied by the few inhabitants residing upon the borders of the lake. There was, however, at this time, a settlement of French and Indians at Swanton Falls in Vermont, several miles east of the lake, containing a small church, a saw-mill

*Conquest of Canada. Williams History of Vermont.

†History of England.

and about fifty huts, which was not abandoned by them until the year 1775.*

In the course of the year 1760, the New England troops frequently passed over the road opened by Amherst from the lake to the Connecticut, and thus became acquainted with the fertility and value of the lands in that section. These lands were soon sought out and settled upon.

The lands north of Crown Point, although equally fertile, were more remote and did not as early attract the attention of the pioneer or speculator. They, however, came into notice gradually, so that several permanent settlements were made along the borders of the lake, during the fifteen years which intervened between the expulsion of the French and the commencement of the revolutionary war.

In 1766, Colonel Ephraim Doolittle, Paul Moore, Marshall Newton and others settled in the town of Shoreham, and, in the same year, Donald McIntosh, a native of Scotland, moved into the town of Vergennes. A saw-mill was erected at the lower falls of Otter Creek as early as 1769, and shortly afterwards a grist-mill was built at the same place.

Some years before the commencement of the revolutionary war, two Germans by the name of Logan and Pottier settled upon the points of land, in the town of Shelburne, known as Pottier's Point and Logan's Point. They were engaged in getting out timber for the Canadian market, and are said to have been murdered near the north end of the lake, by a party of soldiers sent out from Montreal to escort them home, on their return with the avails of a raft which they had sold. Soon after their death, about ten families settled in the town, among whom were Thomas and Moses Pierson.

John Strong, Zadock Everest and a Mr. Ward commenced a settlement in the town of Addison, on the opposite side of the lake from Crown Point, in 1769 or 1770. A set-

*Thompson's Gazetteer.

tlement was also commenced in 1770, in the town of Panton, by John Pangborn and Odle Squires, who were afterwards joined by Timothy Spaulding, Peter Ferris and others. Ferris resided at the bay in which Arnold burned his vessels during the revolutionary war.

The town of Bridport was first settled, in 1768, by Philip Stone, of Groton Massachusetts. About the same time, two families by the name of Richardson and Smith moved into the township and commenced a settlement, under New York titles, and were followed by Towner, Chipman and Plumer, who held grants from the Governor of New Hampshire. In 1773, Samuel Smith moved his family into the town and was followed during the following winter by Mr. Victory. A settlement was commenced at the lower falls on the Winooski River by Ira Allen and Remember Baker, in 1773.*

These settlements were all on the eastern border of the lake. A few improvements had also been commenced on the New York side, which were principally confined to the grants made, by the colony of New York, to the officers and soldiers who had served in the wars against the French and Indians. The most important of these, lying north of Crown Point, was at the Bouquet River where William Gilliland had erected a saw-mill, and where several persons, including Gilliland, Watson, Scarr, Cross, Blood and McCawley resided.

William Hay and Henry Cross, lived on a tract of land granted, in 1765, to Lieutenant Friswell. Hay's house stood near the shore of the lake opposite Valcour Island. From this house his family watched the progress of the naval engagement between the American and British fleet, 11th Oct. 1776, and witnessed Arnold's masterly retreat during the following night. Before the Revolution, the few inhabitants residing at the north end of the lake received their supplies from Montreal, which they were in the habit of visiting sev-

*For further information in relation to the first settlement of the towns on the eastern border of the lake, see Thompson's Gazetteer of Vermont.

eral times in the course of the summer months. About the 1st of June, 1775, Mr. Hay went to Montreal to purchase a supply of flour, and was there arrested and thrown into prison by order of General Carleton. He remained in prison several days, but was at length liberated at the solicitation of the merchants of that city. Mr. Hay, on his return, repaired to Crown Point, and gave information to the American Commander as to the strength and plans of the Indians, which was considered of great importance at the time. He also brought the first news of Carleton's efforts to enlist the Caughnawagas on the side of the English. For some reason he was afterwards suspected of holding communication with the English. In July, 1776, while his wife and his children lay sick of the small pox, Hay was arrested and sent to Crown Point, by order of General Sullivan; Cross accompanied him. "These men are suspected of being inimical to us and have it in their power to give intelligence to the enemy," was the reason assigned for their arrest.

As early as 1763, one John la Frombois, a native of Canada, accompanied by two men named Goude and Swarte, visited the shores of the lake and remained a short time in the present town of Chazy, Clinton County. La Frombois returned to Canada in 1768, and obtained permission from Francis McKay to settle on a tract which McKay pretended to claim by virtue of an assignment of the old French grant to la Gauchetiere.* Under this license la Frombois took possession of what are now lots numbers seventy and seventy-two, in Dean's Patent, and built a house on number seventy-two, where he remained until 1776, when he was driven off by the English and his house burned. He returned in 1784, after the war, rebuilt his house and remained in possession of the lot until his death in 1810. Joseph la Monte (now

*See Chap. 3. La Gauchetiere assigned to Estebe, in 1746, who sold to de Pontbriant, Bishop of Quebec, in December, 1757. Pontbriant afterwards conveyed to de Montgolfier, Superior of the Seminary of St. Sulpice, who, in 1768, released to McKay, as one of the heirs at law of the Bishop, de Pontbriant.

Monty) moved on to a lot near la Frombois', in 1774, which he abandoned two years afterwards, and reclaimed after the war. His descendants still reside upon the same land.

After la Frombois' first visit, but before his actual location in 1768, Charles de Fredenburgh, a needy German nobleman, who, in 1766, had received from the English Government a warrant for thirty thousand acres of land, lying on the river Saranac, moved on to the tract and built a house and saw-mill there. De Fredenburgh remained on this tract until about the time of the commencement of the Revolution, when he removed his family to Montreal. He soon after returned to protect his property, and had been back but a short time, when the house and mill were burned down. Fredenburgh disappeared at the same time and was supposed to have been murdered. The saw-mill stood on a fall of the Saranac, two miles above its mouth.

In 1761, Philip K. Skene, an English Major under half pay, who had been with Amherst in 1759, established a large Colony near the mouth of Wood Creek. In the autumn, Skene accompanied an expedition against Havana, and on his return, in 1763, found the settlement reduced to fifteen persons. He immediately set about re-establishing the colony, and, in 1765, obtained patents for twenty-five thousand acres of land lying on and near the Creek. Here he built a stone mansion forty feet by thirty, and two stories and a half in height. In 1770, he built a large stone building one hundred and thirty feet long, which was used for a military garrison and depot. He also built at this place a stone forge of about the same dimensions as his house, where he commenced the manufacture of iron. This was the first forge erected on the borders of the lake. Skene owned a sloop, with which he kept up a constant communication with Canada, and, at his own expense, cut a road through the wilderness as far as Salem, a distance of about thirty miles, from which point it was continued by others to Bennington. This road was used during the season when the navigation

on the lake was closed by ice. In 1773, Skenesborough contained a population of 379.*

The causes which had formerly prevented the occupancy of the fertile lands of the Champlain valley were removed when the whole country came into the possession of the English Government, by the Conquest of Canada in 1760. But other difficulties almost immediately sprang up to retard the growth of this section, originating in the conflicting claims of the English Colonists to the sovereignty of that portion of the valley lying east of the lake. The colony of New York claimed jurisdiction as far east as the Connecticut River, while New Hampshire asserted her right as far west as the shores of the lake and, south of the lake, to a line running parallel to and twenty miles east of the Hudson River. Both Colonies frequently issued grants for the same territory ; causing much confusion in the land titles and creating great animosity between the rival claimants.

Prior to the close of the year 1763, the Governor of New Hampshire had granted charters to different persons for fourteen towns lying along and adjoining the east shore of the lake, and, by similar grants, had asserted the right of that Colony to the whole territory claimed to be within her jurisdiction. On the other side, the colony of New York issued grants of land on the lake to eighty-one or more reduced officers, who had served in the French and Indian wars ; nearly one-half of which were located on the east side of the lake. The Colony had also appropriated a large tract, lying between Otter Creek and Mallet's Bay, for the disbanded soldiers of those wars. A county had also been organized by New York, called Charlotte County, which extended, on the north, from Lake Memphremagog to the St. Regis River, and stretched south, on both sides of the lake, far beyond its

*See a petition to Governor Tryon, praying that Skenesborough might be made the Shiretown of Charlotte County. The petition is signed by thirty-eight "inhabitants of Crown Point district and Ticonderoga." These thirty-eight probably, included all the settlers in the vicinity of those posts, on both sides of the lake.—*Documentary History of New York, Vol. 4.*

southern extremity; the county seat was fixed at Skenesboro'.

The efforts of New York to extend its jurisdiction to the east was met, from the first, by a most decided opposition on the part of the people. Conventions were called to devise means to protect the New Hampshire claimants in their rights, committees of safety were organized and the law officers and land surveyors of New York were driven by force from the disputed territory. These disputes were generally confined to the southern part of Vermont. Occasionally, however, they extended as far north as the grants upon the lakes.

In 1761, the Governor of New Hampshire granted a tract of land, lying around the lower falls of Otter Creek, (Vergennes,) to several persons, who moved there and, as early as 1769, had erected a saw-mill at the falls. Soon after the erection of the mill, Lieutenant Colonel John Reed, who had formerly commanded the forty-second Royal Highland Regiment, and who held a claim to the same land under the colony of New York, forcibly drove off the New Hampshire settlers and put about fifteen families, his own tenants, in possession. These last extended the settlements and had erected several log houses and a grist-mill, when they were in turn ordered off by a party of "Green Mountain Boys," who burned the houses, destroyed the grist mill and put the New Hampshire claimants again in possession.

In June, 1773, Colonel Reed persuaded a number of Scotch emigrants who had lately arrived at New York, including John Cameron, James Henderson, Donald McIntosh, John Bardans and Angus McBean, to accompany him to Otter Creek for the purpose of retaking possession of these lands. On their arrival they found Joshua Hyde and several other persons in possession, with whom Reed entered into an arrangement by which Hyde and his associates were to give up quiet possession of the lands and to allow Reed's tenants to retain the same, until the dispute as to title should be decided by the English Government. Colonel Reed paid

£61, 16s. for the crops and improvements, repaired the grist mill and also purchased a quantity of provisions and some cows for the use of his tenants. He then left them and returned to New York.

This arrangement, although made with the consent of the New Hampshire claimants, was disapproved by the committee of safety, who sent Ethan Allen, Seth Warner and Remember Baker, with a party of about one hundred "Green Mountain Boys" to Otter Creek for the purpose of driving off the Scotch occupants. On the 11th of August, Allen's party, attended by Hyde—the same person who two months before had sold his claim to Colonel Reed—arrived at the settlements, drove the Scotch from their dwellings, burned the hay and corn and five houses, and then tore down the grist-mill, breaking the mill-stones in pieces and throwing them over the bank into the Creek. Cameron and his companions remained at Otter Creek about two weeks longer and then returned to New York. After their departure a small block house was erected at the falls, which was garrisoned and afterwards used as a protection to the New Hampshire claimants. Another block house was soon after built near the falls of the Winooski River.

During the controversy between the settlers under the New Hampshire grants and the colony of New York, a project was started by Major Skene and others to form that part of New York, lying east of the Hudson River, into a new Province. To effect this object Skene visited England, and in March, 1775, wrote back that he had been appointed Governor of Crown Point and Ticonderoga, and should soon call on the people for an address to show their loyalty to the King. During the absence of Skene the troubles on the grants had increased to an alarming extent, and it is extremely doubtful what would have been the result of the contest, had not the commencement of the American Revolution turned the attention of all parties to the common cause of the Country.

CHAPTER VI.

War of the Revolution—Surprise of Ticonderoga—Arnold at St. Johns—Sentiments of the Canadians—Invasion of Canada—Seige of St. Johns—Death of General Montgomery at Quebec—Retreat of the “Army of Canada.”

“We conjure you by all that is dear, by all that is sacred, that you give all assistance possible in forming an army for our defence,” was the appeal of Massachusetts, while the first blood of the Revolution yet moistened the field of Lexington. Every section of the country responded to the call. Liberty poles were raised throughout Massachusetts and the adjoining Provinces, and everywhere the militia took up arms and hastened to the scene of action.

“Putnam was at work in the field when the news came that blood had been shed ; he immediately dropped his implements, and started for Cambridge, without waiting to change his apparel. Stark was sawing logs, without his coat ; he shut down the gate of his mill, and commenced the journey to Boston in his shirt sleeves.” The same spirit was displayed throughout the country. Occasionally, however, a few persons were found who were inimical to the common cause. These were called *Tories*, and were often subjected to the most rigorous discipline. “When a disaffected tory renders himself odious,” says Doctor Thacher, “he is seized by a company of armed men, and conducted to the liberty pole, under which he is compelled to sign a recantation, and give bonds for his future good conduct.”

Upon one occasion a divine of Long Island pronounced, from his pulpit, a severe philippic against the Patriots, stigmatizing them as rebels, robbers and assassins. Information

of the high tory character of the discourse was carried to Captain Nathaniel Platt, a most zealous Patriot, who commanded a company of Long Island Militia. Capt. Platt immediately called out his men, seized the minister and carried him to the liberty pole, around which the company were formed. The minister was there severely reprimanded, and forced to walk up and kiss the pole as a punishment for his political heresy. On the next Sabbath Captain Platt was at the church, to see what effect his "discipline" had produced upon the man of God. For a long time the discourse was unexceptionable, but, while the minister was portraying the enjoyments of heaven to the true christian, he gave expression to his feelings by turning towards the Captain and exclaiming, "there are no rebels in heaven, my brethren.—No ! and you will find no Nathaniel Platts there, nor any accursed liberty poles to kiss."

The great body of the clergy, however, were firm and zealous Patriots, who daily offered the most fervent prayers in behalf of their bleeding and afflicted country. Upon one occasion, a zealous divine, who had been compelled to abandon his congregation in Boston, used the following emphatic language. "Oh ! Lord, if our enemies will fight us, let them have fighting enough. If more soldiers are on their way hither, sink them, O Lord, to the bottom of the sea." "Amen," responded his congregation, "Yea, Lord, let them have fighting enough."

Among the men brought out by the Revolution to meet the exigencies of the times, were Ethan Allen and Benedict Arnold. Arnold, a native of Connecticut, was induced with qualities which characterized him, at once, as the best of warriors and the meanest of men. In battle he was "the bravest among the brave." No enterprise was too daring for him to undertake, no obstacle too great for him to surmount. Whether among the unexplored forests of Maine, upon the decks of a little vessel on Lake Champlain, before the muskets of a platoon at Danbury or under the fire of

Burgoyne's veterans at Benis' Heights, he was firm, daring and unterrified. But, in every other respect, the man was despicable. In early life he had been, by turns, a half-bred apothecary, a retailer, a skipper and a jockey, and had marked his course by hypocrisy, falsehood and crime. To escape the grasp of his creditors, he committed perjury, and to relieve himself of pecuniary embarrassments, occasioned by a life of extravagance and profligacy, he practised every dirty act of peculation, and, ultimately, aimed a traitor's dagger at the bosom of his country.

Ethan Allen was also a native of Connecticut and possessed all the impetuous daring of Arnold, but without his vices. Associated in early life with the pioneers of Vermont, he soon became one of the leading men in that quarter, and by his bold unyielding spirit, repelled the repeated attempts of New York to extend her jurisdiction over the New Hampshire Grants. As a political writer he was clear and forcible, but uncultivated; as a leader, bold and decided, but often rash; as a man, frank, generous and unassuming.

Such were the two men who, on the 7th of May, 1775, met at Castleton to lead an expedition to the surprise of Ticonderoga. Allen, furnished with funds by Dean, Wooster and Parsons, in behalf of the Assembly of Connecticut, had collected a band of two hundred and seventy men, all but forty-six of whom were his own well tried and faithful Green Mountain Boys, led by Brown and the cool and cautious Warner. Arnold came attended by a single servant, but bringing with him a Colonel's commission from the Committee of Safety of Massachusetts, authorizing him to raise a regiment of four hundred men. As soon as the two leaders met, Arnold pompously drew forth his commission and claimed the right to lead the expedition; but Allen refused to yield the command. The dispute was at length referred to a committee of officers, by whom it was decided that Allen should retain the command, while Arnold was to act as his assistant. The main body now left Castleton to proceed

by land to a point opposite Ticonderoga. At the same time Captain Herrick was sent against Skenesborough, with thirty men, with orders to seize the small fort at that place, to take the vessels collected there and meet Allen and transport his party across the lake.

The forts at Ticonderoga and Crown Point had been abandoned soon after the Conquest of Canada, and were now in a ruinous condition. Within the year a garrison had been sent there, at the request of the Governor of New York, to protect the public property, and to secure that section from the threatened encroachments of the New Hampshire Claimants. The garrison was, however, small and weak; Crown Point being held by a Sergeant and twelve men, while a company of only forty-eight men, under command of Captain de la Place, was stationed at Ticonderoga.

Early on the evening of the 9th of May, Allen's party reached the shore of the lake opposite Ticonderoga. Herrick not having yet arrived from Skenesborough, it became necessary to procure a supply of boats in the neighborhood, in order to cross to the fort. This was a work of no small difficulty. Douglass, one of the party, was sent to Bridport for a scow. A large oar boat belonging to Major Skene, which lay at anchor near by, was decoyed ashore and seized by James Wilcox and Joseph Tyler, while several smaller boats were procured from other quarters.

As these boats were not sufficient to ferry the whole party at once, it was arranged that Allen and Arnold should first cross with eighty-three men, and that the boats should return for the rest of the party, who were to remain behind under command of Warner. The little band, guided by Nathan Beman, a lad of fifteen years, was soon drawn up on the low ground below the fort, where an altercation again commenced between the two leaders; each claiming the right to lead the advance. Again the subordinate officers interfered, and decided that they should go in together —Allen on the right hand, and Arnold on the left. As the

day began to break, it was deemed prudent to make the attack without waiting for the arrival of Warner, who had not yet crossed the lake with his party.

Allen now advanced to the front, and addressed his men, as follows ; "Friends and fellow Soldiers—You have, for a number of years past, been a scourge and terror to arbitrary power. Your valor has been famed abroad and acknowledged, as appears by the advice and orders to me, from the General Assembly of Connecticut, to surprise and take the garrison now before us. I now propose to advance before you and in person conduct you through the wicket gate ; for we must this morning either quit our pretensions to valor, or possess ourselves of this fortress in a few minutes ; and inasmuch as it is a desperate attempt, which none but the bravest of men dare undertake, I do not urge it on any contrary to his will. You that will undertake voluntarily, *poise your firelocks.*" "Each man," says Allen, "poised his firelock. I ordered them to face to the right, and, at the head of the centre file, marched them immediately to the wicket gate."*

When they approached, the sentinel snapped his gun, and immediately retreated through the covered way, closely followed by the assailants, who were thus guided within the fort. As the Patriots rushed into the parade ground, they formed in the centre, facing the barracks, and gave a loud cheer, while Allen ascended a flight of steps leading to the commandant's quarters, and, in a loud voice, ordered him to appear or the whole garrison would be sacrificed. Captain la Place, who with the others had been aroused by the shouts of the assailants, hurried to the door, and enquired by what authority the demand was made. "I demand it in the name of the Great Jehovah, and the Continental Congress," was the reply of Allen. La Place knew nothing of the Continental Congress, which in fact had not yet been organized, but he saw Allen's sword over his head, and the gleaming bayonets of the men below, and wisely concluded to comply,

*Allen's Narrative.

without being too inquisitive as to the nature of the power under which his opponent assumed to act.

In this affair, the Patriots captured forty-eight men, one hundred and twenty pieces of cannon, several swivels and howitzers, together with a large number of small arms and ammunition of every description, and also a warehouse filled with materials for boat building. Colonel Warner arrived, with the remainder of the party, just after the surrender of the fort, and was immediately sent, with one hundred men, to take possession of Crown Point ; but a strong head-wind drove his boats back, and he returned to Ticonderoga. The next morning a more successful attempt was made, and the fort at Crown Point was captured without bloodshed. Warner was there met by Captain Remember Baker, who had left the small fort on the Winooski to join Allen's party, and who, on his way up the lake, had intercepted two boats, which had been sent from Crown Point to carry intelligence of the reduction of Ticonderoga to St. Johns and Montreal.

It will be remembered that when the Patriots left Castleton Captain Herrick was sent, with thirty men, against Skenesborough. Herrick approached the place unobserved, and captured young Major Skene, twelve negroes and about fifty dependents or tenants, without firing a gun. He also took a large schooner and several small boats belonging to Skene, in which he embarked his men and prisoners, and, passing down the lake, joined Allen at Ticonderoga. The history of the surprise of Skenesborough is embellished by an account of a singular discovery made there by the Patriots. It is said that some of Herrick's men, while searching Skene's house, found the dead body of a female deposited in the cellar, where it had been preserved for many years. This was the body of Mrs. Skene, the deceased wife of the elder Skene who was then in Europe, and who was in the receipt of an annuity, which had been devised to his wife "while she remained above ground." Like a good Patriot, Herrick crippled the resources of the enemy, by burying the body in the garden at the rear of the house.

In order to accomplish their plans, and to obtain absolute control of the lake, it was now only necessary that Allen and Arnold should get possession of an armed sloop, of about seventy tons, which lay at anchor in the Richelieu River, near the fort of St. Johns. After consultation and a dispute between the two officers, who were mutually jealous of each other, it was agreed that Arnold should fit out and arm the schooner which Herrick had captured at Skenesborough, and sail for St. Johns, accompanied by Allen, who was to take command of several long-boats which lay at Crown Point.

The schooner having been brought to Crown Point, Arnold embarked on the evening of the 14th of May, with fifty men under Captains Brown and Oswald, and on the 17th, arrived within thirty miles of St. Johns, where his vessel was becalmed. Leaving the schooner, he manned two small boats with thirty-five men, and started to row down the river. At six o'clock the next morning he arrived at St. Johns, and surprised a Sergeant and twelve men who garrisoned the fort. He also seized the sloop, in which he found seven men and two brass six pounders. From the prisoners he learned that the commanding officer of the fort was hourly expected to return from Montreal, with a large detachment of troops for Ticonderoga, and a number of guns and carriages for the sloop. A company of forty men was also momentarily expected from Chambly.

Arnold had at first intended to await the arrival of Allen, who had been left far behind by the schooner, while crossing the lake, but this information caused him to hasten his departure. Having destroyed three row-boats, he immediately set out on his return, taking with him the sloop, four boats loaded with stores and twenty prisoners. The party had proceeded about fifteen miles when they met Allen, with one hundred men, hastening down the river. Arnold informed Allen of the expected arrival of troops at St. Johns, and urged him to return. But this Allen refused to do, declaring that he

should push on to St. Johns, and hold possession of it with the men under his command.*

When Allen reached St. Johns, he found the English troops were within two miles of the fort. He therefore crossed to the opposite side of the river, where he encamped for the night. Early the next morning the English commenced a fire upon the party, with six field pieces and two hundred small arms. Allen returned this fire for a short time, but finding he could make no resistance against the superior numbers opposed to him, he hastily re-embarked, leaving three of his men behind.†

As soon as Arnold reached Crown Point, on his return, he fitted up the sloop with six cannon and ten swivels, fixed four guns and six swivels on the schooner, and prepared to resist any attack which might be made against that place from Canada. At the same time he wrote to the Committees of Safety of Massachusetts and New York, urging them to send forward a large body of men to rebuild the fort at Ticonderoga.

The fortunate issue of the movement against the British possessions on Lake Champlain was of the utmost importance to the cause of the country, as it created a confidence among the people in the ultimate success of the struggle, and at the same time, placed the colonists in possession of the Key to Canada, effectually preventing any sudden attack from that quarter.

The feelings of the Canadians, in regard to the approaching struggle, were not known, nor could it yet be determined which side of the question they would take. Sir Guy Carleton, Governor of Canada, used every exertion to enlist them on the side of the Government, while the American Congress, on its part, endeavored to conciliate their friendship and induce them to make common cause with the colonists, or, at least, to stand neutral during the approaching

*Arnold to Committee of Safety of Massachusetts.

†Arnold to General Assembly of Massachusetts.

struggle. The efforts of Congress were so far successful as to secure their neutrality.

Disappointed in not receiving the co-operation of the Canadians, Gen. Carleton next attempted to rally the royalists, and for that purpose, organized a corps to which he gave the name of the "Royal Highland Emigrants." He also entered into negotiations with the Indians. Towards the last of July Colonel Guy Johnson, Superintendent of Indian affairs, arrived at Montreal, accompanied by a number of the Chiefs and warriors of the Six Nations. Here a solemn council was held, and the assembled Indians swore, in the presence of the Governor, to support the cause of the King against the Colonists. A great number, however, who had not attended the council, declared they would not intermeddle in the dispute, nor would they consent to aid or oppose either party.

The American Congress was informed of these attempts, on the part of General Carleton, to enlist the Canadians and Indians on the side of the King. It was also advised that the Canadians had refused to enter into the contest; but there was no assurance that they would long preserve their neutrality. Carleton had obtained great influence over this class, and might ultimately succeed in drawing them over to his side. To prevent this, and in the hopes that the *habitans* might be persuaded to embrace the opportunity to attempt the vindication of their political rights, Congress determined to fit out an expedition for the invasion of Canada. For this purpose of three thousand New York and New England troops were ordered to assemble at Crown Point and Ticonderoga, under the command of Major General Schuyler and Brigadier General Montgomery; while an expedition was organized to march against Quebec, by the way of the Kennebec River.

A large number of flat bottomed boats were built at Skenesborough, Ticonderoga and Crown Point, for the transportation of the army across the lake, and Congress, by

great exertions, raised the sum of fifty thousand dollars, in specie, for the support of the army while in Canada. The arrangements for the expedition were conducted by General Montgomery, while General Schuyler remained at Albany, to close negotiations for a treaty of peace with the Mohawk Indians, over whom he had great influence.

General Carleton, in the mean time, was actively engaged in preparations to oppose the advance of the American army. He placed the works at St. Johns in good repair, and directed a large vessel to be constructed there, which he intended to station near the north or lower end of the lake.

The American Generals deemed it important, by an immediate movement, to prevent Carleton from getting possession of the passage down the Richelieu River. Montgomery, therefore, on the 4th of September, embarked what men he had collected at Crown Point, and sailed for Canada, leaving orders for the rest to follow, as soon as they should arrive. Schuyler left Albany in great haste, and following rapidly, joined Montgomery near Isle la Motte. From that place the two Generals moved to Isle Aux Noix, where they issued an address to the Canadians, assuring them that the Army was not designed to act against their country, but was directed only against the British garrisons and troops; and exhorting them to join the Americans in order to assert and defend their liberties. Copies of this address were distributed by Colonel Allen and Major Brown, who were sent among the people of the adjacent country for that purpose.

The Army, although not over one thousand strong, now moved forward, and soon afterwards landed about one and a half miles above the Fort of St. Johns. At this point the ground was marshy and covered with thick woods, through which the men had to pass, in order to reach the fort. While advancing to reconnoitre the works, the left wing was attacked by a party of Indians, who killed three and wounded eight of the Americans. The Indians were, however, re-

pulsed with some loss. Schuyler then advanced to within sight of the fort, where he commenced a breastwork, but finding the fort strongly fortified and garrisoned, and learning that the armed sloop was preparing to sail from St. Johns towards his boats, which had been left with only a slight guard, he determined to retire to the Isle Aux Noix, and there await the arrival of the artillery and the rest of the troops, who were daily expected. Schuyler fortified Isle Aux Noix, and to prevent the passage of the sloop into the lake, constructed a *Cheraux-de-frise* across the channel of the river, which is very narrow at this point. As soon as these arrangements were completed, he returned to Albany to conclude his treaty with the Indians, where he was attacked with a severe illness which disabled him from duty. The conduct of the Canada expedition then devolved upon General Montgomery, who retained the sole command until he fell under the walls of Quebec.

A small detachment of recruits, with a few pieces of artillery, having arrived at Isle Aux Noix, Montgomery determined again to push forward and undertake the seige of St. Johns. This fort was garrisoned by five or six hundred regulars and two hundred Canadians, under Major Preston, and was well supplied with stores, ammunition and artillery. The American Army, on the contrary, was undisciplined and disorderly, the artillery was too light, the mortars were defective, the ammunition scarce and the artillerists unpractised in their duties. Still these difficulties did not abate the ardor or zeal of the commanding officer.

On the 18th of September, Montgomery led a party of five hundred men to the north of the fort, where he met a detachment from the garrison, with which he had a slight skirmish. Proceeding a little further north, he formed an intrenched camp at the junction of the roads leading from Montreal and Chambly, and then hastened back to bring up his artillery. A few days afterwards the camp was moved to higher ground, north-west of the fort, where a breast-work was thrown up.

Although the Americans had now encompassed the fort, they could do but little towards a regular seige for the want of ammunition and heavy guns to breach the works ; but fortune soon opened a way through which to remedy this deficiency. A little below St. Johns, and upon the same river, is Fort Chambly, which then contained several pieces of cannon, one hundred and twenty-four barrels of gunpowder and a large quantity of military stores and provisions.—The fort was garrisoned by six officers and eighty-three privates. On the 18th of October, a strong detachment of Americans and Canadians—many of the latter having, by this time, joined the army—were placed under command of Majors Livingston and Brown, and ordered to attack the fort. The detachment passed down the river in boats during a dark night, and surprised the fort, which made but a feeble resistance. The stores and ammunition were sent to Montgomery, who, now supplied with the necessary munitions, pressed the seige of St. Johns with vigor. A strong battery of four guns and six mortars was erected within two hundred and fifty yards of the fort, and a block-house was built on the opposite side of the river, mounting one gun and two mortars.

While Montgomery was thus employed at St. Johns, detachments of his army were scouring the country between the Richelieu and the St. Lawrence. One of these detachments, numbering about eighty men, under command of Colonel Ethan Allen, passed through all the parishes east of the Richelieu, as far as its mouth. From this point, Allen moved up the east bank of the St. Lawrence to Longueuil, where he crossed the river, and, on the morning of the 25th of September, appeared unexpectedly before the city of Montreal. He was there met by General Carleton, and, with his whole party, taken prisoner. A few days later, Carleton left Montreal with one thousand regulars, Canadians and Indians, for the purpose of raising the seige of Fort St. Johns. He embarked upon the St. Lawrence and

attempted to land at Longueuil, but was driven back by Colonel Seth Warner, who, with three hundred "Green Mountain Boys," lay secreted on the east bank of the river.

When Montgomery heard of Colonel Warner's success, he sent a flag to Major Preston informing him of Carleton's repulse, and demanding the immediate surrender of the fort. Preston asked for a delay of four days, which was denied, and the demand renewed. The next morning (Nov. 3d,) the whole garrison surrendered as prisoners of war. Among the spoils found in the fort were seventeen pieces of brass ordnance, two howitzers, seven mortars, twenty-two iron cannon and eight hundred stand of arms, with a quantity of shot and small shells. The prisoners were treated with great kindness, and were conveyed by the way of Ticonderoga, into the interior of New England for safe keeping.

Montgomery received great praise for the energy and perseverance with which he had, for six weeks, urged the siege against obstacles of the most difficult and embarrassing character. Not only did he lack proper implements and munitions of war, but his army was composed of young and raw troops, unused to the privations of the field, or to military restraint. Indeed his camp at times resembled a great political assembly. Prompt and implicit obedience to orders was unknown. Each man claimed a right to canvass, debate and decide upon all the plans and movements of the campaign. This insubordination extended through all the grades of the army. The Colonels would dispute with the General, to be themselves opposed by their Captains; and when these last were convinced, the whole subject must again be debated with the rank and file, who claimed an equal right of judging for themselves whether the proposed plan was expedient. It required the kind temper, patriotic zeal and winning eloquence of Montgomery to restrain such turbulent and disaffected spirits from acts of open mutiny.

After the capitulation of Fort St. Johns, Montgomery

marched against Montreal, and entered that city on the 13th of November. He then moved down the St. Lawrence, and on the 1st of December arrived at Point Aux Trembles, about twenty miles above Quebec, where he found Colonel Benedict Arnold, who had crossed to the St. Lawrence, through the thick forest and the almost impassable mountains of Maine. On the 5th, the united forces, even yet less in number than the British, arrived within sight of the walls of Quebec, and at two o'clock on the morning of the 31st, advanced to the assault of the city.

Captains Brown and Livingston, with ninety-four men, were directed to lead a feint against the upper town, while Montgomery was to advance by the way of Cape Diamond, and Arnold through St. Roche, to assault the lower town, on opposite sides. The morning was cold and stormy; the snow fell fast, and was piled in heavy drifts by a furious north-west wind. Cautiously Montgomery led his men in the dark from the plains of Abraham to Wolfe's Cove, and along the margin of the river to a point under Cape Diamond, where the British had erected a strong stockade extending from the precipice to the brink of the river. On the approach of the Americans, the men posted behind the stockade retreated to a block-house, which stood a short distance to the north, and which was pierced with loop-holes for musketry and cannon. In the second story of the block-house were some cannon charged with grape and canister shot, and so pointed as to sweep the narrow cartway above.

As the assailants advanced, and when they were within forty paces of the block-house, a single gun loaded with grape was discharged, which killed Montgomery, his two aids, Captains McPherson and Cheeseman, and every man in front except Captain Aaron Burr and a French guide. The brave and gallant Montgomery fell into Burr's arms and expired. The rest of the party, appalled at the fearful havoc and the death of their General, retired in confusion.

The attack upon the opposite side of the town was equally

unsuccessful. The detachment passed through St. Roche towards a two gun battery, which was captured by Morgan's riflemen, after an hour's severe struggle. At the commencement of the attack Arnold received a severe wound in the leg, and was carried helpless from the field. Morgan continued the fight, until one half of his men were killed, and the rest were benumbed and helpless from cold, when he surrendered.

Montgomery was endeared to the army and to his country, by the possession of every noble virtue. With intrepid bravery he led his little band of half clothed and undisciplined men under the walls of Quebec, and fell upon a soil already hallowed by the blood of a Wolfe and a Montcalm. His death was a great public calamity. America acknowledged his worth and paid public honors to his memory, while the eloquence of England's purest statesmen proclaimed his praise upon the floor of the British Parliament. "Happy would it have been for Arnold," exclaims a celebrated American,* "if instead of being wounded, he too had died, since by his subsequent treason at West Point, he blasted forever the glory of his gallant conduct on that occasion."

After the death of Montgomery, the remains of the little army retired to a point about three miles up the river, where they remained during the winter. On the 1st of May, General Thomas arrived and took command of the troops, which, by reinforcements from time to time, now numbered about nineteen hundred men. The army was soon afterwards increased to three thousand, but the small pox breaking out in the ranks, with great severity, not over nine hundred were fit for duty. General Thomas in a few days retired as far as the mouth of the Richelieu, where he was taken down with the small pox. He was removed to Chambly, and died there on the 2d of June. About the time of Thomas' death, General Sullivan arrived in Canada with a rein-

*Colonel Trumbull.

forcement of several battalions, and assumed the chief command.

Early in the spring of 1776, the British force in Canada was augmented by the arrival from England of thirteen thousand men, a large portion of whom were sent into camp at Three Rivers. Against this place an unsuccessful attack was made, in which General Thompson and two hundred men were taken prisoners. Other reverses followed, until General Sullivan, finding his numbers greatly diminished by sickness, desertion and death, determined to evacuate Canada. He therefore, on the 14th of June, abandoned his position at the mouth of the Richelieu and leisurely moved up its banks towards St. Johns. Arnold, who had been promoted to the rank of Brigadier General, and who then commanded at Montreal, withdrew from that city on the 15th, and marching across the country, joined Sullivan's division at Chambly.

The American General conducted the retreat in good order, and saved all the baggage, artillery and military stores, which were dragged up the rapids of the Richelieu in boats. The army reached St. Johns towards the last of June. The sick were immediately sent to Isle Aux Noix, Point Au Fer and Isle La Motte, when the boats returned and took the remainder of the troops to Isle Aux Noix.—Here the men fit for duty remained for eight days, waiting for the boats to take the sick to Crown Point and to return. It is difficult to conceive a degree of misery greater than that suffered by the invalids during their voyage through the lake. The boats were leaky and without awnings, and the men, lying upon the bottom, were drenched with water, and, at the same time, exposed to the burning sun. Their only sustenance was raw and rancid pork and hard biscuit or unbaked flour. “The sight of so much misery, privation and distress,” says Doctor Meyrick, “broke my heart, and I wept till I had no more power to weep.”

When the boats returned to Isle Aux Noix they were load-

ed with the baggage, while the men were sent by land to Point Au Fer, which had been fortified by order of General Sullivan. At that place they found a supply of boats awaiting them, in which they embarked, and, on the 3d of July, reached Crown Point.

The broken fragments of "the army of Canada" presented one of the most distressing sights witnessed during the whole war. Of the five thousand two hundred men collected at Crown Point, twenty-eight hundred were so sick as to require the attentions of the hospital, while those reported as "fit for duty," were half naked, emaciated and entirely broken down in strength, spirits and discipline. Some few lay in tents, others in half built sheds, but by far the greater number occupied miserable bush huts, which afforded a slight shelter from the burning sun, but were no protection against the damp and unhealthy night air. Among these tents and huts the men were scattered in indiscriminate confusion, without regard to comfort or health or to the distinction of companies, regiments or corps. "I found the troops totally disorganized by the death or sickness of officers," says Colonel Trumbull; "and I can truly say, that I did not look into tent or hut in which I did not find either a dead or dying man." The troops remained about ten days at Crown Point, and when they left for Ticonderoga, over three hundred new made graves attested the frightful ravages that death had made among their broken ranks.*

CHAPTER VII.

1776—The Americans and British Build Armed Vessels on Lake Champlain—Arnold's Cruise on the Lake—Battle of Valcour Island—Defeat of the American Fleet near Split Rock—The British occupy Crown Point—Condition of the American Army at Ticonderoga.

The plan of the Campaign of 1776, as formed by the British Ministry, contemplated a separate movement against Ticonderoga and New York, and the conjunction of the two armies at Albany. General and Lord Howe were sent with a large military and naval force against New York, while the thirteen thousand troops collected in Canada were placed under the command of Sir Guy Carleton, who had under him Generals Burgoyne, Phillips, Fraser, Nesbit and Reidesel; all men of acknowledged skill and ability. Several vessels were built in England, and sent over to be used on Lake Champlain.

During the summer of 1776, the English were busily engaged in preparing a fleet for the lake service. Seamen, ship carpenters and laborers were collected at St. Johns in numbers. The vessels built in England were taken to pieces, carried over the rapids of the Richelieu and reconstructed. Several other vessels were brought up from the St. Lawrence, and a great number of transports were framed and launched at St. Johns. The fort at St. Johns was repaired and strengthened, and garrisoned with three thousand men; an equal number was stationed at Isle Aux Noix. The rest of the troops were reserved to man the armed vessels and transports, and to form the army of invasion. Six hundred and ninety-seven seamen were also drafted from the Isis

and the other ships of war lying at Quebec, and sent forward to Lake Champlain.*

While the English were thus engaged, the Americans were actively employed, at the other extremity of the lake, in preparations to repel the threatened invasion. On the 17th of June, Congress appointed Major General Gates to the command at Ticonderoga and Crown Point. Gates found those posts in a very reduced condition. The small pox was still prevalent among the troops, not a cannon was mounted, nor were any preparations made for defense. The first efforts of the Commander-in-Chief were directed to recruiting the ranks, restoring the men to health, and providing them with clothing and necessary accommodations. Those sick of the small pox were sent to a general hospital established at the head of Lake George. Reinforcements were earnestly solicited from the Eastern States, and requisitions made for ship carpenters to be employed at Skenesborough in building the hulls of galleys and boats. Crown Point was reduced to a mere post of observation, while the most active efforts were made to enlarge and strengthen the defenses at Ticonderoga. Mount Independence was carefully examined by Colonels Wayne and Trumbull, who reported that the ground was finely adapted for a military post. A portion of the troops were ordered to clear away the wood and to encamp upon this eminence. The Pennsylvania regiments, the *elite* of the army, were posted at the "French lines," which they were ordered to repair; and the old works were strengthened at all points.

The small fort at Skenesborough was also repaired, and that place selected as the point of rendezvous for the expected reinforcements. The lake above Ticonderoga soon presented a scene of busy activity, as boats were constantly passing and repassing, loaded with men, provisions and mu-

*The number of seamen detached for his service, were as follows: From the Isis, 100; Blood, 70; Triton, 60; Garland, 30; Canneaux, 40; Magdalen, Brunswick and Gasper, 18; Treasury and several armed Brigs, 80; Fell, 30; Charlotte, 9; from Transports, 214; Volunteers, 9; besides 8 Officers and 19 Petty Officers.

nitions of war. By the month of September an army of from eight to ten thousand men were assembled at Ticonderoga. Each regiment had its alarm post assigned, to which it was ordered to repair at day-light every morning, and every means was taken by the officers to bring the whole body to a state of high discipline.*

The superintendence of the construction of the fleet was confided to General Arnold, who entered upon the work with his characteristic energy, but, in its progress, found himself surrounded by great and complicated difficulties, occasioned by the want or limited supply of nearly all the materials necessary for boat building, or for a naval equipment. But these embarrassments only excited the men to greater exertions. By the middle of August, Arnold was prepared to take the lake with a naval force, carrying fifty-five guns and seventy-eight swivels and manned by three hundred and ninety-five men. His fleet consisted of the Sloop *Enterprise*, Captain Dickson; the Schooner *Royal Savage*, Captain Wynkoop; Schooner *Revenge*, Captain Seaman; Schooner *Liberty*, Captain Premier; and the Gondolas *New Haven*, *Providence*, *Boston*, *Spitfire* and *Philadelphia*.†

With this force Arnold sailed from Crown Point on the 20th of August, and cruised between that place and the mouth of the Bouquet River, until the 2nd of September. On the evening of the 2nd he proceeded north as far as Schuyler Island, and, the next day, reached Windmill Point, eight miles below Isle La Motte. It was his first intention to have gone as far down as Isle Aux Tetes, but finding that island already occupied by the British, he anchored off Windmill Point, in a line from shore to shore, and sent his look-out-boats about one mile below, with orders to keep a sharp eye upon the movements of the enemy.

*Trumbull's Reminiscences of his own Times.

†The Enterprise had been captured by Arnold at St. Johns; the Liberty by Herkirk at Skeneborough. The other vessels were built at Skeneborough and then taken to Ticonderoga and Crown Point, where they received their sails, military stores and equipments.

On the morning of the 6th, several boats were sent on shore for fascines to fix on the bows and sides of the Gondolas, to prevent the enemy from boarding, and to protect the men from the fire of musketry. One of the boats reached the shore before the others, and was attacked by a party of Indians, who occupied the adjoining woods. Before the men could row off, three of their number were killed and six wounded. Arnold immediately ordered his vessels to discharge their broadsides towards the woods, when the Indians precipitately retreated.* The same morning the fleet was reinforced by the arrival of the Galley *Lee*, of six guns, and the Gondola *Connecticut*, of three guns.

The noise of the firing on the morning of the 6th, was distinctly heard at Crown Point, fifty miles distant. Lieutenant Colonel Hartley, the commanding officer there, immediately wrote to General Gates, at Ticonderoga, that an engagement had undoubtedly taken place between Arnold and the enemy. Gates sent the letter, by express, to General Schuyler, then at Albany, who ordered out the Ulster and Dutchess County, and a portion of the New England militia. This order was revoked on the 18th, when the true account of the affair reached Albany.†

On the night of the 7th, the English sent strong parties up the river, and commenced preparations to erect batteries on both sides of Arnold's position. This movement induced Arnold to retire as far back as the Isle La Motte, where he came to anchor about two o'clock on the afternoon of the 6th. Here the fleet remained until the 19th, when it removed to Bay St. Amand, which lies on the west side of the lake, a few miles north of Cumberland Head. As the schooner *Liberty* was on her way to this anchorage, she was hailed by a Canadian, who came down to the water's edge and requested to be taken on board. Captain Premier sent a boat towards the shore, with orders to approach with caution

*Arnold to Major General Gates, Sept. 7, 1776.

†American Archives, Fifth Series.

and to keep her swivels pointed and the matches ready to fire in case everything was not right. The man on shore waded about a rod into the water and stopped, entreating the boat's crew to come to him. Finding he could not decoy them into shallow water, he made a signal, when about three hundred Canadians and Indians, who were secreted in the woods near the shore, uncovered and fired into the boat, wounding three of the crew. The boat returned the fire with her swivels and small arms, and the schooner discharged several broadsides of grape, when the party retreated, having apparently suffered some loss.*

While Arnold lay at Bay St. Amand he sent two boats to sound the channel between Valcour Island and the main shore, who reported that they found the anchorage there exceedingly fine and secure. To this harbor the fleet moved on the 23d of September. A few days afterwards the Galley *Trumbull*, Captain Warner, arrived, and on the 6th of October, Brigadier General Waterbury came up with the Galleys *Washington*, Captain Thacher, and *Congress*, Captain Arnold. The entire naval force of the Americans was now collected at Valcour Island, with the exception of an eight gun galley, then receiving her armament at Ticonderoga, and the Schooner *Liberty*, which had been sent to Crown Point for supplies. The fleet consisted of the Sloop *Enterprise*, mounting ten guns and ten swivels; the Schooner *Royal Savage*, twelve guns and ten swivels; the Schooner *Revenge*, eight guns and ten swivels; the Galley *Lee*, six guns and ten swivels; the Galleys *Trumbull*, *Congress* and *Washington*, each eight guns and sixteen swivels; and the Gondolas *New Haven*, *Providence*, *Boston*, *Spitfire*, *Philadelphia*, *Connecticut*, *Jersey* and *New York*, each mounting three guns and eight swivels. There were therefore fifteen vessels in all, mounting eighty-four guns and one hundred and fifty-two swivels. The number of men and sailors detached to serve on these vessels was eight

*Arnold to Gates, Sept. 21, 1770.

hundred and eleven, but of this number at least one hundred had not yet joined the fleet. Arnold daily trained his men at the guns and used his best endeavors to reduce them to the proper discipline. He, however, complained frequently of their inefficiency. "The drafts from the regiments at Ticonderoga," he writes General Gates, "are a miserable set; indeed the men on board the fleet in general are not equal to half their number of good men." Again he says, "we have a wretched motley crew in the fleet; the marines, the refuse of every regiment, and the seamen, few of them ever wet with salt water; and we are upwards of one hundred men short of our complement."

At this time the British naval force in the Richelieu consisted of the Ship *Inflexible*, Lieutenant Schank, of eighteen guns; The Schooner *Maria*, Lieutenant Starke, fourteen guns; Schooner *Carleton*, Lieutenant Dacres, twelve guns; Radeau *Thunderer*, Lieutenant Scott, twelve guns and two howitzers; the Gondola *Loyal Convert*, Lieutenant Longcraft, seven guns; twenty gun-boats, mounting one gun each, and four long-boats, with one carriage gun each. There were also twenty-four long-boats loaded with the baggage and provisions.* The whole force was twenty-nine vessels, mounting eighty-nine guns, and manned by six hundred and ninety-seven picked seamen, besides a number of soldiers and artillerists. A small party of Indians accompanied the fleet.

The route taken by vessels passing up the lake from Canada, lies along and nearly parallel to the west shore of Grand Isle. Opposite Cumberland Head the lake is two miles wide, but, as soon as that point is passed, it increases in width to five miles, and does not again contract until you approach the mouth of the Bouquet. On the western side of the lake, about four miles south-west of Cumberland Head, and nearly two miles to the right of the track of vessels sailing directly up the lake, is the island of Valcour,

*Letter of Captain Douglass of the *Isis*. The *Inflexible*, *Maria* and *Carleton*, were brought from England and reconstructed at St. Johns.

which is separated from the main shore by a channel about one half mile in width. This channel is deep enough for the largest vessels, and is hid from the view of boats sailing up the lake, until they have passed some distance south of the Island. Midway of this channel, and where it is most contracted, Arnold anchored his vessels in a line extending from shore to shore. "We are moored," he writes to General Gates, "in a small bay on the west side of the Island, as near together as possible, and in such form that few vessels can attack us at the same time, and those will be exposed to the fire of the whole fleet."

At eight o'clock on Friday morning, October 11th, the English were discovered passing Cumberland Head with a strong north or north-west wind, and bearing in the direction of Crown Point, towards which it was supposed Arnold had retired. The fleet at this time was under the command of Capt. Thomas Pringle, of the Lord Howe, who made the schooner Maria his flag ship. General Carleton was also on board the Maria, but took no command of the fleet. As the English appeared in sight, off Cumberland Head, General Waterbury went on board the Congress Galley, and urged that they should immediately set sail and fight the enemy on the retreat in the broad lake; but Arnold declined, at that late hour, to change his plan of defense.

Capt. Pringle was some distance ahead of Valcour when he first discovered the American vessels. He immediately changed his course towards the Island, with a view to engage, but found great difficulty in bringing any of his vessels into action. About eleven o'clock, however, the gun-boats were enabled to sweep to windward and take a position to the south of the American fleet, when they opened a fire upon the Royal Savage, which, with the galleys, had advanced a short distance in front of the line. The British Schooner Carleton soon after came to the assistance of the gun-boats. The Royal Savage sustained the fire of the British vessels for some time, during which her mast was

crippled and much of her rigging shot away. She then attempted to return to the line, but, running too far to the leeward, grounded near the south-west point of the island, and was abandoned by her men, who succeeded in reaching the other boats in safety. At night the British boarded the schooner, and set fire to her.*

At half past twelve o'clock the Carleton and the gun-boats had approached within musket shot of the American line, when the action became general, and continued without cessation until about five in the afternoon. During the engagement Arnold was on board the Congress, Waterbury on the Washington and Colonel Wigglesworth on the Trumbull. The Congress and Washington suffered severely. The latter was hulled in several places, her main-mast shot through, and her sails torn to pieces. Waterbury fought bravely on the quarter deck of his vessel, and towards the close of the action was the only active officer on board ; the Captain and Master being severely wounded, and the First Lieutenant killed. The Gondola New York lost all her officers except Captain Lee, and the Gondola Philadelphia, Captain Grant, was so badly injured that she sank about one hour after the engagement. Arnold fought the Congress like a lion at bay, pointing almost every gun with his own hands, and cheering his men with voice and gesture. His vessel was hulled twelve times and received seven shot between wind and water; the main-mast was injured in two places, the rigging cut to pieces, and many of the men were killed and wounded.

On the side of the English, the battle was sustained by the gun-boats and the Schooner Carleton, and by a party of Indians who were landed on the island and main shore, and kept up an incessant fire of musketry during the engagement. The English vessels suffered considerably. On board the Carleton eight men were killed and six wounded.

*Arnold's account of the engagement. The hull of the schooner lies on the spot where she was sunk, and her upper timbers can yet be seen at low water in the lake. Arnold's papers were on board the schooner and were lost.

Two of the gun-boats were sunk, and one was blown up, with a number of men on board.* About five o'clock in the afternoon, Captain Pringle, who had made several unsuccessful attempts to bring his larger vessels into action, called off those engaged, and anchored his whole fleet just out of reach of the American guns. The Thunderer lay at the right of the line, a little south of Garden Island,† the Schooner Maria on the left near the main shore, while the Loyal Convert and the Inflexible occupied intermediate positions. The Carleton and gun-boats were anchored near and among the other vessels. By this arrangement, Captain Pringle hoped to prevent the escape of the American fleet during the night.

*Arnold states the loss sustained, by the blowing up of this gun-boat, at sixty.
—Letter to General Schuyler, Oct. 15.

†This is a small island about 600 yards south of Valcour.

Arnold was well satisfied that he could not successfully resist the superior force, with which the English were prepared to attack him on the following morning. His men had fought with the most daring bravery and resolution, but he had only succeeded in retaining his position, by the direction of the wind, which had prevented the larger vessels of the British fleet from joining in the action. Even under equally favorable circumstances, he could not resist a renewed attack, for his boats were already badly crippled, sixty of his men, including several officers, killed or wounded, and nearly three-fourths of each vessel's ammunition spent. A Council of War was immediately called, when it was determined that the fleet should retire during the night towards Crown Point.

At seven o'clock in the evening* Colonel Wigglesworth got the Trumbull under way, and, bearing around the north end of Valeour, directed his course towards the upper end of the lake, passing outside of the British line. The Trumbull was soon followed by the Enterprise and Lee, with the Gondolas ; and about ten o'clock, Waterbury started in the Washington Galley, followed closely by Arnold, in the Congress. In this order, with a light at the stern of each vessel, the fleet passed to Schuyler Island, about nine miles distant, where they arrived early the next morning. On examination Arnold found two of the Gondolas too badly injured to repair. These he sank near the island, and, having fitted up the other vessels as well as his limited time and means would permit, again set sail for Crown Point.

While Arnold was repairing his vessels, the British fleet weighed anchor and commenced beating up the lake in pursuit ; the wind blowing gently from the south. Early on the morning of the 13th, the American fleet was off the Bouquet, and the English lay a little above Schuyler Island. Arnold

*Arnold's account of the Battle. Mr. Cooper, in his Naval History, erroneously states that Arnold got under way at 2 o'clock, P. M. He also states that the American fleet, on the morning of the 11th, "was lying off Cumberland Head," and includes in the fleet the Schooner Liberty, which was then at Crown Point.

now had the wind in the south, while a fresh north-east wind, blowing in the broader part of the lake, favored the English Commander, who brought up his leading vessels soon after the former had passed Split Rock.—On this occasion Captain Pringle led in person in the Maria, closely followed by the Inflexible and Carleton. The Maria and Inflexible at first attacked the Washington Galley, which was too much shattered to keep up with the rest. The Galley struck after receiving a few shots. The two vessels then joined the Carleton, and, for several hours,* poured an incessant fire into the Congress Galley, which was briskly returned. Arnold kept up a running fight until he arrived within ten miles of Crown Point, when he ran the Congress and four Gondolas into a small creek in Panton, on the east side of the lake, and, having removed the small arms, burned the vessels to the water's edge. In this action the Congress lost her first Lieutenant and three men.

As soon as the boats were consumed, Arnold led his party through the woods to Crown Point, where he arrived at four o'clock the next morning. The Sloop Enterprise, the Schoonerer Revenge and the Galley Trumbull, with one Gondola, had reached that place the day before, in safety. The Galley Lee, Captain Davis, was run into a bay on the east side of the lake above Split Rock, where she was blown up. The only vessels taken by the enemy were the Washington Galley and the Gondola Jersey. The loss of the Americans in both engagements was between eighty and ninety, including the wounded. The English stated their loss in killed and wounded at forty, but, according to the American accounts, it must have exceeded one hundred, as at least sixty men were on board the gun-boat which was blown up on the 11th.

Immediately after the action of the 13th, Sir Guy Carleton gave orders for his Surgeons to treat the wounded prisoners with the same care they did his

*Captain Pringle says the action commenced at twelve and lasted two hours.—Arnold says it continued "for about five glasses."

own men. He then directed all the other prisoners to be brought on board his ship, where he treated them to a drink of grog, praised the bravery of their conduct, regretted that it had not been displayed in the service of their lawful sovereign, and offered to send them home to their friends, on their giving their parole that they would not again bear arms against Great Britain until they should be exchanged. On the 14th, Captain, afterwards Sir James Craig, accompanied the prisoners to Ticonderoga, where he dismissed them on parole. The generous manner in which they had been treated, filled the prisoners with the highest emotions of gratitude, and they returned proclaiming the praise of the British General. The feelings and sentiments expressed by these men were such, that it was not considered safe to allow them to land, or to converse with the American troops. They were therefore sent forward to Skeneborough the same night.*

The humanity of Governor Carleton's course was somewhat tinctured with policy. He well knew the great dissatisfaction which had prevailed among the American troops, and, with a profound sagacity, that distinguished his whole administration, took advantage of every opportunity to direct this feeling into a channel favorable to the British cause, and to impress upon the minds of the half clothed and destitute troops, a high opinion of the generosity, kindness and liberality of their opponents.

Although the results of the two naval engagements of the 11th and 13th, had been so disastrous, yet the Americans gained great credit for the obstinacy of their resistance.— Even the English acknowledged that no man ever manœuvred with more dexterity, fought with more bravery or retreated with more firmness, than Arnold did on both of these occasions. Such gallantry converted the disasters of defeat into a species of triumph. Several American officers, however, were found ready to censure Arnold, whom they called “our evil

*Trumbull's Recollections of his own Times.

genius to the north,*" but General Gates, who understood perfectly all the details of the affair, always speaks of him in the highest terms of praise. "It would have been happy for the United States," he writes to Governor Trumbull, "had the gallant behavior and steady good conduct of that excellent officer been supported by a fleet in any way equal to the enemy's. As the case stands, though they boast a victory, they must respect the vanquished."

On the 14th of October, the works at Crown Point were destroyed and the troops and military stores removed to Ticonderoga. As soon as the Americans left, Carleton landed his army, and occupied the shores on both sides of the lake. It had been his intention to march immediately against Ticonderoga, but, on the 15th, the wind commenced blowing so hard from the south that, for eight days, the English vessels could not sail up the lake. This delay was of great importance to the Americans, as it afforded them time to receive reinforcements of militia, and to prepare for a vigorous defense. In that short interval they made carriages for, and mounted forty-seven pieces of cannon ; they also surrounded the works with a strong abattis. General Gates had about twelve thousand men under his command, all of whom were now full of activity and vigilance, and desirous of an opportunity to display their prowess before the enemy.

General Carleton, finding he could not advance immediately, proceeded to establish himself at Crown Point, and to repair the fort at that place. He also occupied Chimney Point with a portion of his army, and placed three of his largest vessels at anchor near Putnam's Point, a little below which the light Infantry, Grenadiers, and a body of Canadians and Indians were encamped. Reconnoitering parties filled the woods in every direction, and frequently penetrated as far south as Lake George, where one or two slight skirmishes occurred with straggling parties of the militia,

*General Maxwell to Governor Livingston.

who were passing from Fort George to Ticonderoga. Boats were also sent to sound the Channel of the lake above Crown Point. On one occasion, one of these boats approached within shot of the lower battery of Ticonderoga, when it was fired into, and two men killed and one wounded.

On Monday the 27th of October, between eight and nine o'clock in the morning, the advance guard-boat, lying below Ticonderoga, made signal that the English fleet was approaching, and about an hour afterwards, five of their largest transport boats appeared in sight of the fort, and landed a number of troops upon Three Mile Point. Soon afterwards, two armed boats stood over to the east side of the lake and appeared to be reconnoitering. As soon as they approached near enough, they were fired upon from the lower battery, and from a row-galley stationed in the river near by, when they retired. In the mean time other British troops were landed upon the point, and a body of men were sent across the lake into a small bay about four miles below the works.

As these movements indicated an attack upon Ticonderoga, General Gates ordered the lines and redoubts to be manned, and brought three regiments from Mt. Independence to reinforce those on the western side. "Nothing," says General Gates, "could exceed the spirit and alertness which was shown by all the officers and soldiers in executing every order that was given." The display made on this occasion convinced Carleton that Gates' means of defence were sufficient to resist an assault. At four o'clock in the afternoon, he withdrew his forces and returned to Crown Point, where he made immediate preparations to retire into winter quarters, in Canada. The rear-guard of the English army left Crown Point on the morning of the 3d of November, and the place was, the same day, occupied by a detachment sent forward from Ticonderoga. As soon as it was ascertained that the English had retired to Canada, Gates dismissed the Militia and soon afterwards left with the greater part of the regular troops to join Washington, who was then in New Jersey.

CHAPTER VIII.

1777—1783.—Burgoyne invades the United States—Evacuation of Ticonderoga by General St. Clair—Battle of Hubbardton—Surprise and Indignation of the People—Vindication of St. Clair and Schuyler—Lincoln's Expedition against Ticonderoga—Surrender of Burgoyne—Retreat to Canada—Operations on Lake Champlain from 1778 to 1783.

The British Ministry still adhered to the scheme of opening a communication between Canada and the City of New York, by way of Lake Champlain. This project had acquired new favor at the English Court from the representations and sanguine promises of General Burgoyne, who had visited England in the winter of 1776—7, and urged upon the government its importance, and the certainty of its success. Dissatisfied, without just cause, with the proceedings of Governor Carleton, the ministry formed their arrangements for the new campaign, without his counsel or advice, and assigned to General Burgoyne the command of the army in Canada, and the direction of all its operations.

The regular force allotted to Burgoyne numbered seven thousand one hundred and thirteen men, among whom were three thousand two hundred and seventeen Brunswick troops, commonly known as Hessians. A large and complete train of brass artillery was sent to Canada, together with a full supply of arms, ammunition and military accoutrements of every description. Major General Phillips and Brigadier Generals Fraser, Powell and Hamilton served under Burgoyne. The Brunswick troops were commanded by Major General Reidesel and Brigadier General Specht.

Burgoyne arrived at Quebec in the month of May, 1777,

and immediately commenced preparations for the prosecution of the campaign. Two thousand Canadians were employed upon the fortifications at Sorel, Chamibly, St. Johns and Isle Aux Noix, and boats were constructed in great numbers, on the Richelieu, for the conveyance of the troops and supplies through the lake.

To favor the operations of the army, Col. St. Leger was sent against the American posts on the Mohawk River, with a force of about eight hundred men, and a large body of Indians under Sir John Johnson. St. Leger was to proceed by the way of Oswego, and, having reduced the posts on that route, was to rejoin the main army at Albany.

Early in the month of June, the army left St. Johns, in boats, and after several delays occasioned by contrary winds, reached Cumberland Head, where it halted to await the arrival of the ammunition and stores. The naval part of the expedition was under the command of Captain Lutwidge, and consisted of the armed vessels built during the preceding year. Seven hundred carts were brought on with the army, to be used in transporting baggage and provisions across the portages between the lakes and the Hudson River, and fifteen hundred Canadian horses were sent by land up the west side of the lake, under a strong escort.

As soon as the supplies arrived, Burgoyne left Cumberland Head and advanced as far as the Bouquet River, where he again halted. He was there joined by four hundred Iroquois, Algonquin, Abenakis and Ottawa Indians, to whom he gave a war-feast on the 21st of June, at their encampment near the falls of the Bouquet. On this occasion he made a speech to the assembled Indians, in which he humanely endeavored to soften their ferocity and restrain their thirst for blood. He spoke of the abused clemency of the King towards the colonies, and explained to them that the present war was carried on against a country, where the faithful were intermixed with rebels and traitors with friends. He released them from restraint, but cautioned them not to violate the

rules of civilized warfare or disregard the dictates of religion and humanity. "Be it our task," he said, "from the dictates of our religion, the laws of our warfare, and the principles and interest of our policy, to regulate your passions when you overbear, to point out where it is nobler to spare than to revenge, to discriminate degrees of guilt, to suspend the uplifted stroke, to chastise, and not destroy." He then called their attention to the rules which they should observe during the campaign. "I positively forbid bloodshed where you are not opposed in arms. Aged men and women, children, and prisoners must be held sacred from the knife or hatchet, even in the time of actual conflict. You shall receive compensation for the prisoners you take, but you shall be called to account for scalps." The Indians pledged obedience to his orders, and Burgoyne had the credulity to believe them. Little did he understand the unappeasable appetite for blood, of those by whom these fine promises were made.

While the English were slowly approaching Ticonderoga, the Americans were busily engaged in strengthening its defenses. The northern department, including Albany, Ticonderoga, Fort Stanwix and their dependencies, was now under the charge of Major General Scuyler, while the immediate command of the works on Lake Champlain was confided to Major General St. Clair, an officer of great military experience and reputation. Both generals were advised of the plans of the British government for the present campaign, and used every exertion to prevent its success. The old French lines, to the west of the fort, had been repaired and were guarded by a strong block-house; an outpost was established at the saw-mills, on the falls of the outlet, and another just above that point, and a block-house and hospital were erected at the foot of Lake George. Redoubts and batteries were established upon the low lands, below the fort, and the extreme left was protected by a small fort on Mount Hope, an eminence about half a mile in advance of the old French lines.

A star-fort, in the centre of which was a convenient square of barracks, had been built on the summit of Mount Independence, which was well supplied with artillery, strongly picketed, and its approaches guarded with batteries. The foot of the hill, towards the lake, was protected by a breast-work which had been strengthened by an abattis and a strong battery standing on the shore of the lake near the mouth of East Creek. A floating bridge connected the works of Mount Independence and Ticonderoga, and served as an obstruction to the passage of vessels up the lake. This bridge was supported on twenty-two sunken piers, formed of very large timber; the spaces between the piers were filled with floats, each about fifty feet long and twelve feet wide, strongly fastened together with iron chains and rivets. A boom made of large pieces of timber, well secured together by riveted bolts, was placed on the north side of the bridge, and by the side of this was a double iron chain, the links of which were one and a half inches square.

Opposite Mount Independence is the lofty eminence of Mount Defiance, which rises abruptly from the water to the height of about seven hundred and fifty feet, and is separated from Ticonderoga by the mouth of the outlet of Lake George. The American works formed an extensive crescent, of which this eminence was the centre. The entire line required at least ten thousand men, and one hundred pieces of artillery, for its defence. At the time of Burgoyne's approach, St. Clair's whole force did not exceed two thousand five hundred and fifty-six continental troops and nine hundred militia; the latter badly equipped, worse armed, and most of them raw and undisciplined. They, however, were zealous and determined, and were ready to oppose any force that might be brought against them.

The works about Ticonderoga were, by many, considered impregnable; but in fact they were weak and untenable, for every position, whether at the old French lines, at the fort or on Mount Independence, was commanded by the

summit of Mount Defiance, which had hitherto been neglected by the engineers of all parties. In 1776, Colonel John Trumbull, Adjutant General under Gates, made several experiments which proved the controlling position of the eminence, and he afterwards, in company with General Arnold, Colonel Wayne and others, ascended its rocky sides. "The ascent" says Trumbull, "was difficult and laborious, but not impracticable, and when we looked down upon the outlet of Lake George, it was obvious to all that there could be no difficulty in driving up a loaded carriage."

While Ticonderoga was thus poorly garrisoned and its defenses exposed, Burgoyne was moving against it at the head of a well disciplined army, numbering seven thousand nine hundred men. On the 30th of June, the whole force reached Crown Point, where the English General halted to issue a proclamation, by which he expected to intimidate the Patriots and to strengthen the hopes of the disaffected. In this paper he extolled the strength and number of the British forces, and portrayed, in vivid language, the horrors which would result from an opposition to their arms. He offered encouragement and employment to those who should assist the King in redeeming the colonies, and restoring to them "the blessings of British liberty," while against those who should disregard his offers of mercy and forgiveness, he threatened the merciless vengeance of the whole Indian force under his command. Of the Patriots, he says, "The messengers of justice and of wrath await them in the field ; and devastation and famine and every concomitant horror, that a reluctant but indispensable prosecution of military duty must occasion, will bar the way to their return." These thundering anathemas were received, in every quarter, with derision and ridicule. Their only effect was to call forth a reply, written by a young officer, which created much amusement in the ranks of the American army, by its admirable imitation of the pompous style of the proclamation.

Burgoyne's army moved from Crown Point on the 1st of

July, in three divisions; the Germans under Reidesel, taking position on the east shore of the lake, at Richardson's opposite Putnam Creek; the right wing under Fraser, advanced as far as Three Mile Creek, and the centre, commanded by Burgoyne in person, moved up the lake in transports, accompanied by the ships Royal George and Inflexible, and anchored in a position just out of reach of the American guns. The following day, a party of Indians approached the outposts at lake George, and were soon followed by a large detachment under Major General Phillips. On the approach of this column, the Americans evacuated and burned the block-houses, and, abandoning the saw-mills, retired within the lines. In the course of the night, General Phillips took possession of Mount Hope, which, the next morning, was occupied in force by Fraser's corps, consisting of the First British Brigade and two Brigades of Artillery. Phillips now held the ground west of Mount Hope, and Fraser's camp, at Three Mile Creek, was occupied by a body of men drawn from the opposite side of the lake. The column under Reidesel, was pushed forward as far as East Creek, from which it could easily stretch behind Mount Independence.

During all these movements, the American troops kept up a warm fire against Mount Hope, and against Reidesel's column, but without effect. On the 4th, the British were employed in bringing up their artillery, tents, baggage and provisions, while the Americans, at intervals, continued the cannonade. The same evening the Radeau Thunderer arrived from Crown Point, with the battering train.

The British line now encircled the American works on the north, east and west. The possession of Mount Defiance would complete the investment, and effectually control the water communication in the direction of Skeneborough.—Burgoyne's attention had, from the first, been attracted towards this eminence, and he had directed Lieutenant Twiss, his Chief Engineer, to ascertain whether its summit was ac-

cessible. On the 4th, Lieutenant Twiss reported that Mount Defiance held the entire command of Ticonderoga and Mt. Independence, at the distance of about fourteen hundred yards from the former, and fifteen hundred yards from the latter, and that a practicable road could be made to the summit in twenty-four hours. On receiving this report, Burgoyne ordered the road opened and a battery constructed for light twenty-four pounders, medium twelves and eight inch howitzers. This arduous task was pushed with such activity, that, during the succeeding night, the road was completed, and eight pieces of cannon were dragged to the top of the hill.

On the morning of the 5th, the summit of Mount Defiance glowed with scarlet uniforms, and the guns of its batteries stood threateningly over the American forts. "It is with astonishment," says Doctor Thacher, in his Military Journal, "that we find the enemy have taken possession of an eminence called Sugar-Loaf Hill or Mount Defiance, which, from its height and proximity, completely overlooks and commands all our works. The situation of our garrison is viewed as critical and alarming; a few days will decide our fate. We have reason to apprehend the most fatal effects from their battery on Sugar-Loaf Hill." General St. Clair immediately called a Council of War, by whom it was decided to evacuate the works, before Reidesel should block up the narrow passage south of East Creek, which, with the lake to Skeneborough, presented the only possible way of escape.

The decision of the council was concealed from the troops until the evening order was given. About twelve o'clock at night, directions were issued to place the sick and wounded and the women on board two hundred long-boats, which had been collected for this purpose. The boats were then loaded deep with cannon, tents and provisions, and, at three o'clock in the morning, started for Skeneborough, accompanied by five armed Galleys and a guard of six hundred

men, under command of Colonel Long of the New Hampshire troops. The boats reached Skenesborough about three o'clock on the afternoon of the same day, where the fugitives landed to enjoy, as they fancied, a temporary repose, but in less than two hours, they were startled by the reports of the cannon of the British gun-boats, which were firing at the Galleys lying at the wharf. By uncommon effort and industry, Burgoyne had broken through the chain, boom and bridge at Ticonderoga, and had followed in pursuit with the Royal George and Inflexible, and a detachment of the gun-boats under Captain Carter. The pursuit had been pressed with such vigor that, at the very moment when the Americans were landing at Skenesborough, three regiments disembarked at the head of South Bay, with the intention of occupying the road to Fort Edward. Had Burgoyne delayed the attack upon the Galleys until these regiments had reached the Fort Edward road, the whole party at Skenesborough would have been taken prisoners. Alarmed, however, by the approach of the gun-boats, the latter blew up three of the Galleys, set fire to the fort, mill and store-house and retired in great confusion towards Fort Ann. Occasionally the overburdened party would falter on their retreat, when the startling cry of "march on, the Indians are at our heels," would revive their drooping energies and give new strength to their weakened limbs. At five o'clock in the morning they reached Fort Ann, where they were joined by many of the invalids, who had been carried up Wood Creek in boats. A number of the sick, with the cannon, provisions and most of the baggage were left behind at Skenesborough.

On the 7th, a small reinforcement sent from Fort Edward, by Schuyler, arrived at Fort Ann. About the same time, a detachment of British troops approached within sight of the fort. This detachment was attacked from the fort, and repulsed with some loss; a Surgeon, a wounded Captain and twelve privates were taken prisoners by the Americans.—The next day Fort Ann was burned, and the garrison retreat-

ed to Fort Edward, which was then occupied by General Schuyler.

As soon as Colonel Long had started for Skeneborough, St. Clair with the main army, retired by land, towards Castleton. The garrison of Ticonderoga crossed the bridge, about three o'clock in the morning, and, at four o'clock, the rear guard, under Colonel Francis, left Mount Independence. Up to this time a continued cannonade from one of the batteries was kept up, in the direction of Mount Hope, in order to allay any suspicions of the movement, on the part of the enemy. The whole army would have departed unobserved, had not General De Fermoy, who commanded on Mount Independence, foolishly and regardless of express orders, set fire to the house he had occupied. The light of this conflagration revealed the whole scene to the British, and, at the same time, threw the Americans into great disorder ; many of them now pushing forward without any regard to discipline or regularity. At Hubbardton the stragglers were collected, and the ranks again organized. After a halt of two hours at this place, the main army proceeded toward Castleton, leaving Colonels Francis, Warner and Hale behind with a rear-guard of about thirteen hundred men.

As soon as the retreat from Ticonderoga was discovered by the British, General Fraser started in pursuit with his Brigade, and was soon followed by Reidesel. The British troops continued the pursuit during the day, and, at night, lay on their arms near the position occupied by the American rear-guard, at Hubbardton. Early on the following morning, Fraser, with eight hundred men, advanced to the attack, without waiting for the arrival of Reidesel, who was approaching with his column. On the appearance of Fraser's corps, Colonel Hale, fled with his regiment, towards Castleton, leaving Colonels Francis and Warner, with seven hundred men, to resist the attack.

The battle between the two parties was severe and bloody, and at one time the British Grenadiers recoiled before the

galling fire of Francis' and Warner's men, but Reidesel coming up at that moment, the Grenadiers rallied, and, sustained by the whole British line, returned to the charge with fixed bayonets. The American troops now broke and fled in every direction. In this action the Americans lost three hundred and twenty-four men, in killed, wounded and prisoners. Among the killed was the gallant Colonel Francis, who fell at the head of his regiment. On the part of the English, the loss was one hundred and eighty-three, including Major Pratt and about twenty inferior officers. Hale, who retired so precipitately in the morning, was intercepted on the road to Castleton, and surrendered without firing a shot. St. Clair, as soon as he had been joined by the remnant of Warner's men, retreated to Fort Edward, where he arrived on the 12th of July.

The loss to the Americans, by the evacuation of Ticonderoga, was very great; no less than one hundred and twenty-eight pieces of cannon, together with all the boats, provisions, stores and magazines were either destroyed or fell into the hands of the British. Among the trophies of the day was the Continental Standard, which the Americans had neglected to take with them on their retreat.

The evacuation of Ticonderoga and Mount Independence was condemned throughout the country. The people were surprised and alarmed. They were not prepared for so disastrous an event, for it was generally believed that the works on Lake Champlain were in a condition to resist any attack of the enemy. Both Schuyler and St. Clair were severely and unjustly censured; the former for not sending on reinforcements, when he had none to send, and the latter for omitting to fortify Mount Hope and Mount Defiance, when his whole force was insufficient to man the defenses of the forts themselves. That a great error was committed, in relying too much upon the supposed strength of the positions at Ticonderoga, cannot be denied; but there were no just grounds for attaching blame to either of the officers in command.

The attention of the Government had been directed to the exposed situation of this post, and St. Clair had repeatedly called for more troops for its defense. As late as the 25th of June, he addressed a letter to General Schuyler, in which he vividly portrayed his want of men, and his fears that he might not be able to resist Burgoyne, who was known to be approaching with a large force. In that letter, he says : "I cannot help *repeating* to you the disagreeable situation we are in, nor can I see the least prospect of our being able to defend the post, unless the militia come in ; and should the enemy protract their operations, or invest us and content themselves with a single blockade, we are infallibly ruined."

On the 28th of June, General Schuyler writes to General Washington, at the same time enclosing St. Clair's letter of the 25th, and says, "Should an accident happen to the garrison of Ticonderoga, and General Buogoyne makes a push to gain the south part of the lake, I know of no obstacle to prevent him : comparatively speaking, I have not a man to oppose him ; the whole number at the different posts at and on this side of the lake, including the garrisons of Fort George and Skenesborough, not exceeding seven hundred men, and these I cannot draw away from their several stations, in every one of which they are already too weak."

These letters show the real state of the frontier at the time. Burgoyne was approaching with an army of over seven thousand veterans, besides Canadians and Indians, while St. Clair had three thousand four hundred men to defend a circle of works which could not be properly manned with less than ten thousand, and Schuyler had not troops enough with him to defend the posts in the rear. It has been said that, considering his want of men, St. Clair should have evacuated the works before the approach of the British army. Such a course would have received as great censure as did the retreat. It would have been considered inexcusable. Besides the question, whether all or even a part of these works should be abandoned, had already been

presented to the consideration of the Provincial Congress of New York, and that body, on the 6th of May preceding, had passed a resolution declaring that, in their opinion, the abandoning of any part of the works of Ticonderoga, would be productive of great evils. A copy of this resolution was at the time forwarded to General Gates, who replied that he saw no reason for abandoning any part of the post at Ticonderoga, and that he had good ground to hope there would never be any necessity of evacuating or surrendering any portion of the position, if the body of the eastern troops arrived in any reasonable time.

When Burgoyne placed his batteries upon the summit of Mount Defiance, he effectually destroyed all hopes of resistance, on the part of the Americans. The only alternative was to surrender or evacuate the works. By adopting the latter course, St. Clair saved the greater portion of his garrison, and preserved the nucleus of an army, which ultimately baffled Burgoyne, and compelled him to surrender. At the moment, however, all classes of people were astonished at the unexpected result. It is "an event of chagrin and surprise," says Washington, "not apprehended nor within the compass of my reasoning." The Council of Safety of New York stigmatized it as a measure "highly reprehensible," and "probably criminal." Among the people, the most violent charges were made against both St. Clair and Schuyler. It was even asserted they had both been bribed by Burgoyne, who, it was said, had fired *silver bullets* into the fort, which were gathered by order of St. Clair, and divided between him and Schuyler.

This report would seem too ridiculous to gain credit with any one, and yet we have the authority of Wilkinson, who was Adjutant General to Gates, that respectable men questioned him, with much gravity, as to its truth.* Time softened the disappointment of the people, and when the true con-

*See also Doctor Thacher's Military Journal, where he gravely denies the truth of the absurd report.

dition of the case was known, both officers were fully reinstated in the confidence of the nation.

When St. Clair joined Schuyler at Fort Edward, their whole force, including recent arrivals, did not exceed four thousand four hundred men, who were immediately employed in obstructing the roads leading to Lake Champlain, and in placing impediments to the navigation of Wood Creek. So thoroughly was this work accomplished that, when Burgoyne afterwards led his army on this route, he was often unable to advance more than one mile in twenty-four hours.— Schuyler remained at Fort Edward until the latter part of the month of July, when he fell back as far as Saratoga, and subsequently retired to Stillwater. While at Fort Edward, he removed the provisions, stores, boats and arms from Fort George, and, on the 17th of July, destroyed the fort itself.

We left Burgoyne at Skenesborough and Fraser and Reidesel at Hubbardton, on the 7th of July. After the retreat of St. Clair towards Fort Edward, these two columns occupied the ground between Castleton and Skenesborough ; the English right wing occupying the heights at Skenesborough, in two lines, the right flank to the mountain and the left to Wood Creek ; the German troops were stationed at Castleton, with detachments on the roads leading to Rutland and Poultney ; the centre was occupied by Fraser's corps.— A third column of the English army, under General Phillips, was engaged in getting the gun-boats, transports and provisions, over the falls of the outlet, into Lake George. This was accomplished after great labor and fatigue. Phillips then advanced as far as Fort George, where he established a depot and erected magazines for the army.

While Burgoyne was at Skenesborough, he issued a proclamation addressed to the inhabitants on the New Hampshire Grants, in which he directed them, under pain of military execution, to send deputations, consisting of ten persons or more from each township, to meet Colonel Skene at Castleton, "who," adds the proclamation, "will have instruc-

tions not only to give further encouragement to those who complied with the terms of my late manifesto, but, also to communicate conditions upon which the persons and property of the disobedient may yet be spared." As soon as General Schuyler saw this proclamation, he issued an order that every person, who had taken or might take a protection from Burgoyne, should be secured and sent to jail; at the same time he gave notice, by a counter proclamation, that all who should join with, or in any manner assist or hold correspondence with the English, should be considered and dealt with as traitors.

Burgoyne had placed great reliance upon the discontent of the inhabitants on the New Hampshire Grants, and supposed that large numbers, if not the whole population, would join his army. But in this he was destined to be most sorely disappointed, for, not over four hundred royalists or disaffected joined him, and at least half of these he represented as "trimmers, merely actuated by interest," in whom he could place no dependence. He also declared, in a letter to Lord George Germain, that the New Hampshire Grants abounded in the most active and most rebellious race on the continent, who hung like a gathering storm upon his left.—This opinion had not been formed without good reasons, as we shall now see.

When the column under General Phillips moved up Lake George, the posts at Ticonderoga and Mount Independence were left with a guard of nine hundred and ten men, composed of the 53d British regiment, four hundred and sixty-two strong, and a German regiment, numbering four hundred and forty-eight men, rank and file. About the time that Burgoyne had collected his troops at Fort Edward, General Lincoln, who commanded a strong detachment of militia, stationed at Manchester, Vt., determined to make a diversion in the rear of the British line, in the hopes of recovering the Fort of Ticonderoga, and thus cutting off Burgoyne's communication with Canada.

General Lincoln ordered Colonel Warner, with a detachment of the Massachusetts militia, to move in the direction of Mount Independence, in order to make a diversion, and an attack in that quarter, if the occasion should favor one. Another detachment was sent, under Colonel Woodbridge, against Skenesborough and Fort Ann, while Colonel Brown, with Herrick's regiment of Rangers, and some Militia and Volunteers, was to cross the lake at the narrows, pass through the woods and take the outposts of Ticonderoga, and the works at the landing of Lake George. These places were to be attacked at the same time. Captain Ebenezer Allen, with his rangers, was to leave Brown and Herrick at a certain point and take Mount Defiance, and then rejoin them to attack Ticonderoga, in conjunction with General Warner. The plan thus arranged, they set out from Pawlet for their different places of destination. Brown had to cross the lake in the night and to pass, for fourteen miles, over rugged mountains, which he accomplished, reaching the head of Lake George the day before the attack. Before it became dark, sentinels were placed at different points on Mt. Defiance and in the direction of the other British posts, with directions, from time to time, to give "*three hoots of an owl*," as a signal, to guide the main party on their way, through the darkness of night. Colonel Brown took possession of Mount Hope and of a block house near the old French lines. He also seized two hundred long-boats, an armed sloop, and several gun-boats, stationed to defend the carrying-place, and captured two hundred and ninety-three soldiers, at the same time releasing one hundred American prisoners.

But the most difficult task was the capture of the British works on the summit of Mount Defiance; which could be reached only by a cut way well defended and guarded.—Captain Allen and his men had, after great difficulty and labor, nearly reached the top of the mountain, when they found a cliff they could not climb in the ordinary way. Al-

len, therefore ordered one of his men to stoop, and stepping on his back, clambered to the top, which was only large enough to hold eight men without their being discovered by the enemy. As soon as the men had reached the top, he rushed upon the garrison, already alarmed by the firing at the landing, closely followed by his little party, who, says Allen, "came after me like a stream of hornets to the charge." The garrison immediately fled, with the exception of one man who attempted to fire a cannon at the assailants. "Kill the gunner," cried Allen, at the same time discharging his musket. At this the man ran away with the match in his hand, leaving the Americans in full possession of the works. The terrified soldiers rushed down the cut way and were captured by Major Wait, who had been stationed at the bridge to intercept their retreat. The only resistance offered, during the night, was by Lieutenant Lord of the 53d regiment, who commanded at the Block House, and who did not yield until several pieces of ordnance, taken from the sloop, had been brought against it.

Colonel Warner did not arrive near Mt. Independence until early the next morning. "He moved so extremely slow," says Ira Allen,* "that he saved his own men and hurt none of the enemy." When he came up, his force was united with Colonel Brown's and the fortress of Ticonderoga summoned, but Brigadier General Powel, who commanded there, refused to surrender, declaring that he was resolved to defend himself to the last. Brown and Warner continued a cannonade against the fort for four days, when finding the guns made no impression upon the walls, they abandoned the siege and withdrew their forces to the lower end of Lake George. Here they embarked on the gun-boats which they had captured, and on the 24th, sailed against and attacked Diamond Island. On this island a large quantity of public property had been stored, which was guarded by two companies of the 47th regiment, under Captain Aubrey. In this attack

*History of Vermont—London, 1798.

the Americans were repulsed with a small loss, and retreated to the east shore of the lake, pursued by several gun-boats which were stationed at the island. As soon as the Americans landed, they burned their boats, crossed over the mountains to Lake Champlain and returned to Lincoln's camp at Pawlet.*

The fate of Burgoyne's army, after it left the lake, is well known. On the 30th of July, the three divisions were united at Fort Edward. On the 16th of August, Colonel Baum was defeated at Bennington, by a body of New England Militia, under General Stark. St. Leger raised the siege of Fort Stanwix on the 28th of that month, and passing through Canada and Lake Champlain, soon after joined Burgoyne, between whom and General Gates a battle had been fought at Stillwater, on the 18th of September, in which the advantages were decidedly in favor of the latter. After the action Burgoyne retired as far as Saratoga, where another severe action was fought on the 7th of October.—On the 17th of that month "articles of capitulation" were signed and five thousand seven hundred and ninety-one British and German troops were surrendered as prisoners of war.

As soon as the news of Burgoyne's surrender reached Ticonderoga, the troops stationed in that vicinity prepared for an immediate retreat to Canada. A few open boats now held what remained of the proud host, who three months before had ascended the lake with all the pomp and panoply of war. Then, their banners floated gaily in the breeze, and the clear notes of the bugle startled the echoes of the surrounding hills ; now, with watchful eyes they hurried silently along, and carefully avoided the shores, lest the thick and tangled forest might contain some bold and unseen foe. Nor were their fears without foundation ; for, as they

*In this expedition the Americans recovered the Continental Standard which had been left behind when St. Clair's army evacuated the fort in July.

perplexed at these strange manœuvres of the fleet. Whenever it ascended the lake, an attack was expected in the direction of Fort Edward, but when, a few weeks afterwards, the fleet would withdraw without making any hostile demonstration, the idea prevailed that the movement was intended to create a diversion, while the actual blow was to be struck in another quarter. The mystery of these singular proceedings was not fully explained until several years afterwards, when it became publicly known that the leaders of the people on the New Hampshire Grants had been, during the years 1780 and 1781, in frequent and secret correspondence with the authorities of Canada in relation to the political destiny of the Grants.

It is not my purpose to enter into an investigation as to the character or effect of this correspondence. The subject properly belongs to the History of Vermont, and has already been ably reviewed by her historians. It is enough here to say, that on the part of the British, the negotiation consisted of repeated endeavors to persuade the leaders on the Grants to abandon the American cause, and to declare the country a British Province, and on the other side, of evasive and ambiguous answers, calculated to keep alive the hopes of the British authorities, but not intended to pledge the leaders or the people to any certain action. It is very evident that if the leaders were really serious in their intentions, the people were prepared for no such arrangement.

When the remnant of Burgoyne's army retreated to Canada in 1777, the British retained possession of Point Au Fer, which they occupied as a military post. They also held a small block-house on the west side of the island of North Hero. These places were not given up until some time after the close of the war.

CHAPTER IX.

From 1783 to 1800—Progress and extent of Settlements on the borders of Lake Champlain—Personal Sketches—Trade and Commerce of the Country—Population, &c., &c.

We have now traced the history of Lake Champlain, from its first exploration by the Europeans, in 1609, to the close of the war of the Revolution; a period of one hundred and seventy-five years. This history, thus far, has been little more than a narrative of continued strife and contention. Champlain was guided to the lake by a war party of Indians, who were seeking their enemies upon the well known battle ground of that early day. He wrote the name of the lake upon its sands with the blood of the Iroquois, and proclaimed it, for the first time, amid the cries of tortured and dying prisoners. For many years afterwards the French and English colonists crimsoned its waters with each other's blood, and when, after a short interval of comparative quiet, the war of the Revolution broke forth, the tide of battle almost instinctively returned to its old channel. It is not surprising that, under such circumstances, but little progress had yet been made towards the settlement and improvement of the country.

In 1783, the settlements near the lake were principally confined to the few towns in Vermont opposite and south of Crown Point. In that year the whole population upon the borders of the lake, on both sides, did not exceed six hundred.

For several years after the declaration of Peace, emigration to the north eastern part of Vermont was retarded by

the still pending dispute between the claimants under the New Hampshire Grants and the state of New York, in regard to land titles. This controversy had, however, lost much of its acrimony and all parties were prepared for its final adjustment, which took place in 1790. On the 4th of March, 1791, Vermont was admitted into the Union as a separate and independent State. In this year the population of the lake towns was six thousand seven hundred and seventy-three.

In 1782, a party of royalists emigrated from St. Johns on the Richelieu, and commenced several improvements in the town of Alburgh. Soon afterwards Ira Allen obtained a grant of the town, from the authorities of Vermont, and brought actions of ejectment against the royalists, which however terminated in their favor. A claim to the township was afterwards advanced by Sir George Young, under color of a grant from the Duke of York, which was also successfully resisted by the settlers.

Isle La Motte was settled in 1785, by Ebenezer Hyde, Enoch Hall and William Blanchard, and was organized as a town in 1790. In 1802, the name of the town was changed to Vineyard, which it retained until 1830, when the original name of Isle La Motte was again resumed. The islands of North Hero and Grand Isle were chartered as a town in 1779, but no settlement was commenced there until 1783. In March of that year Ebenezer Allen,* Alexander Gordon and Enos Wood visited the township for the purpose of locating their respective claims. Wood, who, by agreement between the parties was entitled to the first choice, located upon the south end of the north island; Gordon took

*Ebenezer Allen was a native of Massachusetts. At the age of twenty-four, he moved into Poultney, and in company with his brother-in-law, Thomas Ashley, commenced the first settlement in that town. He was soon afterwards appointed Captain of a company of Minute Men, and served in Colonel Herrick's regiment of Rangers during the Revolution. He led the attack against the British post on Mt. Defiance in September 1777, and afterwards captured about fifty of the rear-guard of Burgoyne's army on their retreat to Canada.

the north end of the south island, and Allen the south end. In August, all three brought on their families and commenced permanent improvements. For the first few years the inhabitants of these islands, in common with those of the neighboring towns, suffered great inconvenience from the want of grist-mills, the most accessible being at Whitehall and Granville, from eighty to one hundred miles distant.

The town of Milton was first settled in 1783, Georgia in 1784, and St. Albans in 1785. In 1782 McClain, Low and Boardman moved on to Colchester Point, and in the same year Ira Allen returned to the lower falls of the Winooski, where he soon after erected mills, a forge and a shop for making anchors.*

The first residents in the town of Burlington abandoned their improvements at the time of Burgoyne's invasion in 1777. Stephen Lawrence, Frederick Saxton, Simeon Tubbs and John Collins moved into the town and renewed the settlement in 1783. The first town meeting was held in March, 1787, when Samuel Lane was chosen town clerk. In 1789 Stephen Keyes built a store in the village, which was opened in the fall of that year under the charge of Orange Smith. Another store was soon afterwards started by Zacheus Peaslee.

In the year 1787, there were about twenty families in the town of Shelburne. Charlotte was first permanently settled in 1784, by Derick Webb and Elijah Woolcut. John McNeil soon afterwards moved into the town. He was elected its first town clerk and representative. In 1790 he removed to the lake shore and established a ferry between that place and the town of Willsborough, (now Essex) N. Y. Ferrisburgh was settled, after the war, by Abel Thompson, Gideon Hawley, Timothy Rogers and others. In 1783 Amos Spafford, Shadrack Hathaway, Eben Murry and Ephraim

*Ira Allen was the first Secretary of Vermont. Subsequently he was State Treasurer, Member of the Council, and Surveyor General. He rose to the rank of Major General of Militia, and, in 1795, was sent to Europe to purchase a supply of arms for the State.

and Wm. Fisher and John Charter commenced a settlement at Mt. Independence, in the town of Orwell, and the next year Pliny Smith and others moved into the town with their families. The same year, Barber, Durfee and Noble moved into the town of Benson.*

Let us now cross to the western or New York side of the lake. In 1784 the County of Washington was organized, and originally included all the territory lying west of and adjoining the lake. In 1788 that portion, contained in the present counties of Clinton, Essex and Franklin, was taken from Washington and formed into a new county, which was called Clinton. Essex was taken from Clinton in 1799, and Franklin in 1808. The town of Plattsburgh was organized as a part of Washington County in 1785, and included all the territory within the limits of the present towns of Beekmantown, Saranac, Schuyler's Falls, and also portions of Old Peru and Old Chateaugay. It was the only town on the west side of the lake until 1788, when Champlain, Willsborough and Crown Point were organized. Willsborough originally included the present towns of Chesterfield, Essex, Lewis and a part of Old Peru. Crown Point embraced all the territory lying between Willsborough and Lake George.

When Burgoyne entered the United States, all the persons residing on the west side of the lake abandoned their habitations, and either joined the American Army, or retired to the neighborhood of Albany. They returned immediately after the Peace, and were soon followed by others ; but the progress of the settlement of the County was very slow for the first ten years. In 1790 the population of Clinton County, which then embraced the whole territory west of the lake, was to be found in the vicinity of the Saranac and the Bouquet rivers, and did not then exceed sixteen hundred and fourteen.

Prior to the revolution William Gilliland had commenced a settlement at the falls of the Bouquet river, from

*For further information, in regard to the first settlement of Vermont, see Zadock Thompson's *Gazetteer of Vermont*—a most able and elaborate work.

which he was taken and sent to Albany by order of General Gates, in 1776. After the war he returned, accompanied, or soon followed by Aaron Fairchild, Jonathan Lynde, Joseph Sheldon, Abram Aiken, Martin Pope, Melchor and John Hoffnagle, John Morehouse and others, who in 1784 settled at or near the mouth of the Bouquet. In August, 1783, Benjamin Mooers accompanied by several other persons arrived at *Point Au Roche* and commenced the first permanent settlement within the limits of the present town of Beekmantown. About the same time Jacque Rous emigrated from Canada and settled at Rouse's Point. John La Frombois and Francis La Montee returned to their farms on the lake shore in Chazy, in 1784. Prisque Ashline lived on the Corbeau river in 1786, and Pliny Moore in Champlain in 1785. In 1787 Robert Coehran and Nathaniel Mallory resided on the lake shore, near the mouths of the Ausable rivers; Moses Dickson, Jabez Allen and Lot and John Elmore on the rich lands lying between those rivers, and Edward Everett and John Stanton in what is now called the "Union," in the town of Peru.

In 1781, the Legislature of the State of New York, in order to encourage the raising of troops for the defence of the State, passed certain acts offering bounties of unappropriated lands to such officers and soldiers as should enlist within a specified time. These bounties were divided into rights of five hundred acres each, and there was a provision in the act, that whenever any number of persons entitled collectively to sixty-one rights, or 30,500 acres, should join in a location, the lands so located should be laid out in a township of seven miles square, and that the remaining 860 acres, in such township, should be reserved for Gospel and School purposes. These rights were sometimes retained by the soldiers, but, more frequently, a company of land speculators would furnish money to the recruiting officers, to be paid as a bounty to those who on enlistment should transfer their certificates to the company. In this way a large por-

tion of the unappropriated lands of the State, subject to location, passed into the hands of a few individuals.

Judge Zephaniah Platt, of Poughkeepsie, and thirty-two other persons, having united in the purchase of the number of rights requisite to entitle the holders to a township, located them, in 1784, upon the lands which had formerly been embraced in the warrant issued by the English Government to Charles De Fredenburgh. A survey of the land was made in the same year by Captain Nathaniel Platt and Captain Simon R. Reeves, two of the proprietors, and a patent issued by the State to Zephaniah Platt in 1785.*

The proprietors were active in their efforts to secure the immediate settlement of the tract. Ten "gift lots" were set apart for the first ten persons who should move into the town with their families, and arrangements were made, at an early day, for the building of Mills, &c.

On the 30th of December, 1784, twelve of the proprietors met at the house of Judge Platt, in Poughkeepsie, where they agreed to become jointly interested in building a saw-mill, a grist-mill and a forge on the Saranac, near its mouth. They also agreed to furnish twine for a seine, and to build a piragua "of a moderate size." Attached to the agreement was an estimate of the probable cost of the mills, from which it appears that three hundred and sixteen dollars were appropriated for mill-stones, irons, nails, bolting-cloth and saw, and sixty-five dollars for flour and bread. One hundred and sixty dollars was divided equally between pork and New

*The following is a list of the original proprietors of Plattsburgh Old Patent, and of the number of acres allotted to each. Thomas Treadwell, Nehemiah Benedict and Thomas Benedict, 1120 acres; Nathaniel Platt, 950; Nathaniel Tom, 480; Burnet Miller, 480; Ezra L. Honmedieu, 320; Peter Tappen, 480; John Miller, 640; Benjamin Walker, 320; John Berrien, 480; Jonathan Lawrencee, 480; Benjamin Smith, 480; Israel Smith, 960; Melancton Smith, 1120; Zephaniah Platt, 900; William Floyd, 320; Benjamin Conklin, 500; Andrew Billings, 400; John Adams, 1600; Thomas Stone, 1000; Lewis Barton, 200; Ebenezer Mott, 200; Zacheus Newcomb, 1200; Platt Rogers, 1500; General Schuyler, 950; Benjamin Titus, 400; Charles Platt, 800; John Smith 400; Albert Adriance, 200; Samuel Smith 200; Jacobus S. Swartout, 200; Simon R. Reeves, 2,800; Zephaniah and Nathaniel Platt 4,050; Zephaniah and Nathaniel Platt and S. R. Reeves, 4,300.

England rum—a pint of rum to a pound of pork being a workman's requisite in those roistering days.

Among those who received the "gift lots" were Jacob Ferris, Thomas Allen, John B. Hartwick, Derrick Webb, Jabez Pettit, Moses Soper, and Kinner Newcomb. Ferris received a deed for one hundred and twenty acres lying on the south side of the river Saranac, at its mouth, which covered all that part of the present village of Plattsburgh lying east of the river. In 1785, Charles McCready, Melancton L. Woolsey and several others moved into the town. Cumberland Head was then supposed to present the most eligible point for business, and the first stores established in the town were located there. After a few years, the stores were removed to the present village, but "the Head" still continued to be a place of some importance. It had a direct communication with Vermont, by ferry, and for a long time was the usual landing place for vessels navigating the lake.

Probably few towns in the state of New York can claim among their first inhabitants and proprietors, a greater number of men of talent than Plattsburgh. Conspicuous in this class were Melancton Smith, Zephaniah Platt, Thomas Treadwell and Peter Sailly.

MELANCTON SMITH, one of the proprietors, was a native of Jamaica, Queen's County, L. I., where he was born in 1744. While a boy he was placed in a retail store in Poughkeepsie, and resided in that town until his removal to the city of New York in 1784. At the early age of thirty-one, he was chosen one of the delegates to represent the county of Dutchess in the first Provincial Congress of New York, which met in May 1775, and soon became a leading and distinguished member of that body. He was one of the committee who prepared the celebrated address to the Canadians, at the commencement of the revolutionary struggle. On the 22d of June, 1776, he was appointed captain commandant of three companies of Militia raised in Dutchess

and West Chester, and the next year was placed on the commission to prevent and subdue insurrection and dissatisfaction in those counties. He was in the same year appointed the first sheriff of Dutchess county, which office he held for four years and was afterwards made a Judge of the Common Pleas.*

In 1778, though then a resident of the city of New York, Mr. Smith was chosen by the people of Dutchess county to the convention which met in June of that year to consider the Constitution of the United States, as prepared by the Convention at Philadelphia in May of the preceding year. In the discussions and deliberations of this body, he exhibited talents and information of the highest order, and was ranked as one of the ablest opponents of Hamilton and Livingston on the floor of the Convention. When it was ascertained that a sufficient number of States had so decided as to render the adoption of the Constitution certain, Mr. Smith gave up his objections. "This was deemed at the time," says Chancellor Kent, "a magnanimous sacrifice of preconceived principles and party discipline for the national welfare, and the effort was the greater, inasmuch as he had to desert his friend, Governor Clinton, who persevered to the end in his hostility to the Constitution."†

Mr. Smith was twice married. His first wife was Sarah Smith, of New Jersey, who died in 1770; his second, Margaret, daughter of Richbill Motte of Long Island, whom he married in 1771, and by whom he had four children, Richbill, Melancton, Sidney and Phœbe, all of whom afterwards resided in Plattsburgh. He died in the city of New York on the 29th of July 1798, in the 55th year of his age.

"Melancton Smith," says Mr. Dunlap, "was a man of rough exterior, powerful in bodily appearance, and undaunted in expressing his mind, which he did in plain language, but with a sarcasm that was cutting and a humor correct and

*Journal of the New York Provincial Congress.

†Chancellor Kent, as quoted in Appendix to Thompson's History of Long Island.

playful." "He was," says Chancellor Kent, "very amiable in his temper and disposition, of a religious cast, and very fond of metaphysical and logical discussions, in which he was a master." In private life he was kind, affectionate and communicative, and as benevolent as amiable ; indeed his charity knew no limits. While the army was encamped near his residence in Dutchess county, the females of the family were constantly employed in making clothing for the soldiers. "I could only make up my bedding by stealth," Mrs. Smith afterwards used to say, "for if the Judge came in and found me sewing upon a pair of sheets, he would request the cloth cut into shirts for the half naked soldiers of Washington's army."

ZEPHANIAH PLATT was possessed of a clear, sound and discriminating mind, and was classed among the first men of the State. In 1776, when forty one years of age, he was chosen a delegate from Dutchess county to the first Provincial Congress, and occupied a prominent position in that body ; he was a member of the Committee of Safety and took an active part in the convention called for forming a constitution for the State. He was for a short time commissary for the troops under command of Brigadier General Clinton. In June, 1777, he was appointed a Judge of the Dutchess Common Pleas, and the same year was elected one of the State Senators for the middle District, then composed of the counties of Dutchess, Ulster and Orange. He was also a member of the State Convention which assembled at Poughkeepsie, in June 1788, to deliberate on the adoption of the Constitution of the United States.

In the Spring of 1777, the counties of Dutchess and West Chester were filled with disaffected persons, who, it was feared, upon the first advance of the British troops out of New York city, would attack those friendly to the American cause. To prevent this, the Provincial Convention appointed Mr. Platt and two other members of their body a committee to clear those counties of all dangerous and disaffec-

ted persons. "You are," were the instructions to the committee, "on every occasion, by every means in your power, (torture excepted,) to compel the discovery and delivery of all spies and emissaries of the enemy, who you may have reason to believe are concealed in any part of the country through which you may make your progress, and upon due proof immediately execute them *in terrorem*."^{*} The committee executed the delicate and responsible duty confided to them with firmness, and with the most impartial justice.

After the war Mr. Platt engaged largely in the purchase of military land warrants and located them principally upon Lake Champlain. He removed from Poughkeepsie to Plattsburgh about the year 1801, where he resided until his death, in September 1807.

THOMAS TREADWELL, another of the original proprietors of Plattsburgh, was born in Smithtown Long Island in 1742, and graduated at Princeton in 1764. He was well educated, and highly distinguished for his good sense, prudence and firmness. In 1755, he was a member of the Provincial Convention. He was also a member of the Convention that framed the State Constitution, and was one of the Senators under that Constitution. In 1788, he was a member of the Convention which assembled to consider the Constitution of the United States, in which he co-operated with Clinton, Melancton Smith, Yates and Lansing. He was made Judge of Probate of Suffolk county in 1783, and held the office until Surrogates were appointed, when he received the appointment of Surrogate, which he held until 1791.[†] Soon after the organization of Clinton county, he removed to Plattsburgh and was chosen a Senator for the northern District. In 1807, he was appointed Surrogate of Clinton county, which office he held until the spring of 1831. He was for many years the last surviving member of the venerable assembly that fram-

^{*}Journal of the New York Provincial Congress.

[†]Thompson's History of Long Island.

ed the first Constitution of the State ; and died on the 30th of January, 1832, enjoying to the last the respect and confidence of his fellow men.

PETER SAILLY was a native of Loraine, France. He first visited the United States in 1783, and made a tour of exploration through the valley of the Mohawk and the country bordering on Lake Champlain. In 1785, he returned to France for his family, with whom he arrived at the city of New York in the summer of that year, and, having passed the winter in Albany, settled the following spring in the town of Plattsburgh. Mr. Sailly was a man of great probity, possessing strong powers of mind and a clear discernment of character. He was active, enterprising and firm ; a master of order and method and scrupulously exact in his business transactions. Although educated in a foreign land, he brought to the country of his adoption a mind deeply imbued with the principles of liberty, which he carefully cherished and enlarged in after life. He held several offices of public trust, and to the hour of his death enjoyed the unlimited confidence of his fellow men. In 1804, he was elected a member of Congress from the Saratoga, Clinton and Essex district, and by his strict attention to business and a judicious and unostentatious course, won the confidence of Mr. Jefferson, by whom he was soon after appointed Collector of Customs for the district of Champlain—an office he held through the successive administrations of Madison and Monroe until his death in 1826; a period of over eighteen years.

The duties of Collector, during a portion of this time, were most delicate and responsible, as upon the revenue officers devolved the arduous and unpopular service of putting in execution the embargo and non-intercourse laws. In the discharge of this duty Mr. Sailly never hesitated, but, upon all occasions, enforced the laws with promptness and strict impartiality. Kind and affable in his intercourse with his fellow citizens, he wounded the feelings of none by a rough or unnecessary display of power, while his firmness

and determination of character were too well understood, for any one to hope, by the strongest opposition, to deter him from the prompt discharge of his public duties.

The first Court of Common Pleas and General Sessions for Clinton County was held at Plattsburgh, on the 25th of October, 1788. Judge Charles Platt presided. Peter Sailly, Theodorus Platt, William McAuley, Pliny Moore and Robert Cochran, were the Associate Justices; Benjamin Mooers was Sheriff; Melancton L. Woolsey, Clerk; John Frontfreyde, Coroner; and Robert Paul, Jonathan Stephen-son, Lewis Lizotte and Jonathan Lynde, Constables. One Attorney, only, was in attendance, who appeared in behalf of the people; the prisoners were defended by the Clerk.* The first Circuit and Oyer and Terminer, for the northern part of the State, was held by Judge Benson, at the Court House in Plattsburgh, on the 18th of August 1796. The next year Judge Lansing held a Circuit Court at "the Block House" in Willsborough, where the Court also convened in 1798.

In 1789 George Clinton and Robert Yates were opposing candidates for Governor. The canvass was so warmly contested that the supporters of Governor Clinton secured his re-election by the small majority of four hundred and twenty-

*CHARLES PLATT was a native of Long Island and a brother of Zephaniah Platt. He removed to Plattsburgh soon after the organization of the town, was elected its first Supervisor, and for several years was town Clerk. He was First Judge of the Clinton Common Pleas until the year 1804, and in 1808 was appointed to the office of County Clerk, which he held until 1822. MELANCTON L. WOOLSEY was the youngest son of Melancton T. Woolsey of Long Island, and in early life had served as an officer in the army and as aid to Governor Clinton. He removed to Plattsburgh in 1785, was soon after appointed Clerk of Clinton County and was, for several years, Collector of Customs for the Champlain District. BENJAMIN MOERS was born in Haverhill, Massachusetts, on the 1st of April, 1758, and at the age of eighteen entered the army as a volunteer. In 1777 he was appointed Ensign in Hazen's regiment, and was afterwards promoted to the rank of Lieutenant and Adjutant. At the close of the war, he removed to Clinton County, of which he was the first Sheriff. He was four times elected member of the Assembly, and once of the State Senate. During the war of 1812 he held the office of Major General of Militia, and for forty-eight years was County Treasurer. He died at Plattsburgh in February 1838, in the 80th year of his age.

ty-nine votes. The entire vote of Clinton County, at this election, was forty-five, which was thus divided between the two candidates.

	CLINTON.	YATES.
Crown Point,	10	
Willsborough,	15	3
Plattsburgh,	17*	

In 1793 the vote of the County was increased to one hundred and thirty-four. George Clinton was elected Governor over Stephen Van Rensselaer, in 1801, by a majority of three thousand nine hundred and sixty-five. At this time Essex had been set off from Clinton, and several new towns had been organized in both counties. This year the vote was as follows :

CLINTON COUNTY.

	CLINTON.	VAN RENSSLAER.
Champlain,	42	45
Lisbon,	21	71
Plattsburgh,	107	21
Chateaugay,	11	52

Elizabethtown,	69	9
Jay,	46	13
	—	—
	175	110

The vote of both Counties in 1803 was 749, which was increased to 929, in 1804. Two years later the number of votes polled in both counties was 1,247.

The increase of population on both sides of the lake, from

*The poll list of this election was not preserved, but it can be conjectured who cast these seventeen votes, when it is known that the following *seventeen* persons were elected to town offices in Plattsburgh, at that election. Charles Platt, Kinner Newcomb, Theodorus Platt, Melaneton L. Woolsey, Abraham Beeman, John Stephenson, John Cochran, Jr., Nathan Averill, Cyrenus Newcomb, Edward Everett, Peter Sailly, John B. Hardwick, Jonas Allen, Moses Soper, Titus Andrews, Benjamin Mooers and Lucius Reynolds.

1790 to 1800, was nearly two hundred per cent. During this decade considerable progress was made in agriculture; particularly on the Vermont side, where the attention of the great body of the inhabitants was directed to the cultivation of the soil, the raising of sheep and the production of flax. The manufacture of pot and pearl ash was also carried on to a considerable extent. Some attention had likewise been given to the manufacture of iron. As early as 1792, four forges were erected in Addison County and two in Chittenden, and prior to the year 1800, several other forges had been erected at other points, upon both sides of the lake. These forges were principally supplied from a bed near Crown Point, which is yet celebrated for the quality and quantity of its ore.* The country abounded with maple trees from which large quantities of sugar were annually made. Many of the maples were of very large size and it was not unusual for the farmers to make from twelve to fifteen pounds of sugar, in the course of the season, from a single tree.†

The first settlers were generally hunters and derived considerable profit from the sale of peltry, as the country then abounded with moose, deer, bears, beavers, foxes, wolves, rabbits, martins, &c. The lake was also celebrated for the abundance, variety and delicate flavor of its fish. Salmon, muskellunge, bass, shad, pike, pickerel and perch were caught in great abundance in all parts of the lake, and in the mouths of the principal streams. The lower part of the lake near Wind-mill Point, and the Big Chazy river at the foot of the first rapids, were especially celebrated for their salmon fisheries. Champlain, in the account of his expedition in 1609, describes a large fish found in the lake, which

*When Kalm was at Crown Point, in 1749, he noticed black sand upon the shores of the lake, but he says it was not then known whether there were iron mines in the neighborhood or not. Iron ore was first found within the present limits of Clinton County, in 1800, when the "Winter Bed" was discovered by Mr. George Shaffer. The "Arnold Bed" was first opened in 1809.

†Williams' History of Vermont.

the Indians called *chaousarou*, and which grew to the length of eight or ten feet. He saw one five feet long, "as thick as a thigh, with a head as big as two fists, with jaws two feet and a half long and a double set of very sharp and dangerous teeth." "The form of the body," says Champlain, "resembles that of the pike, and it is armed with scales that a thrust of a poniard cannot pierce ; and is of a silver grey color. The point of the head is like that of a hog."* This fish made war upon all others in the lake, who fled in terror at its approach. It was probably the *esox longirostris* or the *esox osseus* of Mitchell. The species, of smaller size, still exists in the lake, and is occasionally caught near Isle La Motte.†

A large quantity of pine and oak timber was annually cut on the borders of the lake, which was rafted, through the Richelieu and St. Lawrence, to Quebec, from whence it was shipped to England. The timber trade had furnished employment for the early settlers before the Revolution. After the war, it greatly increased, and, for many years, formed an important traffic for the inhabitants residing on the west side of the lake. The amount of sawed lumber exported at that early day was inconsiderable, for although there were saw-mills upon all the principal streams on both sides of the lake, they were generally rude buildings, erected and used solely to supply the wants of their immediate neighborhood.

The commerce of the lake was principally limited to a small export and import trade with Canada. Vermont imported rum, wines, brandy, gin, coarse linens and woolens, tea, coffee, chocolate, and many articles necessary for building. Her exports were grain of all kinds, bar iron, wrought nails, pot and pearl ashes, beef, pork, lumber, peltry, maple sugar and some flax.‡ The exports on the New York side were

**Voyages de la Nouv. France*, 1609.

†See DE KAY's description of the Gar Fish and of the Buffalo Bony Pike, in the *Natural History of New York*.

‡Williams' *History of Vermont*.

lumber, pot and pearl ashes, peltry and iron. Large quantities of grain and provisions were brought from Vermont and Canada, to supply the inhabitants of Clinton and Essex counties, who, from the first, had been allured from the pursuits of agriculture, by the attractions of the lumber trade.

Large tracts of land, lying in Clinton county, were set apart in 1784 and 1786 for Canadian and Nova Scotia refugees, and for such of the inhabitants of the State as had served in the United States Army and were entitled to land bounties, under the act of 1782. These tracts were surveyed and subdivided, and many of the lots were occupied under the State Grants. The greater portion, however, were forfeited for want of actual occupation, and the lands were afterwards patented by the State to other persons. Among those acquiring title by patents was William Bailey, who purchased an extensive tract in the present town of Chateaugay. He moved there in the year 1800, and cleared and cultivated a large farm near the "Four Corners." At an early day he built a forge on the Chateaugay River, near the falls, which he intended to supply with ore from a bed at the south end of the Upper Chateaugay Lake. This bed, when first opened, presented every indication of containing a large supply of ore, but it soon became exhausted, and the forge was abandoned. Mr. Bailey also erected a paper-mill at Chateaugay, which continued in operation for several years. This was the first paper-mill in northern New York.*

Before Mr. Bailey settled in Chateaugay, he was employed

*WILLIAM BAILEY was a son of Colonel John Bailey of Dutchess county. At the age of eighteen, he was drafted into the Dutchess county militia, and was sent to join the army at West Point. He first visited Lake Champlain in 1786, and aided in the survey of the lands belonging to Zephaniah Platt and his associates. He was one of the Associate Justices of the Clinton Common Pleas in 1791, and was appointed First Judge of the County in 1806. In 1800, he was appointed First Major in Lt. Col. Benjamin Mooers' regiment of Militia, and was elected a member of the Assembly in 1802, and again in 1806. He removed to Plattsburgh in 1811, where he resided until his death, in the year 1840.

by the State to survey the lands set apart for the Canadian and Nova Scotia refugees. At this time the British occupied Point Au Fer as a military post, and the commanding officer there refused to allow the surveying party to approach or to continue their survey to the Point. The claim of the British commandant seems to have included all the territory north of the Big Chazy River, for after Judge Pliny Moore settled in Champlain in 1785, he was visited, on the first of each month, by a corporal and file of men, sent from Point Au Fer to notify him that his claim of title from the state of New York would not be recognized. No attention was paid to these repeated warnings, which continued until the British gave up possession of Point Au Fer, about the year 1788.

I have already had occasion to refer to the conflicting claims set up by various parties, and at different times, to the title and sovereignty of the country bordering on Lake Champlain. The last of these claims had been adjusted in the year preceding the admission of Vermont into the Union. In the year 1792, the Caughnawaga and St. Regis Indians, calling themselves the Seven Nations of Canada, sent a deputation to the Government of the state of New York, claiming a tract of land covering a large portion of the northern part of the State. A commission, consisting of Egbert Benson, Richard Varick and James Watson, was appointed to treat with the Indian Chiefs upon the subject, and in the summer of 1796, an arrangement was effected, by virtue of which the Seven Nations relinquished their claim, with the exception of the St. Regis reservation, for a small sum in hand paid, and a yet smaller perpetual annuity.

As soon as the Seven Nations had completed their negotiations with the state of New York, they advanced a similar claim against Vermont, for lands lying on the east side of Lake Champlain.

The subject was carefully examined by the Legislature of Vermont, but no decision was had until the next year, when the Governor of the State was requested to inform the claim-

ants that the Legislature was of the opinion that their claim, if it ever existed, had long since been done away and become extinct, in consequence of the treaty of Peace, in 1763, between the King of Great Britain and the French King, and the treaty of Peace between the King of Great Britain and the United States, in the year 1783; and that the Indians had now no real claim either in justice or equity. This decision was communicated to the Indians and the subject was dropped, without any further negotiations by either party.

The Caughnawagas resided on the south bank of the St. Lawrence, near the Island of Montreal, in Canada. The St. Regis Indians lived above and upon the same bank of that river. The latter still occupy the lands reserved to them by their agreement with the State, in 1796. These Indians were quiet and peaceable, and endeavored not only to preserve order within their own territory, but to prevent the violation of the laws of New York. An instance of their respect for order and good government occurred in 1804, under the following circumstances.

Jocco Lafrance, a St. Regis Indian, in the winter or spring of that year, killed a man near Chateaugay, and escaped to the Indian village. He was immediately arrested by the Chiefs and delivered up for trial. The evidence on the trial not being sufficient to convict Jocco of murder, he was acquitted of that charge, but was banished from the county. The Chiefs were satisfied that Jocco was really guilty, and, on his return, banished him from their village also. They likewise addressed the following letter to Judge Bailey, who was then one of the magistrates of Chateaugay :

“ This may certify to whom it may concern, that we the Chiefs and warriors of the village of St. Regis are determined to hold among ourselves a strict regulation of justice, and that whereas Jocco Lafrance has committed crimes not within our jurisdiction, but he belonging to our village, immediately apprehended said Jocco and delivered him up to

justice where said crime was committed, to receive just punishment under their laws, according to the crime he had committed, which we esteem murder to be the most heinous crime in felony. Said Jocco has now, after his trial, returned to us again by banishment. For which now said Chiefs, having a full sense that the said Jocco has committed the heinous crime of murder, have passed a Resolve that the said Jocco must immediately leave the territories under our jurisdiction, and also, if any person shall or may see said Jocco, it is our sincere wish that they may disappear him away from us, and never to have him seen among us while Time shall be on earth.

St. Regis, Octobr 17, 1804.

By order of the Chiefs.

WILLIAM GRAY."

CHAPTER X.

Dificulties between Great Britain and the United States—Henry's Mission to New England—President Madison's Message to Congress—Report of Committee on Foreign Affairs—Declaration of War in June 1812—Troops ordered to the Champlain Frontier—General Dearborn's "Morning Visit" in Canada—His Army go into Winter Quarters—Affair at St. Regis—Operations on the Ontario Frontier during the Summer of 1813—British and American Naval force on Lake Champlain—Loss of the Growler and Eagle—Colonel Murray burns the Barracks and Public Buildings at Plattsburgh.

Although Great Britain acknowledged the Independence of the United States, by the Treaty of 1783, she could not forget that they had once formed the largest and most important of her Colonial possessions. A feeling of dissatisfaction pervaded the British nation, and led to many acts of oppression towards the infant confederacy. Vessels, sailing upon the high seas under the American flag, were boarded by her ships of war; American seamen were impressed; trade with neutral nations was forbidden, and the territory of the United States invaded.

In June 1807, the British Ship of War Leopard fired into and boarded the U. S. Frigate Chesapeake, while the latter vessel was yet within sight of the American coast.—Ten days after this attack, Mr. Jefferson issued a proclamation interdicting all intercourse with the British armed vessels then within the waters of the United States. This proclamation was followed, on the 22d of December of the same year, by an act of Congress declaring an unlimited embargo on every port in the Union.

During the year 1808, negotiations were conducted be-

tween the two countries in a temper that promised a pacific termination of the dispute ; but no definite arrangement was concluded. The United States, in the mean time, was making preparations for defense. A large number of gun-boats were constructed for the protection of the sea coast, and, in January 1809, the President was directed to equip four new vessels of war. About the same time, Lieutenant Melancton T. Woolsey was sent north to build two gun-boats on Lake Champlain, and a brig of sixteen guns on Lake Ontario.

When the news of the attack upon the Chesapeake first reached the people, there was a general cry of indignation throughout the country. Politics, however, ran high at the time, and this natural and national sentiment was soon consumed, in many quarters, by the fire of party strife. As the dispute with Great Britain progressed, the opposition of the anti-administration party developed itself more and more against the policy and measures of the Government, until, at length, the authorities in Canada were induced to believe that a portion of the States were anxious to secede from the Union.* To encourage this feeling of discontent, Sir John Craig, Governor of Canada, sent the notorious John Henry as an emissary among the federalists of the New England States, with directions to ascertain how far, in case of their separation from the Union, they "would look to England for assistance or be disposed to enter into a connection with Great Britain."

Mr. Henry reached Burlington on the 12th of February, 1809, and at first was much pleased with the evidences of discontent among the people. "On the subject of the embargo laws," he writes Governor Craig, "there seems but one opinion ; namely : that they are unnecessary, oppressive and unconstitutional. It must also be observed that the execution of them is so invidious as to attract towards the offi-

*This opposition was the most violent in the Eastern States, the inhabitants of which were more commercial, and had suffered more from the effects of the embargo, than those of any other section of the Union

cers of Government, the enmity of the people, which is of course transferred to the Government itself ; so that, in case the state of Massachusetts should take any bold step towards resisting the execution of these laws, it is highly probable that it may calculate upon the hearty co-operation of the people of Vermont." A few days later Mr. Henry expresses some doubts as to the correctness of his first opinions. "The federal party," he again writes Governor Craig, "declare that in the event of war, the state of Vermont will treat separately for itself with Great Britain, and support to the utmost the stipulations in which it may enter, without any regard to the policy of the General Government. The democrats on the other hand assert that, in such a case as that contemplated, the people would be nearly divided into equal numbers ; one of which would support the Government, if it could be done without involving the people in a civil war ; but at all events would risk every thing, in preference to a coalition with Great Britain."

Henry's investigations were not very satisfactory, and before he left for Boston, he evidently became convinced that in the event of a dispute among the States, the citizens of Vermont could not be relied upon to join the seceders, or to unite in a strong opposition to the war. He had at first been led astray by the loud clamor of politicians, and by the complaints of those who had suffered most from the operation of the embargo. These laws had severely injured the commerce of the lake, and had broken up the direct communication with the Canada markets, upon which the inhabitants of the lake counties depended for a sale of their products, and for a supply of foreign commodities.

The country was filled with smugglers, who frequently came in collision with the revenue officers. In some of these encounters blood had been shed and lives lost. The first serious affray occurred on the Winooski River, in 1808, between a party of Government officers and a smuggling vessel called the Black Snake, in which two of

the Government officers were killed. Attempts were frequently made to seize the Collectors and Revenue officers, stationed on both sides of the lake. These attempts always failed, but, on one occasion, two of the assailants were severely, although not mortally wounded. The feeling of opposition to the embargo was strong at the time of Henry's visit, in 1809, and induced him to attach greater importance to the representations of a few persons, as to the sentiments of the inhabitants of Western Vermont, than was warranted by the real inclinations of the people themselves. It is well known that when war was declared, the Vermontese were not only ready to repel an invasion of that State, but that many of them volunteered to cross the lake, and oppose the advance of the British into the state of New York.

The difficulties between the United States and Great Britain continued to increase, in number and importance, until the year 1812. On the 1st of June of that year, Mr. Madison sent a message to Congress, in which he reviewed the various grounds of complaint against Great Britain, and set forth, at length, the unsatisfactory manner in which that power had received and treated the frequent remonstrances made on the part of the United States. This message was referred to the Committee on Foreign Affairs, who, a few days afterwards, made a report in which they fully concurred in the sentiments expressed in the President's message.

In this report the Committee declare that more than seven years had elapsed, since the commencement of a system of hostile aggressions, by the British Government, on the rights and interests of the United States. That the United States had done every thing in their power to preserve the relations of friendship with Great Britain, and had given proof of this disposition at the moment when they were made the victims of an opposite policy. The Committee then referred to the attack made by Great Britain upon the commerce between the United States and the Colonies of France and Spain. A commerce which, they declared, was just in

itself, sanctioned by the example of Great Britain in regard to the trade with her own colonies ; sanctioned by a solemn act between the two Governments in the last war, and by the practice of the British Government in the then existing European War.

They refer, at length, to the different attacks made by Great Britain upon the rights and sovereignty of the United States ; the interference with her neutral trade ; the pretended blockade of the whole coast of Europe, from the Elbe to Brest, inclusive ; the order of Council of January 1807, by which neutral powers were prohibited from trading from one port to another of France, or of her allies, or to any country with which Great Britain might not freely trade ; the order of Council of November of the same year ; the claim of right to search vessels sailing under the American flag ; the impressment of American citizens into the British naval service, and the attempt to dismember the Union, by a secret mission to foment discontent and excite insurrection against the constituted authorities and laws of the nation.

Having clearly and plainly stated the facts upon which these charges were based, and reviewed the whole course of Great Britain against the United States, since 1804, the Committee recommended an immediate appeal to arms, and introduced a bill declaring war between the United States and Great Britain. This bill passed the Senate by a vote of nineteen to thirteen, and the House of Representatives by a vote of seventy-nine to forty-nine, and was promulgated by the proclamation of President Madison, on the 17th day of June, 1812.

Active measures were immediately taken by many of the States to second the action of the General Government. The state of New York approved warmly of the course of the administration, and prepared to prosecute the war with vigor. Vermont was at the time under the control of the democrats, and both the Governor and Legislature pledged themselves

to support the country in the approaching contest. A law was immediately passed by the Legislature of the latter State, prohibiting all intercourse with Canada without a permit from the Governor, and measures were taken for calling out the militia whenever their services might be required.

The effective force in Canada, at the time of the declaration of war, was about ten thousand men. These troops were principally concentrated around Quebec, but the greater part were soon afterwards removed to Upper Canada, which was threatened on the west by an army under General Hull. In the summer of 1812, General Bloomfield was ordered to the Champlain frontier, with several regiments. By the 1st of September, he had about eight thousand men, including regulars, volunteers and militia, under his command. This force was stationed at Plattsburgh, with small advance parties thrown forward as far as Chazy and Champlain. The troops remained in quarters until the 16th of November, when they advanced north, under the immediate command of Major General Dearborn, and, on the 18th, encamped about half a mile south of the Canada line. The army collected at this point numbered three thousand regulars and two thousand militia.

The entire British force on the northern frontier did not exceed three thousand men, and of these not more than one thousand were within striking distance of the American army. When Dearborn had concentrated his troops near the lines, he prepared to cross into Canada. As he approached Odletown, Major Salaberry, who commanded in that quarter, sent forward two companies of voltiguers and three hundred Indians to support the two companies of embodied militia, who formed the British outposts on the La Colle.—Major Salaberry followed, the next day, with the remainder of the voltiguers and four companies of chasseurs.

Before day-break on the morning of the 20th, a detachment of Dearborn's army forded the La Colle, and sur-

rounded the guard-house which was occupied by the Canadian militia and a few Indians, who rushed out, broke through the American lines, and escaped unhurt. In the mean time a second party of the Americans had advanced, and commenced a sharp fire upon those in possession of the ground mistaking them for the British picket. This fire continued for nearly half an hour, when being undeceived, the two parties united and hastily retreated, leaving behind them five killed and as many wounded.* The troops immediately afterwards returned to Champlain. The designs of the American General were so completely obscured, that no one discovered the particular advantages intended to be gained by this singular and inefficient movement. It was a prelude to many similar operations on the Champlain frontier, during the war.

On the 23d of September, the army returned to Plattsburgh, where the 6th, 15th and 16th regiments went into winter quarters. The militia were disbanded ; the 9th, 11th, 21st and 25th regiments were sent to Burlington, and the light Artillery and Dragoons returned to Greenbush. Brigadier General Chandler commanded the troops left at Burlington, and Colonel Pike those stationed at Plattsburgh.

On the 23d of October, a gallant affair took place at St. Regis, where Major Young surprised a party of British, and took forty prisoners. But the Campaign of 1812 did not add to the lustre of the American Arms. On the Champlain frontier, nothing was achieved beyond the little affair at St. Regis. The operations on the Ontario frontier were confined to a few skirmishes, the defence of Fort Niagara, and an unsuccessful and most disastrous assault upon Queenstown ; while the incompetent and timid Hull surrendered Detroit and the North-western Army, without a battle, or any effort to maintain the honor of the country.

*Christie's History of the War in Canada. General Armstrong, then U. S. Secretary of War, says this account does not differ materially from those given by the American officers.

In the course of the winter preparations were made for the invasion of Upper Canada. The two brigades stationed on Lake Champlain, moved for the Ontario frontier in February, leaving a small detachment at Burlington to protect the magazines and provisions collected there. The west side of the lake was left wholly unprotected, and remained so until the month of September following.

On the 25th of April, General Dearborn, who commanded at the west, left Sackett's Harbor at the head of seventeen hundred men, and on the 27th disembarked at York in Upper Canada, (Toronto,) which was then defended by General Sheaffe, at the head of seven hundred regulars and militia and one hundred Indians. As soon as the troops were landed, they advanced to the attack, under the command of Pike, who had lately been promoted to a brigade. The advance was gallantly led by Captain John Walworth of the 16th, at the head of his company of Grenadiers. Two redoubts were carried, and the main column was pressing against the principal work, when the magazine exploded, scattering the walls of the building in every direction. This explosion was most fatal to both parties ; killing about forty British regulars, and thirty-eight of the Americans. Two hundred and twenty-two of the latter were wounded. The brave and gallant Pike received a severe contusion from a large stone, which terminated his life in a few hours.

On the fall of Pike, General Dearborn landed and assumed the command. General Sheaffe immediately retired with the regular troops, leaving Lieutenant Colonel Chewitt and the Canadian militia to continue the defense. Chewitt soon after surrendered. In this engagement the loss to the Americans was fifty-two killed and two hundred and fifty-four wounded. The British loss amounted to one hundred killed, about three hundred wounded and two hundred prisoners. When Dearborn's men entered the Provincial Parliament House, they found a *human scalp* suspended over the mace, near the Speaker's chair.*

*Gen. Dearborn to Secretary of War. Commodore Chauncey to Secretary of Navy.

On the 27th of May the Americans, under General Morgan Lewis, entered Canada and captured Fort George, after a severe contest. Two days afterwards, Lieutenant Colonel Preston took possession of Fort Erie, which had been hastily abandoned by the British, and the magazine blown up. The same day, Brig. Gen. Brown successfully repulsed Sir George Provost, who led an attack against Sackett's Harbor. On the 14th of June a severe action took place at Stoney Creek, in which the British were forced to retire, but not until they had captured Brigadier Generals' Chandler and Winder, who had incautiously advanced beyond support of the main body of their troops. On the 23d of the same month, General Dearborn sent Colonel Boerstler, with 570 men, to attack a body of British stationed at Beaver Dams, about 9 miles from Queenstown. Boerstler had nearly reached the point of attack, when he was surrounded by a party of the enemy, and surrendered after a contest of two hours' duration.

In July, Commodore Chauncey entered the harbor of York (Toronto), seized a quantity of flour and public stores, and burned the barracks and military store-houses at that place. On the 10th of September, the gallant Perry captured the British squadron on Lake Erie. "It has pleased the ALMIGHTY," he writes to the Secretary of the Navy, "to give to the arms of the United States, a signal victory over their enemies, on this lake. The British squadron consisting of two ships, two brigs, one sloop and one schooner, have this moment surrendered to the force under my command, after a sharp conflict." In October, Malden was occupied by General Harrison, and a few days afterwards a large British force, under General Proctor, was defeated on the banks of the Thames.

Prior to the commencement of the War, the whole naval force on Lake Champlain consisted of two gun-boats, which lay at Basin Harbor, on the Vermont side of the lake. In the course of the summer of 1812, two small sloops were fitted up and armed, to which were joined four scows, car-

rying one long eighteen pounder each. These vessels constituted the whole naval force of the Americans. The British, at that time, had no vessels on the lake, nor any in the Richelieu larger than gun-boats.

Late in the fall of 1812, Lieutenant Thomas Macdonough was ordered north to take charge of the naval operations on the lake, which until then had been confided to Lieutenant Sidney Smith.*

Macdonough brought out his vessels in the spring of 1813, as soon as the lake was free from ice. The American flotilla at this time consisted of the sloop President, fitted up during the winter, which was commanded by Macdonough in person; the sloop Growler, Lieutenant Smith, and the sloop Eagle, Mr. Loomis. About the first of June, Macdonough received information of an attack, by several British gun-boats, upon some small craft at the lower end of the lake. In consequence of this intelligence, he ordered Lieutenant Smith to move towards Rouse's Point, with the Growler and Eagle, in order to attack the gun-boats, should they again make their appearance. Lieutenant Smith left Plattsburgh harbor, with his vessels, on the morning of the 2nd of June, and about dark cast anchor within a mile of the lines. The next morning, about day break, he got under way, and proceeded down the Richelieu as far as Ash Island, (Isle aux Tetes) where he discovered and gave chase to three British gun-boats. The wind was blowing fresh from the south, at the time, and soon brought the sloops, the Growler leading, within sight of the works at Isle Aux Noix. The sloops now tacked and began to beat back towards the

Mr. Smith was 5th Lieutenant on board the Chesapeake at the time of the Leopard's attack upon that vessel, in June 1807, and, on the return of the Chesapeake to Hampton Roads, joined the other officers of that frigate in a letter to the Secretary of the Navy, preferring charges against Commodore Barron, and requesting a Court of Inquiry upon his conduct. He afterwards served on board the U. S. ship Wasp, and, in March 1810, was ordered to Lake Champlain, where he remained in command, until the arrival of Lieutenant Macdonough in the fall of 1812. He married a daughter of Judge Bailey, of Plattsburgh, and died, a commander, in 1827.

open lake, having the wind against them, with a slight adverse current in the river.

As soon as the British were aware of the advantages these circumstances gave them, three of their row-galleys came out from under the works at Isle Aux Noix, and opened a brisk fire upon the sloops. As the galleys carried long twenty-fours, while the largest guns on the sloops were eighteens, the former were able to select their own distance, nor could the latter come to close quarters, without running within range of the fire of the batteries on the island. To render the situation of the sloops still more critical, the British now lined the woods on each side of the river, and opened upon them with musketry. This fire was returned with constant discharges of grape and canister, and, in this manner, the contest was continued for several hours, with great gallantry on both sides. About four hours after the commencement of the action, a shot from one of the galleys struck the Eagle under her starboard quarter and passed out on the other side, ripping off a plank under water. The sloop went down almost immediately, but fortunately in shoal water, and her crew were taken off by boats sent from the shore; soon after this accident, the Growler had her fore stay and main boom shot away, when she became unmanageable and ran ashore.

In this engagement the Growler had one killed and eight wounded, and the Eagle eleven wounded, including the pilot, Mr. Graves. The whole number of men on board both vessels, when they went into action, was one hundred and twelve, including Captain Herrick and thirty-three volunteers from his company. The officers and men were taken prisoners and sent to Canada. The two sloops, having been refitted, were transferred to the British service, their names being changed to the Finch and Chubb, and were subsequently re-captured by Macdonough in September, 1814. The loss to the British, in this engagement, was never correctly ascertained. It must have been very severe, howev-

er, as their forces advanced to the bank of the river, where, destitute of shelter, they received broadside after broadside of canister and grape. A sergeant of the 11th Regiment, who had volunteered on board one of the sloops, and who was paroled on account of his wounds, reported that he counted thirty of the enemy dead upon one small spot.*

The capture of the Growler and Eagle gave to the British the superiority on the lake. In July Macdonough increased his naval force, which by the loss of the Growler and Eagle had been reduced to one sloop, by the addition of six gun-boats, and, by the 20th of August, had fitted out and armed three small sloops, mounting together 28 guns. This increased the American force on the lake to about fifty guns. In the official returns in the Admiralty office, it is stated that the British had at Isle Aux Noix or St. Johns, on the 24th of July, two sloops of eleven guns and forty men each, and three gun-boats of twenty men each. Other accounts state their naval force, in August, at three sloops, four gun-boats and three row-galleys, mounting in all about forty-two guns. The efficacy of this arm was however less than the number of guns would seem to indicate, for the sloops, on both sides, were originally built and used in the transport service, and were not adapted to war purposes.

Before the American flotilla had been increased by the addition of the three sloops, a party of British, under Colonel Murray, made a descent upon Plattsburgh, and destroyed or took away a large amount of public and private property. Although this was in fact nothing but a predatory incursion, it was treated by the English, at the time, as a most glorious achievement, and has been so considered by their historians up to the present day. Mr. Alison, in his history of Europe, a work replete with errors in relation to the military operations on this frontier during the war of 1812, refers to the expedition, and says that "the English flotilla, with nine hundred

*The current belief, in the neighborhood of the action, was that the British loss exceeded two hundred, but this was probably an exaggeration.

men on board, stretched across the lake, took Plattsburgh, which was evacuated by twelve hundred Americans, without firing a shot, burned part of the naval stores and brought away the rest, and also destroyed the American naval establishments at Champlain and Burlington."

A greater number of errors could not well be collected in so few words. Alison has overrated the number of Americans at Plattsburgh, diminished the actual strength of the British, and misstated every circumstance connected with the transaction. The force under Colonel Murray was embarked on two war sloops, three gun-boats and forty-seven long-boats, and numbered over fourteen hundred men, including infantry, sailors and marines. With this force Murray crossed the lines on the 30th of July, passed Champlain, where the Americans had not then, nor ever had, a naval establishment, and on the afternoon of Saturday, the 31st, arrived at Plattsburgh, where he landed, without opposition, and began a work of destruction which continued until ten o'clock of the next day, when he re-embarked and stood out of the Bay. At the time the British landed, there were no regular troops on the west side of the lake. Major General Hampton, it is true, was at Burlington on the opposite side, twenty miles distant, with between three and four thousand men under his command, but, from some unaccountable cause, he made no attempt to cross the lake or to protect the village of Plattsburgh, although he had twenty-four hours notice of the intended attack. While the British were at Plattsburgh, about three hundred militia were hastily collected, but they did not approach the village until the enemy had retired.

When Colonel Murray first entered the village, he assured the civil authorities that private property should be respected, and that citizens, not in arms, should remain unmolested. These promises were, however, most shamefully violated, for the British, not satisfied with destroying the block-house, arsenal, armory and hospital in the village, and the

military cantonment near Fredenburgh Falls, two miles above, wantonly burned three private store-houses, took possession of about two thousand dollars worth of hardware, belonging to merchants of the city of Boston, and plundered several private dwellings, destroying furniture and such articles as they could not use or carry away. The value of the private property plundered exceeded eight thousand dollars. Inventories of this property were prepared and published at the time, and include long lists of furniture, books, clothing, cooking utensils, groceries and dry goods. Soldiers would break into private dwellings and bear off back loads of property to the boats, in the presence of British officers, who, when remonstrated with by the plundered citizens, replied that they could not prevent it, as the men did not belong to their company.* The value of the public property destroyed was estimated at twenty-five thousand dollars.

Colonel Murray, having accomplished the work of destruction, retired in great haste, leaving behind him a picket-guard of twenty-one men, who were made prisoners and sent to Burlington. The long-boats and two of the gun-boats then proceeded to Swanton, Vt., where the men burned some old barracks, and plundered several citizens of the place. On their way, they landed at Cumberland Head and Point Au Roche, and pillaged the houses and farms of Henry W. Brand, Judge Treadwell and Jereniah Stowe. They also burned a store at Chazy Landing belonging to Judge Saxe. The two sloops and the other gun-boat, after leaving Plattsburgh, stood for the south and sailed ten or twelve miles above Burlington, when they returned towards Canada. As the vessels passed Burlington they fired a few shots at the place, but bore away as soon as the batteries on shore began to play upon them. While on the lake, the

*It appears by the inventories of plundered property, published at the time, that Judge De Lord lost \$1079.18; Peter Sailly, Esq., \$887.77; besides two store-houses burned and valued at \$900; Judge Palmer \$386.50; Doctor Miller \$1200; Bostwick Buck \$150; Jacob Ferris \$700: several smaller amounts were lost by other citizens. A store-house belonging to major Platt was also burned at the time.

British took or destroyed eight or ten long-boats engaged in the transportation business, and captured a Durham boat loaded with flour.

While Colonel Murray was at Plattsburgh he dropped a letter from his hat, which was afterwards picked up, and found to contain information as to the best mode of attack on Plattsburgh, together with a map of the encampment and military works at Burlington. A few days afterwards the person who wrote the letter was arrested on a charge of high treason, and sent to Albany for safe-keeping.

CHAPTER XI.

Plan of the Campaign of 1813—Hampton at La Colle and Chateaugay—Colonel Clark at Missiseo Bay—Skirmishes—Operations on the Lake—Dispute between the Vermont Volunteers and Governor Chittenden—Failure of the Campaign of 1813—Battle of La Colle Mill—British attack the Works near Otter Creek—Operations during the Summer—Death of Colonel Forsythe—Izard ordered to the West—Condition of Affairs after his Departure.

In July 1813, Major General James Wilkinson assumed the command of the Northern Department. About the same time, the American Secretary of War, Mr. Armstrong, repaired to Sackett's Harbor to supervise the military operations on the Ontario frontier. The plan of the Secretary contemplated "a descent upon Kingston, and a subsequent movement down the St. Lawrence." A large force was also collected at Burlington, on Lake Champlain, which was placed under the immediate command of Major General Hampton.

About the 1st of September, Hampton was directed to move towards the British posts on the Richelieu, in order to create a diversion in favor of the Western Army, and to co-operate, if necessary, with Wilkinson in an attack upon Montreal. The American troops, numbering about four thousand men, were immediately concentrated at Cumberland Head, where they were joined by a body of New York Militia, who had been called into service by Governor Tompkins. On the 19th, the Infantry and light troops moved from Cumberland Head in boats, flanked on the right by Macdonough's flotilla, and at twelve o'clock at night reached Chazy Landing. The next morning they entered the Big Chazy river, and disembarked at the foot of the rapids, near

the village of Champlain, where they were joined by a squadron of Horse and two companies of Artillery. The same day the army moved north as far as Odletown, in Canada. Hampton remained one day in Canada, when learning that the springs and streams, in the direction of the St. Lawrence, had been dried up by an unusual drought, he determined to change his route, and to approach Montreal by the way of the Chateaugay.

On the 21st, the army returned to Champlain, and, on the evening of the 24th, reached Chateaugay Four Corners, where they remained inactive for twenty-six days. On the 16th of October, Mr. Armstrong was at Sackett's Harbor, debating whether he should attack Kingston, or make an immediate descent upon Montreal. Hampton was ordered to advance to the mouth of the Chateaugay River, or to some other convenient point on the St. Lawrence, from which an easy and direct communication could be opened between the two armies. In pursuance of this order, he entered Canada on the 21st, and the next day encamped on the Chateaugay, at a point about twenty miles below the Four Corners.— There he remained until the 20th, when he planned an expedition against a small body of British troops, who were stationed about six miles below. The expedition failed, and Hampton returned to the Four Corners, with a loss of thirty-five men, in killed and wounded. A few days afterwards he broke up his camp and returned to Plattsburgh, where the army was ordered into winter quarters.

While the army lay at Chateaugay, Colonel Isaac Clark,* who commanded a detachment of troops stationed at Champlain Village, was ordered to "commence a petty war near Lake Champlain." "What am I aiming at," writes Hampton, "is tranquility on the road, by kicking up a dust on the lines."† A better officer than Clark, to accomplish this ob-

*Colonel Clark served in the Revolutionary War. He was a Lieutenant in Captain Ebenezer Allen's Company, and took part in the surprise of Mount Defiance, in September 1777.

†Letter to Secretary of War, October 4th, 1813.

ject, could not have been selected. He had served with Herrick's Rangers in the Revolution, and was well skilled in border warfare.

On the evening of the 11th of October, Clark crossed the lake with one hundred and ten men, a part of whom belonged to the Rifle Corps, and early the next morning reached the village of Missiseo Bay, where a small party of British were stationed, under command of Major Powell. Clark placed himself at the head of the Rifles, and advanced at double quick time until he met the main body of the enemy, who had been hastily drawn up near the guard-house. Directing his men to halt, he approached the British and ordered them to lay down their arms. Major Powell advanced and attempted to speak, but Clark sternly ordered him to remain silent, and march "to the rear of the American line." The boldness of the order, and the confident tone in which it was given, induced the Major to believe that the Rifles were supported by a large force, and he instantly obeyed. Clark ordered his men to advance against the main body, who, under command of their Captain, was preparing to charge. A volley from the Riflemen struck down the Captain and several men, when the rest threw down their arms and surrendered themselves as prisoners of war. Captain Finch was now sent forward to watch a force of two hundred British, who were advancing under Colonel Lock. Finch proceeded with such promptness and secrecy, as to surprise an advance guard of Cavalry, except one man who escaped and gave information of the approach of the Americans, when Colonel Lock immediately retreated with the rest of his command. The loss of the British, in these attacks, was nine killed and fourteen wounded. One hundred and one prisoners were taken by Clark and sent to Burlington.

During the autumn of this year, a slight skirmishing war was carried on between the American and British picket-guards, which kept the frontier in a state of excitement and

alarm, without, however, doing much injury to either party. Upon one occasion, about the 1st of October, a small party of New York militia crossed the lines and attacked a picket-guard stationed at Odletown, within the district under command of Major Perreault of the Canadian detached Volunteers. The audacity of this act excited the ire of the Canadian officer, who, in retaliation, discharged a gasconade at the whole town of Champlain.

"Citizens of Champlain!" exclaimed the indignant Major, "I am happy that humanity should still have so much power over me as to inform you that, should any of the militia of Champlain be found hovering this side of the line, I will let loose upon your village and inhabitants the Canadian and Indian force under my command. You are probably aware that it has been with the greatest difficulty I have till now withheld them. But your cowardly attack at midnight, of a small picket of our's, has torn asunder the veil which hid you from them—*so beware!*!" This message was enclosed in a note to Judge Moore, with a request that he would acquaint the people with "the tenor of the humane advertisement." Judge Moore performed his duty, but the militia were obdurate.

As soon as the army had retired into winter quarters, Hampton repaired to Washington, leaving General Izard in command at Plattsburgh, and General Parker at Burlington. Izard was soon afterwards ordered to join Wilkinson, who, on Hampton's return to Plattsburgh, had gone into winter quarters at French Mills. On the departure of Izard's brigade, the frontier on the western side of the lake was again left unprotected. About the middle of December, a strong detachment of British troops, under command of Captain Barker of the frontier light Infantry, crossed the lines into Vermont and destroyed some public store-houses and barracks which had been erected at Derby. This attack, and the threatening movements of the British forces stationed along the Richelieu, induced the magistrates

of Plattsburgh to address a letter to General Wilkinson, who was then at French Mills, in which they represented the exposed condition of the public property, and their apprehension that another invasion might soon be expected, unless a strong force was stationed on the west side of the lake. As soon as Wilkinson received this letter, he ordered a company of dragoons to Plattsburgh from Burlington, and a detachment of Infantry from Chateaugay Four Corners.—The Infantry reached Plattsburgh on the 8th of January, having made a forced march of forty miles that day. Other detachments of troops soon afterwards arrived, and on the 10th, Wilkinson repaired to Plattsburgh in person. The camp at French Mills was broken up, and all the magazines and provisions forwarded to Lake Champlain.

The operations on the lake, during the autumn of 1813, were of little importance. The British flotilla remained in the Richelieu, while the American vessels rode quietly at anchor on the lake. About the 1st of December, Macdonough moved to King's Bay and anchored under Point Au Fer. A few days after his arrival at that place, Captain Pring entered the lake with six armed galleys, landed at Rouse's Point, and burned a small shed there, which had been used as a public store-house. As soon as Macdonough received information of the approach of the British galleys, he weighed anchor, and, it being calm at the time, attempted to work out of the bay with sweeps. At the same time he sent Lieutenant Cassin forward, with four row-galleys, with orders to bring the enemy into action, and thus detain them until the sloops could get up. The British, however, refused to engage, and Lieutenant Cassin returned after an unavailing pursuit of three miles.*

Sir George Provost gives a different and erroneous account of this trifling affair. In a letter to Earl Bathurst, under date of December 12th, he says “A division of gun-boats, with a detachment of troops, which I had ordered, on

* Macdonough to Secretary of Navy, December 5th, 1813.

the 1st of the month, to advance into Lake Champlain, for the purpose of molesting General Hampton's division, succeeded in burning an extensive building lately erected at Plattsburgh, as a depot magazine ; some bateaux, together with the ammunition, provisions and stores found in it, were either brought away or destroyed. The severity of the weather obliged Captain Pring, of the royal navy, under whose command I had placed the expedition, to return to Isle Aux Noix on the 5th." Sir George was evidently misinformed as to the facts, by the officer in command of the expedition.

The "extensive building lately erected at Plattsburgh as a depot magazine," was a small shed near the lake shore at Champlain Landing, which *had formerly been* in public use, and the smoke from which gave the first information to Macdonough of the enemy's approach. A few days after this affair, the ice blocked up the narrow channel below Rouse's Point, when Macdonough withdrew his vessels, and laid them up for the winter in Otter Creek.

In November of this year, a dispute arose between Governor Chittenden of Vermont and some of the citizens of that State, involving the right of the militia, in certain cases, to pass without the territorial limits of their own State.—The Governor, in his annual message, had taken strong grounds against the war, which he considered "doubtful as to its necessity, expediency or justice." He also declared that the militia were exclusively assigned for the service and protection of the respective States, except in the cases provided for by the National Constitution.—That it was never intended that they should, "by any kind of magic," be at once transformed into a regular army for the purpose of foreign conquest, and he regretted that a construction should have been given to the Constitution, "so peculiarly burdensome and oppressive to that important class of our fellow citizens."

In opposition to these friendly suggestions, a portion of the

militia, under Lieutenant Colonel Luther Dixon, crossed the lake and placed themselves under the orders of General Hampton. This movement called forth a proclamation from the Governor, in which he ordered the militia to return, and hold themselves in readiness to act under the orders of Brigadier General Davis, who had been appointed to the command of their brigade. "The military strength and resources of the State," says Governor Chittenden, "must be reserved for its own defence and protection, *exclusively*, except in cases provided for by the Constitution of the United States, and then under orders derived *only* from the Commander-in-Chief."

This proclamation was distributed among the volunteers, who were then stationed at Plattsburgh, and created great excitement with both the officers and men. The agent, by whom it had been circulated, was arrested and held to bail, in a large amount, for his appearance before the United States District Court. The officers also published a reply to the proclamation, in which, in very plain terms, they informed the Governor that they should not obey his orders, but should remain in service until regularly discharged. In this reply they say ; " If it is true, as your Excellency states, that we are out of the jurisdiction or control of the Executive of Vermont, we would ask from whence your Excellency derives the right, or presumes to exercise the power of ordering us to return from the service in which we are engaged? If we are legally ordered into the service of the United States, your Excellency must be sensible that you have no authority to order us out of that service. If we are illegally ordered into the service, our continuance in it is either voluntary or compulsory. If voluntary, it gives no one a right to remonstrate or complain ; if compulsory, we can appeal to the laws of our country for redress against those who illegally restrain us of our liberty. In either case we cannot perceive the right your Excellency has to interfere in the business."

This was pretty sharp firing, and effectually silenced the Governor's batteries. The brigade remained at Plattsburgh, until it became known that the contemplated invasion of Canada had been abandoned for the winter, when the volunteers returned to Vermont, and probably put themselves "under the command of Brigadier General Davis."

The campaign of 1813 was directed towards the important Military posts on Lake Ontario and the St. Lawrence river. It commenced with bright prospects of success, but failed through the imbecility of the officers who had been called to the head of the army. The people were deeply disappointed at the result. They had placed great confidence in their commanding Generals, whose numerous dispatches were written in lofty style, and were filled with predictions of most brilliant victories. "I am destined to and determined on the attack of Montreal, if not prevented by some act of God," cries Wilkinson, on the 6th of November, from the head of an army of 8000 men.* "The Rubicon is now passed, and all that remains is to push forward to the Capitol," is the bold declaration of Hampton.† Vain and empty boasting. Two weeks later, the one was quietly settled at Plattsburgh, and the other was building winter quarters at French Mills and Chateaugay.

The campaign of 1813 is closed. General Wilkinson attributed its failure to the refusal of Hampton to join him at St. Regis, on the St. Lawrence. He declared that by a junction of the two armies he could have secured Montreal in eight or ten days. "It is a fact," he writes the Secretary of War, "for which I am authorized to pledge myself on the most confidential authority, that on the 4th of the present month [November,] the British garrison of Montreal consisted solely of four hundred marines and two hundred sailors, which had been sent up from Quebec. What a golden,

*Letter to General Hampton.

†Letter to Secretary of War, Nov. 12.

glorious opportunity has been lost by the caprice of Major General Hampton.”*

General Hampton, on the contrary, censured Wilkinson for desiring a junction of the two armies, with the scanty supply of provisions within reach of St. Regis. He contended that to have moved forward, with the 4000 troops under his command, would have seriously weakened, if it did not destroy both armies. That his true course was to throw himself upon his main depots at Plattsburgh, and from that point to open a communication direct to Caughnawaga ; which would relieve the western army, and at the same time retain all the benefits to be expected from a junction at St. Regis.†

In December General Hampton was withdrawn from the frontier, but General Wilkinson retained his command until after the unsuccessful attack upon a grist-mill in La Colle, when he too was ordered to Head Quarters. The assault on the La Colle mill was made on the 30th of March 1814. About the first of that month Major Forsyth had been sent to the lines, near Champlain, with 300 Riflemen and 60 Dragoons to protect the frontier, and to break up an illicit intercourse which had been carried on with the enemy during the winter. Detaehments had also been sent to the Vermont frontier, under command of General Macomb and Colonel Clark, for a similar purpose. About the same time General Wilkinson examined the country around Rouse’s Point, with a view to the erection of batteries there, which should command the outlet of the lake and blockade the British flotilla within the Richelieu.

These movements alarmed the British, who hastened to strengthen their military posts in the vicinity of Rouse’s

*A “glorious opportunity” indeed, for two large armies to capture six hundred men !

†About one month prior to this time, Hampton attempted this very route, and backed out before he had penetrated four miles into Canada. Referring to the dispatches of the two northern Commanders, Mr. Niles, in his Register, exclaims, “The *cacoethes scribendi* again rages with singular violence in the army, with symptoms fatal to gallons of ink and hundreds of goose quills !”

Point. Major Hancock, of the 13th, occupied La Colle with six hundred men, and the forts at St. Johns and Isle aux Noix were garrisoned by about two thousand men, under command of Lieutenant Colonel Williams of the same regiment. When Wilkinson learned that the British force near the lines had been increased, he ordered the troops stationed at Plattsburgh to be advanced to Champlain, where he also directed Macomb and Clark to concentrate their respective commands. On the 29th of March, four thousand men were collected at Champlain, of whom 100 were cavalry and 304 artillerists. The latter had with them eleven pieces of cannon of small calibre. Wilkinson now planned an attack against Major Hancock, who occupied a grist-mill on the banks of the La Colle river, about five miles north of the lines.

On the morning of the 30th, the American army marched out of Champlain, upon the Odletown road. The advance guard was composed of the Rifles under Major Forsyth, and the 30th and 31st and part of the 11th Infantry, under Colonel Clark ; in all about 600 men. They were followed by two corps of Infantry, under Brigadier Generals Bissell and Smith. A reserve of 800 men, under General Macomb, brought up the rear. The roads at this time were obstructed by fallen trees and by heavy drifts of snow, and were nearly impassable for artillery. The guides, too, were ignorant of the country, and led the army off from the main road into a very narrow and crooked winter path, leading from Odletown to La Colle. On the way to La Colle, Bissell's corps was attacked by, and after a short skirmish repulsed a party of Canadian militia, who had been stationed as a picket on the main road at Odletown.

The La Colle mill, against which the Americans were now advancing, was a strong stone building. The walls had been braced on the inside with heavy timbers, the windows closed up, and port holes made, in every direction, for the fire of musketry. A small clearing, of from one to two

hundred yards in width on each side of the river, surrounded the mill. The woods adjacent were of small growth but very thick. The river, at the mill, was frozen over, but below it was open to its mouth. The Richelieu was also open from the mouth of the La Colle to Isle Aux Noix.

The American troops did not reach the ground until between one and two o'clock in the afternoon, when a portion of Bissell's brigade took a position to the south of the building and commenced the attack, which, for the first half hour, was confined to a fire of musketry. Major McPherson then brought up a twelve pounder, which he planted about two hundred and fifty yards to the south of the mill. With this gun a brisk but ineffectual fire was directed against the rear of the building, and afterwards against the side wall.

When it was ascertained that the gun was too light to break down the walls, orders were given to bring up an eighteen pounder, but its carriage had broken down, three miles back, and could not be repaired in time to be of service during the day. The cannonade upon the mill was returned by a brisk discharge of musketry, which was kept up during the whole attack, but did little damage, as the American troops were posted out of range of the fire. In the course of the afternoon, an unsuccessful assault was made upon a detachment of Americans who guarded the north banks of the La Colle, by two companies of the 13th Regiment, sent from Isle Aux Noix to reinforce the garrison in the mill. While these companies were engaged, a sortie was made against the centre of the American line. The attack was executed with great gallantry but did not succeed, although the artillery were driven from the gun, which would have been captured, had not a portion of General Bissell's brigade been sent to its rescue. A short time afterwards, another attack was made upon the gun by a Grenadier Company of the Canadian fencibles and a Company of Voltiguers, who had followed the movement of the troops from the Odletown road. This attack was also unsuccessful. The two

Companies, however, succeeded in gaining a block house which stood below the mill. The loss of the Americans in these attacks was 104 killed and wounded, while that of the British was reported by them at 10 killed and 46 wounded. Among the wounded on the side of the Americans were Captain McPherson and Lieutenant Larabee of the Artillery; Lieutenants Green and Parker of the Infantry and Lieutenant Kerr of the Rifles. Lieutenant Parker was struck by a random shot. He survived his wounds for several days, and expressed a most sincere regret that he had not fallen in close action: "Hard is my lot," he exclaimed, "that I should have received this wound at such a distance from the enemy, and where I was wholly inactive." Captain McPherson, on the contrary, was wounded while fighting at the head of his men, and, at the time, was not expected to recover. As they were bearing him from the field, several officers offered their personal services to carry him to Plattsburgh. The gallant captain paused a few moments and then, thanking them for the interest and regard they had manifested, added "I shall be sufficiently honored when you bear me to my grave." The same spirit of firmness was shown by the other officers, and by the wounded and bleeding privates. Lieut. Larabee, when some persons were pitying his misfortune, as he was passing to the rear of the field, exclaimed, "Have you never seen a man die?" A private, on receiving similar sympathy, cried, "Never mind it, I'll give them another fight." Another private, when struck down, cried out, "Give it to them, my boys, never flinch."

At the commencement of the assault a few cannon shots and several rockets were fired from a sloop, and from some gun-boats lying in the river below, but the fire was not continued, as it was soon ascertained that the American troops were perfectly protected by the intervening ground.* About sundown Wilkinson called in the detachments which

*Late in the day Lieutenant Creswick, of the Royal Navy, succeeded in landing two field pieces and getting them to the block-house, but they were not fired during the engagement.

had been sent to the north side of the river, and shortly afterwards retired with the whole army to Odletown. The next day he returned to Champlain. From this place General Macomb was sent to Burlington, while the main army fell back upon Chazy and Plattsburgh, to protect the military stores at the latter place.*

On the 9th of May, Captain Pring of the British navy ascended the Richelieu in the brig Linnet, accompanied by five sloops and thirteen row-galleys, and the next day came to anchor under Providence Island,† where he remained until the evening of the 13th. Macdonough was at this time at Vergennes, on Otter Creek, busily engaged in fitting out the American fleet, which lay at that place. As soon as he was informed that the British flotilla had entered the lake, he ordered Lieutenant Cassin, with a small party of sailors, to reinforce Captain Thornton, who had been sent from Burlington with a detachment of light Artillery to man a battery which had been erected at the mouth of Otter Creek. A brigade of the Vermont Militia were also ordered out, and were advantageously posted to oppose the enemy, in case he should attempt to land.

At day-break on the morning of the 14th, eight of the British galleys and a bomb sloop anchored off the mouth of Otter Creek and commenced a warm fire upon the battery, which was promptly returned. A brisk cannonade was kept up by both parties for one hour and a half, when the attack was abandoned.

After this repulse the galleys entered the Bouquet River, and ascended that stream for the purpose of seizing some Government flour, which had been deposited in the grist-mill at the Falls. On their return, the boats were fired into

*This account of the affair at La Colle is derived from the testimony of Bissell, Macomb, Clark, Totten, McPherson and others before the Court Martial, on the trial of General Wilkinson, in January 1815, and from the official report of Adj. General Baynes of the British army.

†This is one of the small islands lying near the south end of Grand Island, opposite Valcour.

by a company of militia who had hastily collected on the south bank of the river near its mouth. This fire killed or wounded nearly all the men in the rear galley. The boat afterwards drifted into the lake, and was towed off by small boats sent to its assistance. The galleys then joined the Brig and the three sloops, which, during the attack on the battery, had remained at anchor near the "Four Brothers." On the 16th Captain Pring returned to Isle Aux Noix. A few days afterwards Macdonough brought his fleet out of Otter Creek, and on the 29th cast anchor in Cumberland Bay, off Plattsburgh.

During the summer, the British and Americans were actively engaged in strengthening their positions along the Champlain frontier. Large reinforcements joined the army at Plattsburgh, while the garrisons at Chambly, St. Johns and Isle Aux Noix were increased by detachments of troops drawn from Montreal and Quebec. Major General Izard, who had succeeded to the command on the withdrawal of Wilkinson, was directed to erect a heavy battery at Rouse's Point, to guard the entrance from the Richelieu into the lake. Considering the occupation of that point hazardous, from its proximity to the enemy's posts at La Colle and Isle Aux Noix, he objected to erecting works there, and instead, caused a battery of four eighteen pounders and a large redoubt to be constructed on Cumberland Head.*

On the 11th of June, a light brigade, under command of General Smith, Forsyth's Regiment of Riflemen, and two companies of Artillery were encamped near the mouth of Dead Creek, about two miles north of the village of Plattsburgh. These troops advanced as far as Chazy on the 17th, and on the 27th occupied the village of Champlain. Smith's brigade was 1400 strong. At the latter date, Colonel Pierce, of the 13th Regiment, was at Chazy with 800 men, and

*The works on Cumberland Head were commenced in opposition to the views of Colonel Totten, who considered they would not impede or materially injure a passing fleet. They proved useless, and were abandoned on the first approach of the British.

about 1200 men occupied the works on Cumberland Head, at Dead Creek and in the village of Plattsburgh. Macdonough's fleet lay at anchor in King's Bay. The British then held La Colle with a force of 3600 men. They also had strong garrisons at Isle Aux Noix and St. Johns. Muron's Regiment, 1000 strong, was at L'Acadie, two brigades of Artillery and 300 Cavalry at Chamblly, and 2000 regulars at Montreal. Their fleet lay at Isle Aux Tetes.

On the 24th of June, Lieutenant Colonel Forsyth, with 70 of his Riflemen, penetrated into Canada, as far as Odletown, where he was attacked by a detachment of two hundred British light troops. Forsyth returned to Champlain, with the loss of one killed and five wounded. A few days afterwards, he was ordered again to enter Canada, for the purpose of drawing the British across the lines, into an ambuscade. He advanced a few men on the main road leading to Odletown, who soon met a party of the enemy, when they retreated, closely pursued by about one hundred and fifty Canadians and Indians, under command of Captain Mahew, until they reached a point about half a mile south of the lines, where the main body of the Rifles lay concealed. As the enemy approached the ambuscade, Colonel Forsyth stepped upon a log to watch their movements. He had scarcely taken this exposed position, when he was shot down by an Indian; the ball passing through his breast. The Rifles immediately uncovered and fired upon the enemy, who retreated in great haste, leaving seventeen of their number dead upon the field.*

A few days afterwards, Captain Nelson, of the 10th Infantry, crossed into Canada with a small detachment, surprised a British picket in Odletown, took some of them prisoners and put the rest to flight. Skirmishes were very fre-

*Forsyth was the best partisan officer in the army. His men declared that they would avenge his death and a few days after crossed the lines and shot Captain Mahew, who commanded the Canadians and Indians at the time of Forsyth's death. Captain Mahew was taken to the residence of Judge Moore in Champlain, where he lingered about a week and died.

quent along the borders, during the months of July and August, although seldom attended with any considerable loss to either side.

On the 31st of July, Macomb's brigade, consisting of the 6th, 13th, 15th, 16th and 29th Regiments, set out in boats from Cumberland Head, for Chazy landing. The same day Bissell's brigade, of the 5th, 14th, 30th, 31st, 33d, 34th, and 45th Regiments, started for Chazy by land. This movement placed three brigades, in all 4500 strong, at and in rear of the village of Champlain. The invalids and 200 effectives of Macomb's brigade were left behind, to finish the works at Cumberland Head, and a working party of about 400 strong, of Bissell's brigade, was left at Plattsburgh, under Colonel Fenwick, to complete three redoubts which had been commenced near that village.

In the month of August, Sir George Provost repaired to the Isle Aux Noix, where he had concentrated a large body of men, including several veteran regiments who had lately distinguished themselves on the banks of the Adour and the Garronne. Every thing now indicated that a battle was soon to be fought on the Champlain frontier, which would decide the fate of the campaign, and the control of the whole country bordering on the Lake. It was at this moment that the Government determined to remove the troops from Lake Champlain, and to abandon the large amount of military stores and provisions collected at Plattsburgh, the lives and property of its citizens, and the great military key of the northern and eastern States to the protection of a few raw, worn-out, sick or disabled men. This strange movement evinced a reckless indifference on the part of the Government, as to the result of the War in this quarter.*

General Izard strongly protested against the removal of the troops, and repeatedly represented to the war department the fatal results that might be expected from such a movement. As late as the 20th of August, he writes the Secretary

*See Appendix.

of War, as follows : "I must not be responsible for the consequences of abandoning my present strong position. I will obey orders and execute them as well as I know how. Major General Brisbane commands at Ogdensburg; he is said to have between five and six thousand men with him. Those at Champlain are stated to be about four thousand." On the 23d, he again writes that he has decided to move west, by way of Lake George and Schenectady, with 4000 men, leaving the sick and convalescents, and about 1200 men, to garrison Plattsburgh and Cumberland Head, under command of Brigadier General Macomb.

Receiving no counter orders Izard, on the 29th of August, left Champlain and Chazy with the 4th, 5th, 10th, 12th, 13th, 14th, 15th, 16th and 45th, Infantry, the light artillery armed as Infantry and the dragoons, and slowly and reluctantly moved towards the west. On the 3d of September his corps reached Lake George where they remained two days, anxiously expecting orders to return to Plattsburgh. No such orders arrived, and Izard again put his column in motion. On the 7th he reached Schenectady, from which place he urged on more rapidly towards the west.

As soon as Izard left, General Macomb concentrated his whole force at Plattsburgh, where he commenced immediate preparations to resist an attack. From the returns of the 28th of August, it appears that on that day he had the following troops within the limits of his command :

Detachments of the Regiments and Corps that marched.....	77
Capt. Leonard's Company of Light Artillery,....	100
Capt. McGlassin's Company, 15th Regt.....	50
The 6th, 29th, 30th, 31st, 33d and 34th Regi- ments, reported from the aggregate present on the 31st July,.....	1771
Capt Sproul's Detachment of 13th Regt.....	200
Sick and invalids of the Regiments and Corps that left.....	803
Aggregate.....	3001

There were two veteran companies of Artillery under Captain Alexander Brooks, which were omitted in the return. Two hundred and fifty Infantry were also on board the fleet, doing duty as marines. This brought the whole force to about 3400 men, of whom over 1400 were invalids or non combatants.* With this force Macomb prepared to resist the advance of fourteen thousand veteran British soldiers.

*General Macomb in his detailed report of the battle of Plattsburgh says, " Except the four Companies of the 6th regiment, I had not an organized battalion among those remaining ; the garrison was composed of convalescents and the recruits of the new regiments—all in the greatest confusion, as well as the ordinance and stores ; and the works in no state of defence."

CHAPTER XII.

Sir George Provost invades the United States—Preparations at Plattsburgh to resist his advance—Description of the American Forts &c. The British encamp at Chazy—Battle of Beekmantown—Provost's position on the north banks of the Saranac—Captain McCassin attacks a British battery—American and British force on the lake—Naval engagement off Plattsburgh—Battle of Plattsburgh—Provost retreats to Canada—The Peace.

General Izard abandoned the camp at Champlain on the 29th of August, and the next day Major General Brisbane advanced his division from Odletown to that place. On the 3d of September fourteen thousand British troops were collected at Champlain. This force was composed of four troops of the 19th light dragoons, 300 men ; two companies Royal Artillery, 400 men ; one brigade of rocketeers, twenty-five men ; one brigade Royal Sappers and Miners, seventy-five men ; the first brigade of Infantry, consisting of the first battalion of the 27th Regiment, the 58th and 5th, and the 3rd or Buffs, in all 3,700 men, under command of Major General Robinson ; the second brigade, formed by the 88th and 39th, and the third battalions of the 27th and 76th, in all 3,600 men, under Major General Powers ; the third brigade, composed of the second battalion of the 8th or King's, and the 18th, 49th and 6th, 3100 men, under Major General Brisbane. There was also a light brigade 2,800 strong, composed of Muron's Swiss Regiment ; the Canadian Chasseurs, the Voltiguers and the frontier light Infantry. The whole was under Sir George Provost, Governor General of Canada ; Lieutenant General De Rottenburgh being second in command.

On the 4th, the main body reached Chazy village, and the next night, encamped near Sampson's, about eight miles from the village of Plattsburgh. At the same time Captain Pring, with a number of gun-boats, moved up the lake as far as Isle La Motte, and erected a battery of three long 18 pounders on the west side of that Island, to cover the landing of the supplies for the troops.

Brigadier General Macomb was now at Plattsburgh actively engaged in preparations to resist the expected attack. On the 3d of September, he issued a general order detailing his plan of defense. "The troops (says this order) will line the parapet in two ranks, leaving intervals for the Artillery. A reserve of one fifth of the whole force in Infantry, will be detailed and paraded fronting the several angles, which it will be their particular duty to sustain. To each bastion are to be assigned, by the several commanders of forts, a sufficient number of Infantry to line all the faces (in single rank) of each tier. Should the enemy gain the ditch, the front rank of the part assailed will mount the parapet and repel him with its fire and bayonet. If the men of this rank are determined, no human force can dispossess them of that position."

The American works were built upon an elevated plain, lying between the banks of the river Saranac and Lake Champlain. The river descends from the west until it approaches within about one hundred and sixty rods of the lake, and then turns towards the north and runs about one mile, in a northeasterly direction, to the lake. The land between the river and lake, at this point, is nearly in the shape of a right angled triangle ; the perpendicular being formed by the lake shore. About eighty rods above the mouth of the river, and near the center of the village, is the "lower bridge," and about one mile higher up, following the course of the stream, was another bridge, on the road leading south to Salmon River, called the "upper bridge." One mile and a half above this

bridge is a ford of the river.* The stream can also be forded at the bridges, and at a point about midway between them. The south bank of the river, above the village, is from fifty to sixty feet high, and steep. About sixty rods above the "lower bridge" is a deep ravine, running back from the river and extending nearly to the lake shore. The principal work, called Fort Moreau, stood opposite the bend of the river, and about half way between it and the lake. It was three fourths of a mile south of the lower bridge. A redoubt, called Fort Brown, stood on the bank of the river, directly opposite the bend, and about fifty rods west of Fort Moreau. There was another redoubt to the east of Fort Moreau, near the bank of the lake, called Fort Scott. On the point, near the mouth of the river, was a block-house and battery. Another block-house stood on the south side of the ravine, about half way between the river and the lake. The defense of Fort Moreau was entrusted to Colonel Melancton Smith, who had for its garrison the 29th and 6th Regiments. Lieutenant Colonel Storrs was stationed in Fort Brown, with detachments of the 30th and 31st, and Major Vinson in Fort Scott, with the 33d and 34th. The block-house, near the ravine, was entrusted to Captain Smith of the Rifles, and had for its defense a part of his Company and of the convalescents of one of the absent Regiments. The block-house on the point was garrisoned by a detachment of Artillery, under Lieutenant Fowler. The light artillery were ordered to take such position as would best annoy the enemy. When not employed they were to take post in the ravine, with the light troops.

As soon as the British had advanced to Chazy village, Captain Sproul was ordered by General Macomb, with two hundred men, of the 13th, and two field pieces, to take position near the Dead Creek bridge, and to abatis the road beyond, while Lieutenant Colonel Appling was stationed in

*This ford is near the spot where General Pike encamped in 1812. The buildings were burned by Colonel Murray in 1813.

advance, with one hundred and ten riflemen, and a troop of New York State Cavalry, under Captain Safford and Lieutenant M. M. Standish, to watch the movements of the enemy. Macomb also made arrangements with Major General Mooers for calling out the New York Militia, and addressed a letter to Governor Chittenden, of Vermont, requesting aid from that State. On the 4th, seven hundred of the Clinton and Essex Militia had collected at Plattsburgh.* They were advanced the next day about five miles on the north road, and lay during the night in the vicinity of the present Stone Church in Beekmantown. The militia were directed to watch the enemy, skirmish with him as he advanced, break up the bridges and obstruct the road with fallen trees.

On the 5th, as we have already stated, the British occupied a position near Sampson's, on the lake road. The troops were there divided into two columns, and moved towards the village of Plattsburgh on the morning of the 6th, before day-light; the right column crossing over to the Beekmantown road; the left following the lake road leading to the Dead Creek bridge. The right column was composed of Major General Powers' brigade, supported by four companies of light Infantry and a demi-brigade under Major General Robinson. The left was led by Major General Brisbane's brigade. Information of this contemplated movement having reached General Macomb on the evening of the 5th, he ordered Major Wool, with a detachment of two hundred and fifty men, to advance on the Beekmantown road to the support the militia. Captain Leonard, of the light Artillery, was also directed to be on the ground, before day-light, with two field pieces.

The right column of the British advanced more rapidly than the left, and, at an early hour, met Major Wool's detachment and the militia, who had taken a position near the

*These belonged to Colonel Thomas Miller's and Colonel Joiner's regiments, Major Sanford's battalion and the 37th regiment.

residence of Ira Howe, in Beekmantown. Wool's party opened a brisk fire of musketry upon the head of the British column as it approached, severely wounding Lieutenant West of the 3d Buffs, and about twenty privates. Near this place Goodspeed and Jay, two men of Captain Atwood's company of militia, were wounded and taken prisoners.—Wool, with his men, now fell back as far as Culver's Hill, four and a half miles from the village, where he awaited the approach of the British. He was supported by a few of the militia who had been rallied by their officers, but the greater portion had retreated precipitately, after the first fire near Howe's. The resistance at Culver's Hill was intrepid but momentary, for the British troops pressed firmly forward, occupying the whole road, and only returning the fire by their flanks and leading platoons, the latter of whom were once driven to the base of the hill, after having reached its summit. At this point, Lieutenant Colonel Willington, of the 3d Buffs, fell as he was ascending the hill at the head of his Regiment. Ensign Chapman of the same Regiment was also killed there, and Captain Westropp, of the 58th, severely wounded. Several of the Americans were killed, including Patridge of the Essex militia.

Learning that a large body of the British were advancing on a parallel road, leading from Beekmantown Corners, to gain his rear, Wool fell back as far as "Halsey's Corners," about one and a half miles from the village bridge. He was there joined, about eight o'clock in the morning, by Captain Leonard with two pieces of light artillery. Leonard placed his guns in battery at an angle in the road, masked by Wool's Infantry and a small body of militia, and as the British approached opened a most galling fire upon the head of the column; the balls cutting a narrow and bloody lane through the moving mass. Three times were the guns discharged, but even this terrible fire did not check the progress of the column, for the men, throwing aside their knapsacks, pressed forward, the bugles sounding the charge, and

forced Leonard hastily to withdraw towards the village. At this place, a number of the British were killed or wounded. Among the latter was Lieutenant Kingsbury of the 3rd Buffs, who was taken into the adjoining farm-house of Isaac C. Platt Esqr., where he soon afterwards died.

Finding that the enemy's right column was steadily approaching the village, General Macomb ordered in the detachments at Dead Creek ; at the same time directing Lieutenant Colonel Appling to fall on the British flank. The rapid advance of the column on the Beekmantown road had reversed Appling's position, and he had barely time to save his retreat, coming in a few rods ahead, as the British debouched from the woods a little north of the village. Here he poured in a destructive fire from his Riflemen at rest, and continued to annoy the enemy, until he formed a junction with Wool, who was slowly retiring towards the lower bridge. The field pieces were taken across the bridge and formed a battery for its protection, and to cover the retreat of Wool's, Appling's, and Sproul's men. These detachments retired alternately, keeping up a brisk fire until they got under cover of the works.

The left column of the British army did not arrive near the village, until after Sproul's and Appling's detachments had been withdrawn ; their march having been retarded by the obstructions placed in the road, and by the removal of the bridge at Dead Creek. As this column passed along the beach of the lake, it was much annoyed by a brisk fire from several galleys, which Macdonough had ordered to the head of the bay. After this fire had continued for about two hours, the wind began to blow so heavy from the south as to endanger the safety of the galleys. Mr. Duncan, a midshipman of the Saratoga, was therefore sent in a gig to order them to return. As that officer approached, he received a severe wound from the enemy's fire, which for a few minutes was concentrated upon his boat.* About this time one

*On the 26th of May 1826, Congress passed a resolution of thanks to Midshipman Silas Duncan for his gallant conduct on this occasion.

of the galleys drifted under the guns of the British and sustained some loss, but was eventually brought off.

As soon as the American troops had crossed the river, the plank were removed from the lower bridge, and were piled up at its east end, to form a breast-work for the Infantry. A similar breast-work was made by the Militia, at the upper bridge. The British light troops made several attempts, in the course of the day, to cross at the village, but were repulsed by the guards at the bridge, and by the sharp fire of a Company of Volunteers who had taken possession of a stone grist-mill near by.* An attempt was also made to cross at the upper bridge, which was gallantly resisted by the Militia. The loss this day, on both sides, was greater than the whole loss during the rest of the siege ; forty-five of the Americans, and more than two hundred British having been killed or wounded.†

The configuration of the land, on the north side of the river, differs somewhat from that on the southside. The bank at the mouth of the river is abrupt and about thirty feet high. This bank, with a depression above the lower bridge, opposite the mill pond, follows the margin of the stream, until within about eighty rods of Fort Brown, when the hill recedes from the river, and is less abrupt. The flat and hill opposite Fort Brown were covered with small trees and bushes. About one mile back from the river is an ele-

*This Company was called "Aiken's Volunteers" and was composed of the following young men—none of whom were old enough to be liable to perform Military duty : Martin J. Aiken, Azariah C. Flagg, Ira A. Wood, Gustavus A. Bird, James Trowbridge, Hazen Mooers, Henry K. Averill, St. John B. L. Skinner, Frederick P. Allen, Hiram Walworth, Ethan Everest, Amos Soper, James Patten, Bartemus Brooks, Smith Batemen, Melaneton W. Travis and Flavius Williams. They had been out on the Beekmantown road in the morning, where they behaved with great gallantry. In May, 1826, Congress authorized the President to cause to be delivered to each, "One Rifle promised to them by General Macomb, while commanding the Champlain Department, for their gallantry and patriotic services as a Volunteer corps, during the siege of Plattsburgh in September 1814."

†General Macomb, in his general order of the 7th, estimates the British loss at from two to three hundred. The "Burlington Sentinel" of the 9th states it to have been about three hundred.

vated ridge running to the north. At Allen's farm-house, which stood upon this ridge at the distance of about one and one fourth mile from the American forts, Sir George Provost established his head-quarters. The army were encamped upon the ridge, and on the high ground north of the village.

From the 7th to the 10th, Provost was busily engaged in bringing up his battering trains and supplies, and in preparing his approaches. He erected a battery on the bank of the lake north of the mouth of the river ; another near the edge of the steep bank above the mill-pond ; another near the burial ground, and one, supplied with rocket works, on the hill opposite Fort Brown. Besides these, there were three smaller batteries erected at other points, within range of the American forts.

While Provost was thus engaged, the American troops were diligently at work, day and night, in strengthening their defenses. The barracks and hospitals in the vicinity of the forts were burned, and the sick removed to Crab Island, about two miles distant, where they were protected from the weather by tents. A small battery was erected on that Island, mounting two six pounders, which was manned by convalescents. The Americans also, during this time, fired hot shot into and burned some fifteen or sixteen buildings, on the north side of the river, which had afforded protection to the British light troops.*

From the 7th to the 10th, the pickets and Militia were engaged in frequent skirmishes with the enemy at the two bridges, and at the different fords along the river. On the morning of the 7th, a party of British, under Captain Noadie, attempted to cross the river, at a ford about five miles west of the village. They were, however, met by a

*The "Burlington Sentinel," says that up to the evening of the 8th, the following buildings had been burned : Jonathan Griffin's house and store ; Roswell Wait's house and store ; Mr. Savage's house ; B. Buck's house ; Mr. Powers' store ; Widow Beaumont's house and store ; Charles Backus' house and store, Joseph Thomas' two stores and Mr. Goldsmith's house. The Court House and Jail were also burned.

Company of Colonel Miller's Regiment of Militia, under command of Captain Vaughan, and were repulsed with a loss of two killed and several wounded. The same day Lieutenant Runk, of the 6th, was mortally wounded, as he was passing in the street, near the present dwelling of A. C. Moore, Esq.

On the night of the 9th, while the British were engaged in erecting their rocket battery near Fort Brown, Captain McGlassin of the 15th Infantry, obtained permission from General Macomb to take a party of fifty men and attack a detachment of British troops at work upon the battery. The night was dark and stormy and favored such an enterprise. Ordering his men to take the flints from their muskets, McGlassin crossed the river, and passing through a small clump of dwarf oaks, reached, unobserved, the foot of the hill upon which the enemy were at work. There he divided his force into two parties, one of which was sent, by a circuitous route, to the rear of the battery. As soon as this party had reached its position, McGlassin, in a loud voice, ordered his men to charge "on the front and rear," when they rushed forward, with all the noise it was possible for them to make, and entered the work at both sides on the run. The working party were taken by surprise, and supposing themselves attacked by overwhelming numbers, retreated precipitately towards the main camp. McGlassin spiked the guns and led his party back to the American fort without losing a man. The whole affair was boldly conceived and most gallantly executed. It was long before the British officers would believe that fifty men could make so much noise, or so badly frighten over three hundred of their veteran troops.

When the British army reached Plattsburgh, their gun-boats had advanced as far as the Isle La Motte, where they remained, under command of Captain Pring. On the 8th Captain Downie reached that place with the rest of the fleet, and on the morning of the 11th, the whole weighed an-

chor and stood south to attack the Americans, who lay in the Bay, off Plattsburgh.

As the British vessels rounded Cumberland Head, about eight o'clock in the morning, they found Macdonough at anchor a little south of the mouth of the Saranac river, and abreast, but out of gun shot, of the forts. His vessels lay in a line running north from Crab Island, and nearly parallel with the west shore. The *Brig Eagle*, Captain Henley, lay at the head of the line, inside the point of the Head. This vessel mounted twenty guns and had on board one hundred and fifty men. Next to her and on the south lay Macdonough's flag-ship, the *Saratoga*, mounting twenty-six guns, with two hundred and twelve men. Next south was the *Schooner Ticonderoga*, of seventeen guns, Lieutenant Cassin, with one hundred and ten men, and next to her, and at the southern extremity of the line, lay the *Sloop Preble*, Lieutenant Charles Budd. This vessel carried seven guns and was manned by thirty men. She lay so near the shoal extending north east from Crab Island, as to prevent the enemy from turning that end of the line. To the rear of the line were ten gun-boats, six of which mounted one long twenty-four pounder and one eighteen pound Columbiad each; the other four carried one 12 pounder. The gun-boats had, on an average, thirty-five men each. Two of the gun-boats lay a little north and in rear of the Eagle, to sustain the head of the line; the others were placed opposite the intervals between the different vessels, and about forty rods to their rear. The larger vessels were at anchor, while the gun-boats were kept in position by their sweeps.

The British fleet was composed of the *frigate Confiance*, carrying thirty seven guns,* with over three hundred men, commanded by Captain Downie; the *Brig Linnet*, Captain Pring, of sixteen guns and 120 men; the *sloop Chub*, Lieutenant McGhee and the *sloop Finch*, Lieutenant Hicks, car-

*There were thirty-nine guns on board the *Confiance*, but two of them were not mounted.—*Cooper.*

rying eleven guns and about forty-five men each. To these vessels were added twelve gun-boats of about forty-five men each. Eight of them carried two guns, and four, one gun each. Thus the force of the Americans consisted of one ship, one brig, one schooner, one sloop, and ten gun-boats, manned by eight hundred and eighty-two men, and carrying in all eighty-six guns. The British had one frigate, one brig, two sloops and twelve gun-boats, manned by over one thousand men, and carrying in all ninety-five guns. The metal of the vessels on both sides was unusually heavy. The Saratoga mounted eight long twenty-fours, six forty-twentys, and twelve thirty twos, while the Confiance had the gun-deck of a heavy frigate, with thirty long twenty-fours upon it. She also had a spacious top gallant forecastle, and a poop that came no further forward than the mizen mast. On the first were a long twenty-four on a circle, and four heavy carronades; two heavy carronades were mounted on the poop.*

When the British fleet appeared in sight the Finch led and kept in a course toward Crab Island, while the other vessels hove to opposite the point of Cumberland Head, to allow the gun-boats to come up, and to receive final instructions as to the plan of attack. The vessels then filled and headed in towards the American fleet, passing inside of the point of Cumberland Head; the Chub laying her course a little to windward of the Eagle, in order to support the Lin-

*Cooper's Naval History. Mr. Alison, (in his History of England, vol. 4.) says: "The relative strength of the squadron on this, as in every other naval action during the War, where the British were defeated, was decidedly in favor of the Americans"—a statement unwarranted by the facts, and unnecessary to sustain the high reputation of the British Navy. The following are the number and size of the guns used on both fleets.

net, which stood directly towards that vessel. Captain Downie had determined to lay the *Confiance* athwart the *Saratoga*, but the wind baffling, he was obliged to anchor at about two cables length from that ship. The *Finch*, which had run about half way to Crab Island, tacked and took her station, with the gun-boats, opposite the *Ticonderoga* and *Preble*.

As the British vessels approached they received the fire of the American fleet ; the *Brig Eagle* firing first, and being soon followed by the *Saratoga* and the sloop and schooner.* The *Linnet* poured her broad side into the *Saratoga*, as she passed that ship to take her position opposite the *Eagle*. Captain Downie brought his vessel into action in the most gallant manner, and did not fire a gun until he was perfectly secured, although his vessel suffered severely from the fire of the Americans. As soon however as the *Confiance* had been brought into position, she discharged all her larboard guns, at nearly the same instant. The effect of this broadside, thrown from long twenty-four pounders, double shotted, in smooth water, was terrible. The *Saratoga* trembled to her very keel ; about forty of her crew were disabled, including her first Lieutenant, Mr. Gamble, who was killed while sighting the bow gun.

Soon after the commencement of the engagement the *Chub*, while manœuvring near the head of the American line, received a broadside from the *Eagle*, which so crippled her that she drifted down between the opposing vessels and struck. She was taken possession of by Mr. Charles Platt, one of the *Saratoga*'s midshipman, and was towed in shore and anchored. The *Chub* had suffered se-

*The first gun fired on board the *Saratoga* was a long twenty-four, which Macdonough himself sighted. The shot is said to have struck the *Confiance* near the outer hawse-hole, and to have passed the length of her deck, killing and wounding several men, and carrying away the wheel. In clearing the decks of the *Saratoga*, some hen coops were thrown overboard and the poultry permitted to run at large. Startled by the report of the opening gun of the *Eagle*, a young cock flew upon a gun slide, clapped his wings and crowed. The men gave three cheers and considered the little incidence as a happy omen.—*Cooper's Naval History and Niles' Register*.

verely ; nearly half of her men having been killed or wounded. About an hour later the Finch was driven from her position by the Ticonderoga, and, being badly injured, drifted upon the shoal near Crab Island, where she grounded. After being fired into from the small battery on the Island, she struck and was taken possession of by the invalids who manned the battery.*

After the loss of the Finch, the British gun boats made several efforts to close, and succeeded in compelling the sloop Preble to cut her cables and to anchor in shore of the line, where she was of no more service during the engagement. The gun-boats, emboldened by this success, now directed their efforts towards the Ticonderoga, against which they made several very gallant assaults, bringing the boats, upon two or three occasions, within a few feet of the schooner's side. They were however as often beaten back, and the schooner, during the remainder of the day, completely covered that extremity of the line.

While these changes were taking place at the lower end of the line, a change was also made at the other extremity. The Eagle, having lost her springs and finding herself exposed to the fire of both the Linnet and Confiance, dropped down and anchored between the Saratoga and Ticonderoga, and a little in shore of both. From this position she opened afresh on the Confiance and the British gun-boats, with her larboard guns. This change relieved the Brig, but left the Saratoga exposed to the whole fire of the Linnet,

*Mr. Alison, (History of England, vol. 4,) referring to this event says, "The Finch, a British *Brig*, grounded out of shot and did not engage;" and again, "The Finch struck on a reef of rocks and could not get into action." Had Mr. Alison taken the trouble to read Captain Pring's official account of the engagement he would have found in it, the following statement ; "Lieutenant Hicks, of the Finch, had the mortification to strike on a reef of rocks, to the eastward of Crab Island, about the middle of the engagement, which prevented his rendering that assistance to the squadron, that might from an officer of such ability, have been expected." It is very convenient for the English historian to convert a small sloop of eleven guns and forty men into a *Brig*, and to keep that large vessel out of the action altogether, but, as I have before said, such statements are unnecessary to preserve the well-earned reputation of the British navy for bravery or gallantry in action.

which sprung her broadsides in such a manner as to rake the ship on her bows.

The fire from the Saratoga and Confiance now began materially to lessen, as gun after gun on both vessels became disabled, until at last the Saratoga had not a single available gun, and the Confiance was but little better off. It therefore became necessary that both vessels should wind, to continue the action with any success. This the Saratoga did after considerable delay, but the Confiance was less fortunate, as the only effect of her efforts was to force the vessel ahead. As soon as the Saratoga came around she poured a fresh broadside from her larboard guns into the Confiance, which stood the fire for a few minutes and then struck. The ship then brought her guns to bear on the Linnet, which surrendered in about fifteen minutes afterwards. At this time the British gun-boats lay half a mile in the rear, where they had been driven by the sharp fire of the Ticonderoga and Eagle. These boats lowered their colors as soon as they found the larger vessels had submitted, but not being pursued, for the American gun-boats were sent to aid the Confiance and Linnet which were reported to be in a sinking condition, they escaped together with a store sloop which lay near the point of Cumberland Head during the battle.

The engagement continued for two hours and a half, and was the most severely fought naval battle of the war. The Saratoga had twenty-eight men killed and twenty-nine wounded ; the Eagle thirteen killed and twenty wounded ; the Ticonderoga six killed and six wounded, and the Preble two killed. The loss on the gun-boats was three killed and three wounded. Total killed and wounded, one hundred and ten, being equal to every eighth man in the fleet. Besides, the Saratoga had been hulled fifty-five times and was twice on fire ; the Eagle was hulled thirty-nine times. The carnage and destruction had been as great on the other side. The Confiance had forty-one men killed and eighty-three wounded ; the Linnet reported her casualties at ten killed

and fourteen wounded, but the killed and wounded probably exceeded fifty ; the Chub was reported at six killed and ten wounded, and the Finch at two wounded. No account is given of the loss on the gun-boats, but, from their close and severe contest with the Ticonderoga, it must have been large. The total of killed and wounded on the British side was equal to at least one fifth of the whole number of men in their fleet. The Confiance had been hulled one hundred and five times. So severe had been the contest, that at the close of the action there was not a mast in either fleet fit for use.*

Among those killed on the side of the British were Captain Downie, who fell soon after the action commenced, Captain Alexander Anderson, of the Marines, Midshipman William Gunn of the Confiance, and Lieutenant William Paul and Boatswain Charles Jackson of the Linnet. Among the wounded were Midshipman Lee of the Confiance, Midshipman John Sinclair of the Linnet, and Lieutenant James McGhee, of the Chub. The American officers killed were Peter Gamble, 1st Lieutenant of the Saratoga, John Stansbury, 1st Lieutenant of the Ticonderoga, Midshipman James M. Baldwin and sailing Master Rogers Carter. Referring to the death of three of these officers, Mr. Cooper, in his History of the Navy, says :—“ Lieutenant Gamble was on his knees, sighting the bow-gun, when a shot entered the port, split the quoin, drove a portion of it against his breast and laid him dead on the quarter deck without breaking his skin. Fifteen minutes later one of the American shot struck the muzzle of a twenty-four on the Confiance, dismounted it, sending it bodily inboard against the groin of Captain Downie, killing him also without breaking the skin. Lieutenant Stansbury suddenly disappeared from the bulwarks forward,

*“ I could only look at the enemy’s galleys going off, in a shattered condition ; for there was not a mast in either squadron that could stand to make sail on ; the lower rigging being nearly all shot away, hung down as though it had been just placed over the mast heads.”—*Macdonough’s Report of the Battle.* “ Our masts, yards, and sails were so shattered, that one looked like so many bunches of matches, and the other like a bundle of rags.”—*Letter of Midshipman Lee of the Confiance.*

while superintending some duty with the springs of the Ti-
conderoga. Two days after the action, his body rose to
the surface of the water, and it was found that it had been
cut in two by a round shot."

It is said that scarcely an individual escaped on board of either the *Confiance* or *Saratoga*, without some injury. Macdonough was twice knocked down ; once by the spanker-boom, which was cut in two by a shot and fell upon his back, as he was bending his body to sight a gun ; and again by the head of a gunner, which was driven against him, and knocked him into the scuppers. Mr. Brum, the sailing-master of the *Saratoga*, had his clothes torn off by a splinter, while winding the ship. Mr. Vallette, acting Lieutenant, had a shot-box, on which he was standing, knocked from under his feet, and he too was once knocked down by the head of a seamen. Very few escaped without some accident, and it appears to have been agreed on both sides, to call no man wounded who could keep out of the hospital.* Midshipman Lee of the *Confiance*, who was wounded in the action, thus describes the condition of that vessel. "The havoc on both sides is dreadful. I don't think there are more than five of our men, out of three hundred, but what are killed or wounded. Never was a shower of hail so thick, as the shot whistling about our ears. Were you to see my jacket, waist-coat and trowsers, you would be astonished how I escaped as I did, for they are literally torn all to rags with shot and splinters ; the upper part of my hat was also shot away. There is one of our marines who was in the Trafalgar action with Lord Nelson, who says it was a mere *flea-bite* in comparison with this."†

*Cooper's Naval History.

†Letter to his brother, published in Niles' Register, vol. 8. The result of the engagement depended, from the first, upon the *Saratoga* and *Confiance*. When Maedonough anchored his vessel he not only attached springs to the cables, but also laid a kedge broad off on each bow of the *Saratoga*, and brought the hawsers in upon the two quarters. To this timely precaution he was indebted for the victory, for without the larboard hawser he could not have brought his fresh broadside into action.

As soon as the British fleet were observed approaching Cumberland Head, on the morning of the 11th, Sir George Provost ordered General Power's brigade, and a part of General Robinson's brigade, consisting of four Companies of light Infantry, and the 3d battalions of the 27th and 76th, to force the fords of the Saranac, and to assault the American works. The advance was made, and the batteries were opened, the moment the action on the lake commenced.

The British attempted to cross the river at three points; one at the village bridge, where they were repulsed by the Artillery and guards under Captains Brooks, Richards and Smith; one at the upper bridge, where they were foiled by the pickets and Riflemen, under Captain Grovenor and Lieutenants Hamilton and Smith, supported by a detachment of Militia; and the third at the ford near "Pike's cantonment," where they were resisted by the New York Militia, under Major General Mooers and Brigadier General Wright. At this latter point, several Companies succeeded in crossing, driving the Militia before them towards Salmon River. The British advanced, firing by platoons, but with such carelessness of aim as to do but little injury.* At Salmon River, the Militia were joined by a large detachment of the Vermont volunteers, and were soon afterwards reinforced by Lieutenant Sumpter, with a party of Artillery and a field-piece. Here they rallied and were drawn up to meet the attack of the British troops, who were rapidly approaching. Just at this moment an officer† rode up to the ranks, proclaiming the welcome intelligence that the British fleet had surrendered. With three hearty cheers the militia immediately pressed forward against the enemy, who, having been at the same moment recalled, were now rapidly retiring toward the ford. In their retreat, a Company of the 76th lost their way among the thick pines, where they

*I have conversed with several who boast of their *activity* during this retreat, and who felt a personal interest in the subject at the time, and they all state that the balls, at each volley, struck the pine trees at least fifteen feet from the ground.

†Chancellor Walworth, then Adjutant General of Major General Mooers' division.

were surrounded and attacked by several Companies of Militia and Vermont volunteers. Three Lieutenants and twenty-seven men were made prisoners, and Captain Purchase and the rest of the Company killed.* The rest of the British detachment regained the north bank of the Saranac without much loss.†

Although no further attempt was made to cross the river, the British batteries continued their fire upon the American works until sun-down. This fire was returned by the guns of Fort Brown, which were managed during the day with great skill, by Captain Alexander Brooks and the corps of veteran artillery under his command.

Sir George Provost had now under his command over thirteen thousand troops, more than half of whom had served with distinction under Wellington, while the American force did not exceed fifteen hundred regulars, fit for duty, two thousand five hundred Vermont volunteers, under Major General Strong, six hundred of whom had just arrived, and General Wright's brigade of Clinton and Essex Militia, seven hundred strong, under command of Major General Mooers. With his superior force, Provost could have forced the passage of the Saranac, and have crushed Macomb by the mere weight of numbers. But the victory would have been attended with great sacrifice of life, and would have led to no permanent advantage to the British. Macdonough was in command of the lake ; reinforcements of regulars were hastening to the support of Macomb ; the Militia were rising, *en masse*, in every quarter, and within two weeks Provost would have been surrounded, his supplies from Canada cut off, and an only alternative left to force his way

*It is said Captain Purchase was shot down, while waving a white handkerchief over his head, as a notice that he had surrendered.

†Sir George Provost, in his account of the battle, says: "Scarcely had his Majesty's troops forced a passage across the Saranac and ascended the heights on which stand the American works," &c.—This would imply that the British had gained ground near the forts, but such was not the case. They crossed nearly two miles above the forts, and followed the Militia *from*, instead of towards the American works.

back with the loss of half his army, or to have surrendered. In a dispatch to Earl Bathurst, after referring to the loss of the fleet, he says : "This unlooked for event depriving me of the co-operation of the fleet, without which the further prosecution of the service was become impracticable, I did not hesitate to arrest the course of the troops advancing to the attack, because the most complete success would have been unavailing ; and the possession of the enemy's works offered no advantage to compensate for the loss we must have sustained in acquiring possession of them."

This was a just and merited compliment to the skill and bravery of the American regulars and militia. The former were few in number, but resolute and unflinching. Among the latter the greatest enthusiasm now prevailed. They had become accustomed to the "smell of powder," and animated by the recollection of Macdonough's victory, were ready to oppose any force that might attempt the passage of the Saranac. It is due to the patriotism of the citizens of Vermont, to mention the fact that as soon as Governor Chittenden received information, from General Macomb, of the invasion by the enemy, he issued a spirited address calling on the Vermont Militia to rally to the aid of their countrymen on the opposite side of the lake. This address was most nobly responded to, for when the requisition of the President for a reinforcement of two thousand Militia to aid General Macomb, reached the Governor, he replied that the order had not only been anticipated, but far exceeded, by the voluntary enrollment of his fellow citizens. The same enthusiasm pervaded the Militia on the New York side. When Major General Mooers' orders were received for the Militia of Warren and Washington Counties to assemble, *en masse*, and march to the frontier, there appeared, under arms, two hundred and fifty men *more* than had ever mustered at an inspection or review.

Acting upon the considerations stated in his dispatch to Earl Bathurst, Sir George Provost prepared for an instant and hasty retreat. As soon as the sun went down, he dis-

mantled his batteries, and, at 9 o'clock at night, sent off his heavy baggage and artillery, which were quickly followed by the main army ; the rear guard, consisting of a light brigade, started a little before day break, leaving behind them vast quantities of provisions, tents, camp equipage, ammunition, &c. The sick and wounded were also left behind, consigned to the generosity and humane care of General Macomb. So silent and rapid was the retreat, that the main army had passed through Beekmantown before its absence was known in the American camp. The light troops, volunteers and militia were immediately sent in pursuit. They followed the retiring column as far as Chazy, and took a few prisoners. The roads were muddy, and very heavy at the time, which not only prevented further pursuit, but delayed Provost's retreat. The last of the British army did not leave Champlain until the 24th.

General Macomb, in his returns, states the number of killed, wounded and missing of the regular force under his command, during the skirmishes and bombardment, at one hundred and twenty-three. The only commissioned officer killed, was Lieutenant George W. Runk, of the 6th Regiment, who was severely wounded on the 7th and died the next day. The loss among the volunteers and Militia was small. The loss of the British has never been correctly ascertained. Their accounts fix the casualties of the expedition at under two hundred killed and wounded, and four hundred lost by desertion. This however is far below the true number. At the time, the American officers believed the total loss of the British, from the time they first crossed the lines until they again entered Canada, in killed, wounded and prisoners, and by desertion, was over two thousand men.—Seventy-five prisoners were taken.*

*The following list of British officers killed or wounded during the invasion was published in the London Gazette of the 19th and 26th November, 1814.

KILLED.—Captain (Brevet Lieut. Col.) James Willington and Ensign John Chapman, of the 3d Buffs. Captain John Purchase, 76th Regiment, foot.

WOUNDED.—Captain T. Crosse, A. D. C., (slightly) ; Lieut. R. Kingsbury, severely, (since dead) ; Lieut. John West, (severely) ; Lieutenants Benson and Holmes, (slightly) ; all of the 3d Buffs. Captain L. Westropp, (severely,) ; Lieut. C. Brohier and Adjutant Lewis, (slightly) ; of the 58th Regiment, foot.

On the 12th the Vermont volunteers returned home, and on the 13th the New York Militia were disbanded by General Macomb, and orders issued countermanding the march of thousands, who were flocking to the frontier.

On the morning of the 13th of September, the remains of the lamented GAMBLE, STANSBURY, BALDWIN, CARTER and BARRON were placed in separate boats, which, manned by crews from their respective vessels, proceeded to the Confidence, where they were joined by the British officers, with the bodies of DOWNIE, ANDERSON, PAUL, GUNN and JACKSON. At the shore of the lake, the procession was joined by a large concourse of the military and citizens of Plattsburgh, who accompanied the bodies to the village burial-ground. Near the center of the grave-yard, beneath the shade of two pines, now rest the ashes of those gallant officers. The sailors and marines, who fell in the engagement, were buried on Crab Island, side by side, in one common grave.

With the Battle of Plattsburgh closed all active operations upon the Champlain frontier. For several months, however, the inhabitants were kept in a state of alarm, as it was rumored that the British authorities contemplated another campaign. Major General Mooers, of New York, and Major General Strong, of Vermont, ordered their respective divisions of Militia to hold themselves in readiness for active service. General Macomb remained at Plattsburgh with a small force, and caused two redoubts to be thrown up a short distance to the south of Fort Moreau, which he named Fort Tompkins and Fort Gaines.

The Treaty of Ghent was signed on the 24th of December, 1814, and, on the 17th of February following, was ratified by the United States Senate. With the publication of this Treaty all fears of further hostilities ceased.

APPENDIX.

**AN ACCOUNT of the Celebration of the Anniversary of the Battle
of Plattsburgh, by the Citizens of Plattsburgh and the Clinton Co.
Military Association, September 11th, 1843.**

At a meeting of the CLINTON COUNTY MILITARY ASSOCIATION, held on the 21st of August, 1843, it was, on motion of Major A. A. Prescott,

Resolved, That this Association do celebrate, in some appropriate manner, the Anniversary of the Battle of Plattsburgh, on the eleventh of September next.

Resolved, That a committee of three be appointed to confer with the Trustees of the Village, and make arrangements for the Celebration.

Maj. Gen. Skinner, Brig. Gen. Halsey and Col. Moore, were appointed said committee.

The following named gentlemen were duly appointed a committee on the part of the citizens to confer with the committee of the Military Association in making the necessary arrangements for the proper celebration of the day :—

William F. Haile, Moss K. Platt, D. B. McNeil, C. S. Mooers, R. A. Gilman, G. M. Beckwith, G. W. Palmer, S. Couch, Benj. Ketchum, R. A. Weed, J. Bailey, Peter S. Palmer, T. DeForris, William H. Morgan, J. W. Tuttle.

At a meeting of the Joint Committee of Arrangements, Col. D. B. McNeil, (who was Acting Assistant Adjutant General of the Militia forces at Plattsburgh, in Sept., 1814)

was designated to act as President of the day, and the following resolutions were adopted :

Resolved, That the citizens of Plattsburgh, in connection with such other persons as may unite with them, will on the 11th of September, instant, proceed to the erection of plain marble monuments to mark the several spots where rest the mortal remains of the American and British officers who fell at the memorable "Battle of Plattsburgh."

Resolved, That R. A. Gilman, George Moore, and Roby G. Stone be a committee to procure the monuments and make the necessary arrangements to carry out the foregoing resolution.

Resolved, That Brig. Gen. Wool, and Lt. Col. B. Riley, of the U. S. Army, be requested to unite with the citizens and military of this place in the proposed celebration, and the erection of the monuments above mentioned.

Resolved, That Gen. Skinner, Gen. Halsey, and Col. R. G. Stone be the committee of invitation.

Resolutions were also passed inviting the U. S. Officers and troops stationed at this post, the surviving officers and soldiers of the regular army, the Clinton and Essex Militia, and the Vermont volunteers who participated in the events of that time, to unite with us in the proposed celebration.

In accordance with the above arrangements, the Anniversary of the Battle of Plattsburgh was celebrated in an appropriate manner by the Clinton County Military Association and the citizens of Plattsburgh and its vicinity generally, on Monday last. General Wool and suite, and several other gentlemen who were in the battle of the 11th, were present by special invitation.

The procession was formed at Fouquet's Hotel at 10 o'clock, under the direction of Gen. C. Halsey, Chief Marshal, assisted by Messrs. C. S. Mooers, G. W. Palmer, and R. G. Stone, escorted by the U. S. Troops at this post, under the command of Capt. C. A. Waite, and moved to the Park in front of the Court House, where an able and patriotic address was delivered by Col. A. C. Moore, to a large and attentive audience of ladies and gentlemen.

After the address, the procession was again formed and moved to the burying ground, where a square was formed by the U. S. Troops and the Military Association, around the unmarked graves of those who fell in the battle of Plattsburgh.

After a prayer by the Rev. Mr. Witherspoon, and an address by Gen. Skinner, the President of the day (Col. McNeil) said :

"FELLOW CITIZENS :—The President of the day has designated our distinguished guest, Brigadier General Wool, of the United States Army, who commanded the detachment of American regular troops opposed to that division of the British Army which advanced upon Plattsburgh by the Beekmantown road, on the 6th of September, 1814, to erect a monument at the head of the grave of Col. Willington of the 3d Regiment of British Buffs, who gallantly fell at the head of his Regiment at Culver's Hill, on the Beekmantown road, in the memorable battle of the 6th of September, 1814.

"The division of the British Army in which the brave and lamented Willington fell, was not less than 4000 strong ; and when we take into view the fact that General Wool, (then a Major,) with a light corps of but 250 regular troops, all told, contested every inch of ground with this formidable force in their descent upon Plattsburgh, the selection of General Wool to perform the melancholy duty assigned to him, cannot fail to give deep interest to the solemn occasion which brought us together upon this hallowed spot. Nothing can be more appropriate than that the monument about to be erected should be raised by the hand of an officer who bore an honorable and conspicuous part in the events of the memorable day on which the gallant Willington fell. It is a pleasing spectacle to see the living brave doing honor to the memory of the illustrious dead."

Gen. Wool proceeded to discharge the duty assigned him, and said :

"FELLOW-CITIZENS AND SOLDIERS :—"The duty assign-

ed me by the President of the day, in behalf of the citizens of Plattsburgh and the Military Association of the County of Clinton, is no less gratifying to me than it is honorable and magnanimous to its authors, and will furnish an example worthy of imitation for all time to come. It is not less a holy and pious offering to the illustrious dead, than the offspring of noble and generous hearts to a fallen foe, and will furnish themes of praise to the end of time. It will be a healing balm to the wounded hearts of relatives and friends—whilst it will not fail to call forth from every Briton who passes this consecrated spot, tears of gratitude as well as tears of sympathy.

“With these brief remarks, I now erect, in behalf of the citizens of Plattsburgh and the Military Association of Clinton County, this monument to the memory of Colonel Wellington, who fell the 6th of September, 1814, at Culver’s Hill, leading to the charge the advance of the British army marching on Plattsburgh.”

The President of the day said :

“FELLOW-CITIZENS : Our esteemed fellow-citizen, Judge Haile, late a Captain in the United States Army, will now proceed to place monuments at the respective graves of Captain Purchase, late of the British Army, Lieut Runk, late of the 6th Regiment, United States Infantry, and Ensign John Chapman, late of the 3d Buffs.”

The President of the day, in designating Judge Haile to perform the duty assigned to him, did so from a full knowledge of the fact, that no officer of his rank ever left the army of the United States with a higher and more enviable reputation as a fearless and fighting officer, than did Captain Haile.

Judge Haile proceeded to the duty assigned him, with suitable remarks.

The President of the day then said :

“FELLOW-CITIZENS : To Colonels Miller and Manly, and Maj. Gen. Skinner, all of whom bore a distinguished part in the battles of Beekmantown and Plattsburgh, is assigned the

honor of erecting monuments to the memory of Lieutenant Peter Gamble, United States Navy, John Stansbury, U. S. Navy, and Midshipman James M. Baldwin, U. S. Navy."

The gentlemen above mentioned proceeded to discharge the duty assigned them, accompanied by appropriate remarks.

The President said—

"To our esteemed fellow-citizen, Platt R. Halsted, Esq., late a Lieutenant in the United States Army, I assign the honor of placing monuments at the graves of Captain Alexander Anderson of the British marines ; Lieutenant William Paul, midshipman ; William Gunn and boatswain Charles Jackson of the British Navy, and Joseph Barron, Pilot on board Commodore Macdonough's ship—all of whom fell in the naval engagement in Cumberland Bay, off Plattsburgh, on the 11th of September, 1814.

"Joseph Barron, Pilot, was personally known to Lieut. Halsted and myself, and was a man held in high estimation for his intelligence and patriotism by all who had the pleasure of his acquaintance."

Lieut. Halsted, in the discharge of the duty assigned him, erected the monuments at the head of the graves of the three Lieutenants of the British Navy, and proceeded to the grave of Joseph Barron, and, as near as we could catch his remarks, spoke as follows :

"I take a melancholy pleasure in erecting this monument at the head of the grave of Joseph Barron, Cominodore Macdonough's confidential Pilot. I knew him well—he was about my own age—we were school boys together—a warmer hearted or a braver man never trod the deck of a ship."

Lieut Springer, late of the U. S. Army, was designated by the President of the day, to erect the monument at the head of the grave of Sailing Master Rogers Carter, U. S. Navy, and proceeded to discharge that duty.

A benediction was then pronounced by Rev. Mr. Wither-spoon, and the procession returned to Fouquet's Hotel, where the committee of arrangements, the invited guests and the Military Association partook of an excellent dinner, got up in Fouquet's best style.

Among the sentiments offered on this occasion was the following, by General Skinner:

Brig. General Wool, U. S. Army—The Hero of Beekmantown as well as Queenstown—

"His laurels are green, though his locks are gray."

General Wool, with much feeling, responded to this sentiment as follows :

Mr. PRESIDENT—I rise with a heart overflowing with gratitude to respond to the sentiment just given by my friend at the other end of the table. I find it impossible, however, filled as I am with emotion, to make a speech, or give utterance to my feelings in a maner worthy of the occasion. Were it otherwise, I could say but little that has not already been said. I might speak of the campaigu of 1812 and '13, which closed with the most gloomy forebodings. I might also speak of the campaigu of 1814, when the mantle of darkness was cast off, and a blaze of light shone forth along the frontier from Fort Erie to Plattsburgh, and finally closed, with a brilliancy seldom equalled, on the plains of New Orleans. But these periods have already been noticed and described in the most eloquent and stirring language. Therefore, little remains for me to add, could I give utterance to my feelings, but to express my warmest thanks for the kind partiality with which you have been pleased to allude to my services. I would, however, remark that although at one period of the war darkness and despondency appeared to pervade our beloved country, there was one bright spot exempt from the general gloom. It was here in this place, Plattsburgh, that the patriotic inhabitants never wavered nor quailed before the legions of Great Britain.—They stood by their country in the darkest hour, and never failed to cheer and comfort the war-worn soldier, and to receive him with open arms whether he returned victorious, or was driven back by the force of circumstances. Who that was at Plattsburgh in 1812, '13 and '14, does not remember with delight Mooers, Smith, Saily, Delord, Bailey, Palmer and Ransom, all patriotic citizens and devoted friends of their country in war as well as in peace, but who now rest in the mansions of eternal bliss. With these few remarks, Mr. President, I would offer this sentiment—

The Citizens of Plattsburgh and the Military Association of Clinton County—This day attests their magnanimity and greatness of soul, by the homage paid to the illustrious dead who fell fighting the battles of their country.

EAST.

REMOVAL OF TROOPS, IN AUGUST 1814.

It has been asserted, in certain quarters, that the authorities at Washington never intended a real invasion of Canada, for fear that the reduction of Montreal and the other important points upon the St. Lawrence might ultimately lead to annexation, and to a consequent increase of political power, north of Mason's and Dixon's line. While old and superannuated Generals commanded on this frontier, they were allowed, *ad libitum*, to lead their armies to and fro along the outskirts of Canada, but the moment a fighting man, with the regular snap of war in him, was found to be in command, the army was broken up and its best fragments sent to aid in some distant operations, where the most triumphant success could not endanger the cities of Montreal and Quebec, which were justly considered as the keys of the British Provinces.

The correspondence between the Secretary of War and General Izard shows that the critical situation of this frontier was well known at Washington, and that the government were anxious to direct operations towards some point, where success would be the least likely to result in the conquest of Canada. On the 27th of July, the Secretary of War writes to General Izard, as follows ; "If General Brown's movements have produced large detachments from Montreal (as is stated) some enterprise on your part, menacing that place, or to some other higher up the St. Lawrence, would be proper. Of these points *Prescott would be the best.*" This letter having miscarried, the Secretary, on the 2nd of August, forwarded General Izard a copy of his letter of the 27th of July, and says "the movement indicated in my letter of the 27th ought to be made without delay."

When these letters were written, the Secretary well knew that Izard could make no movement against Montreal, which was defended by a large army occupying strong positions on the route leading to that city.* General

*Niles' Weekly Register, of July 30, 1814, published at Baltimore, says, "General Izard.—We have nothing important from this quarter. The army, as well as the fleet on Champlain, is inactive. *A great Battle is still expected every day : AND ITS EFFECTS WILL BE VERY IMPORTANT.*"

Izard understood these letters as directing a movement towards Prescott, for in his reply, under date of 11th August, he says ; "I will make the movement you direct, if possible, but I shall do it with the apprehension of risking the force under my command, and *with the certainty that every thing in this vicinity, but the lately erected works at Plattsburgh and Cumberland Head, will in less than three days after my departure be in the possession of the enemy.* *He is in force superior to mine in my front;* he daily threatens an attack on my position at Champlain ; we are in hourly expectation of a serious conflict." * * * "I believe this to be the strong point of our frontier for either *attack or defence;* and I know that a British force has been kept in check in Lower Canada for many weeks past greatly superior to that which I could oppose to it." If the Secretary really contemplated an attack on Montreal here was enough to satisfy him, if he did not know it before, that such a movement was impracticable and that, if Izard stirred from his position, it must be in the direction of Upper Canada.

ANECDOTES OF THE BATTLE OF PLATTSBURGH.

The following anecdotes are copied from Niles' Weekly Register, Vol. S :—

"The wounded of both fleets and our army, the same evening, were landed at our cantonment on the island.

"The enemy was not neglected ; prompt assistance was indiscriminately rendered. Those who had but one hour previous been deadly foes, now lodged by each other's side, like brothers and friends, giving and receiving the tenderest words of consolation.

"It is as true that Macdonough is religious, as that he is a brave man. He made a most appropriate prayer over the dead, previous to their interment. The following anecdote will interest you. At the moment the British were bearing down, an officer asked permission of the commodore to issue

an extra ration of grog to the men. "No," was the reply—"My men shall go cool into action, excited by no stimulus, except their native valor."

"On the 11th September, after the British column, which crossed the Saranac, had broken, and the men were making the best of their way back—Hazen Mooers and Mr. Brooks and Stafford, pursued a party of the enemy's light troops, double their number, for nearly two miles, keeping up a constant fire upon them, which they returned occasionally. At length the British party hesitated about the course they were pursuing, and our men told them they were lost and called upon them to surrender, which they consented to, after obtaining a pledge from the militiamen that they should be well treated. Scarcely had the captors made their disposition for bringing in their prize, when two other British soldiers came back and commenced a fire on them, reproaching their comrades for having, five of them completely equipped, surrendered to three militia riflemen. With five prisoners in custody, who might attempt to retake themselves, encumbered with the equipment of their captives, and no aid within reach, our riflemen were eager only to get off with the prisoners; but the soldiers were so obstinate in the pursuit, finding no resistance, that Mr. Stafford concealed himself and waited their near approach, when he gave one of the soldiers a deadly shot, and the other relinquished the pursuit.

The prisoners, a corporal and four men, were brought in to General Mooers."

"On the same day, a few of our militia, conducted by Captain Aiken, of Essex county, overtook a party who had Major Skinner, whom they had made prisoner—the party attempted to ford the river. When about half way across, the men who held the major were shot down by his side—one of them held so fast to his sleeve as to tear off the cuff of his coat, and the current took them down the stream. Maj.

Skinner, however, extricated himself and swam ashore. The residue of the party threw down their arms, and cried out "for God's sake spare our lives." The firing ceased: Captain Aiken brought in several prisoners; and major Skinner, whom he rescued from their hands.

Major S. was previously robbed of his equipage, and about one hundred dollars in money, which he did not recover."

"During the siege, Abel Chamberlin and Eli Lewis crossed the Saranac, and made an officer prisoner. He was in a house about twenty rods from a British picket—they took him out of the back door, put one of their coats upon him, and piloted him through the woods to the upper bridge, and from thence to Salmon river a distance of about twelve or fourteen miles."

"On the morning of the 9th September, two citizens of the town found a soldier of the British army asleep in his tent, and made him prisoner. In coming into town they were joined by another citizen—none of them had arms: About a quarter of a mile west of the village they met three British soldiers, armed, going on to join the army. When within a few paces of each other, the citizens sprang upon the soldiers, disarmed and brought them in prisoners.

In the affray, Mr. Samuel Norcross, a respectable, industrious citizen, was shot through the thigh, and expired in about two hours. Shelden Durkee and Ephraim Rand were the two other citizens."

The following narrative of the death of Norcross is copied from an address delivered at Plattsburgh, September 11th 1843, by A. C. Moore Esq.

"It was on the morning of the 12th, that Shelden Durkee Ephraim Rand, and Samuel Norcross, entirely unarmed, met three British Soldiers on the retreat, and simultaneously sprang upon them and seized their guns. A most desper-

ate personal recountre ensued—a struggle for life. Rand and his antagonist equally matched in point of strength, strained every sinew for the mastery, which neither could obtain ; Norcross sunk before the supe:ior power of his adversary, who threw him on the ground and poured the blazing contents of his musket into his body, then turned from the dying Norcross and rushed upon the struggling Rand. At this critical moment Durkee, who with a convulsive effort had wrenched his gun from the third soldier and stretched him upon the ground, prostrated the antagonist of Rand with its butt, and pointing its loaded muzzle at the other soldier compelled him to surrender. Then leaving Rand to bind up the wounds of poor, expiring Norcross, the victorious Durkee marched his three prisoners into camp.”

LOSS OF THE AMERICAN FLEET ON LAKE CHAMPLAIN, OCTOBER, 1776.

The following is General Arnold’s official account of the loss of his fleet on the 13th of October, 1776. In reference to the destruction of the Congress galley, it is said, on page 112, “ Arnold kept up a running fight until he arrived within ten miles of Crown Point, when he ran the Congress and four Gondolas into a *small creek* in Panton.” This statement was made on the authority of the following letter. The sunken wrecks of the vessels are yet to be seen. They now lie in Adam’s Bay, in Panton, nearly opposite Barber’s Point, and not in the mouth of the small creek.

—
Ticonderoga, October 15, 1776.

DEAR GENERAL : I make no doubt before this you have received a copy of my letter to General Gates of the 12th instant, dated at Schuyler’s Island, advising of an action between our fleet and the enemy the preceding day, in which we lost a schooner and a gondola. We remained no longer at Schuyler’s Island than to stop our leaks, and mend the sails of the Washington. At two o’clock, P. M., the 12th,

weighed anchor with a fresh breeze to the southward. The enemy's fleet at the same time got under way ; our gondola made very little way ahead. In the evening the wind moderated, and we made such progress that at six o'clock next morning we were about off Willsborough, twenty-eight miles from Crown-Point. The enemy's fleet were very little way above Schuyler's Island ; the wind breezed up to the southward, so that we gained very little by beating or rowing, at the same time the enemy took a fresh breeze from the north-east, and by the time we had reached Split-Rock, were alongside of us. The Washington and Congress were in the rear, the rest of our fleet were ahead except two gondolas sunk at Schuyler's Island. The Washington galley was in such a shattered condition, and had so many men killed and wounded, she struck to the enemy after receiving a few broadsides. We were then attacked in the Congress galley by a ship mounting twelve eighteen-pounders, a schooner of fourteen sixes, and one of twelve sixes, two under our stern, and one on our broadside, within musket-shot. They kept up an incessant fire on us for about five glasses, with round and grape-shot, which we returned as briskly. The sails, rigging, and hull of the Congress were shattered and torn in pieces, the First Lieutenant and three men killed, when, to prevent her falling into the enemy's hands, who had seven sail around me, I ran her ashore in a small creek ten miles from Crown-Point, on the east side, when, after saving our small-arms, I set her on fire with four gondolas, with whose crews, I reached Crown-Point through the woods that evening, and very luckily escaped the savages, who waylaid the road in two hours after we passed. At four o'clock yesterday morning I reached this place, exceedingly fatigued and unwell, having been without sleep or refreshment for near three days.

Of our whole fleet we have saved only two galleys, two small schooners, one gondola, and one sloop. General Waterbury, with one hundred and ten prisoners, were returned

by Carleton last night. On board of the Congress we had twenty odd men killed and wounded. Our whole loss amounts to eighty odd.

The enemy's fleet were last night three miles below Crown-Point; their army is doubtless at their heels. We are busily employed in completing our lines and redoubts, which I am sorry to say are not so forward as I could wish. We have very few heavy cannon, but are mounting every piece we have. It is the opinion of General Gates and St. Clair that eight or ten thousand Militia should be immediately sent to our assistance, if they can be spared from below. I am of opinion the enemy will attack us with their fleet and army at the same time. The former is very formidable, a list of which I am favored with by General Waterbury, and have enclosed. The season is so far advanced, our people are daily growing more healthy.

We have about nine thousand effectives, and if properly supported, make no doubt of stopping the career of the enemy. All your letters to me of late have miscarried. I am extremely sorry to hear by General Gates you are unwell. I have sent you by General Waterbury a small box containing all my publick and private papers, and accounts, with a considerable sum of hard and paper money, which beg the favour of your taking care of.

I am, dear General, your most affectionate, humble servant,

B. ARNOLD.

To Hon. Major General Schuyler.

N.B. Two of the enemy's gondolas sunk by our fleet the first day, and one blown up with sixty men.

CAPTAIN THOMAS PRINGLE TO MR. STEPHENS, SECRETARY OF THE ADMIRALTY.

On board the Maria, off Crown-Point, October 15, 1776.

It is with the greatest pleasure that I embrace this opportunity of congratulating their Lordships upon the victory completed the 13th of this month, by his Majesty's fleet under my command, upon Lake Champlain.

Upon the 11th I came up with the Rebel fleet, commanded by Benedict Arnold ; they were at anchor under the Island Valcour, and formed a strong line, extending from the island to the west side of the continent. The wind was so unfavorable, that, for a considerable time, nothing could be brought into action with them but the gun-boats. The Carleton schooner, commanded by Mr. Dacres, who brings their Lordships this, by much perseverance, at last got to their assistance ; but as none of the other vessels of the fleet could then get up, I did not think it by any means advisable to continue so partial and unequal a combat ; consequently, with the approbation of his Excellency General Carleton, who did me the honour of being on board the Maria, I called off the Carleton and gun-boats, and brought the whole fleet to anchor in a line as near as possible to the Rebels, that their retreat might be cut off ; which purpose was however frustrated by the extreme obscurity of the night ; and in the morning the Rebels had got a considerable distance from us up the lake.

Upon the 13th, I again saw eleven sail of their fleet making off to Crown-Point, who, after a chase of seven hours, I came up with in the Maria, having the Carleton and Inflexible a small distance astern ; the rest of the fleet almost out of sight. The action began at twelve o'clock, and lasted two hours, at which time Arnold, in the Congress galley, and five gondolas ran on shore, and were directly abandoned and blown up by the enemy, a circumstance they were greatly favoured in by the wind being off shore, and the narrowness of the lake. The Washington galley struck during the action, and the rest made their escape to Ticonderoga.

The killed and wounded in his Majesty's fleet, including the artillery in the gun-boats, do not amount to forty ; but from every information I have yet got, the loss of the enemy must indeed be very considerable.
